SUBJECT: RADIO SHACK INTRODUCES TRS-80

MODEL II MICROCOMPUTER SYSTEM

FOR RELEASE AFTER 5:00 P.M. MAY 30, 1979

FORT WORTH, TX -- Radio Shack, manufacturer of the world-famous TRS-80 Microcomputer System, has introduced their all-new TRS-80 Model II, designed to meet the needs of many users for more data storage, greater versatility and higher computing speed.

The new computer has been primarily designed for the small business application market. It can perform as a general purpose data processing machine, an intelligent terminal, or a word processor. Software is immediately available for general ledger, accounts receivable, inventory control, mailing list management and payroll.

The TRS-80 Model II Microcomputer System, designed and manufactured by Radio Shack in Fort Worth, is not intended to replace or obsolete Model I, according to Radio Shack, but to provide capabilities that begin where the original TRS-80 approaches its upper limits. Model II is said to operate at twice the speed of the original TRS-80.

(MORE)

**TRS-80 MODEL II
ADD ONE**

In addition to either 32 or 64 thousand character (bytes) of internal Random Access Memory, Model II has one built-in 8" floppy disk that stores an additional one-half million bytes, including the Disk Operating System. It can be expanded to a four disk system for up to two-million bytes of storage.

Model II has a built-in 12" high-resolution video monitor that displays 24 lines of 80 normal characters or 40 expanded characters. It features upper and lower case letters.

The professional 76-key keyboard, with 10-key numeric keypad, includes advanced functions such as Control, Escape, Caps, Hold, Repeat and two software-programmable Special Function keys. The keyboard is detachable and moveable to allow more convenient data entry.

An enhanced Level III version of the TRS-80's popular Level II BASIC language and "TRSDOS" operating system are automatically loaded in memory when the machine is turned on.

In addition, each time the computer is turned on, or "powered up", it thoroughly tests itself to insure proper operation. The program can appear immediately without any intermediate steps or questions to answer.

Direct Memory Access allows Model II to continue processing during disk transfer operations. All input/output operations are vector-interrupt driven.

Built-in input/output capabilities include two RS-232C channels, and one Centronics parallel port. Future expansion is provided for through four plug-in slots for optional PC boards. According to Radio Shack, expansion boards are under development now, and will be announced as they become available.

SUBJECT: RADIO SHACK TRS-80 QUICK PRINTER II
#26-1155

KM

FOR IMMEDIATE RELEASE

Radio Shack, manufacturer of the TRS-80 Microcomputer System, has introduced an inexpensive printer that produces low-cost hard-copy output on 2-3/8" wide aluminum coated paper.

The new Radio Shack TRS-80 Quick Printer II prints both upper and lower case characters, as well as double-size characters and double-spaced characters to allow for special effects such as titling pages or printing headings.

QUICK PRINTER II
ADD ONE

Automatic "wrap-around" prevents data loss due to overflow when the text exceeds the maximum line length, according to Radio Shack. The printer is software selectable for 16 or 32 characters per line, and produces 120 lines per minute, 64 characters per second.

Character set is a modified subset of ASCII, 96 characters with upper and lower case, 5 x 7 dot matrix, 6 lines per inch vertical spacing. It can produce all 32 ASCII control codes in addition to codes for the printed characters.

Although designed for use with Level II TRS-80 systems, the printer is also said to be usable with a variety of other computers. Quick Printer II features three standard interfaces: TRS-80, RS-232C, and 8-bit parallel. It can be connected directly to the TRS-80 CPU, or, with optional cable, to the TRS-80 expansion interface. Operates on 120 VAC. Size: 3-5/16 x 6-3/4 x 9 1/4".

The Radio Shack TRS-80 Quick Printer II is priced at \$219.00, available from Radio Shack Computer Centers and participating Radio Shack stores and dealers, nationwide.

SUBJECT: RADIO SHACK AUTOMATIC PHONE DIRECTORY
#43-100

FOR IMMEDIATE RELEASE

Just introduced by Radio Shack is a motor-driven Automatic Phone Directory which is said to save time and provide quick, easy access to telephone numbers or other alphabetized data.

With a touch of any of its 15 buttons, the new automatic phone directory instantly indexes to the appropriate alphabetical holders. It includes enough pressure sensitive paper labels for 380 names and/or addresses, or other information.

Businessmen and secretaries will find the directory to be a helpful office accessory, according to Radio Shack. And in emergencies that needed telephone number is at your fingertips. It is not limited to telephone use only--any kind of data or information can be alphabetically organized in the directory quick reference. Tan housing, 8½ X 6½ X 6". Operates on two "C" batteries.

The Radio Shack Automatic Phone Directory is priced at \$24.95 at participating Radio Shack stores and dealers, nationwide. Radio Shack, a division of Tandy Corporation, has its international headquarters in Fort Worth, Texas.
