

SALES ANALYSIS

If you've ever asked for a detailed sales report and then waited and waited for the figures — we have the answer. The Radio Shack Sales Analysis system provides the capability of examining and evaluating sales information so necessary for effective sales management in today's competitive environment. The information that is used by the Sales Analysis system is obtained from either the Accounts Receivable System (26-4604) or the Order Entry System (26-4607) depending upon which report is chosen. This system is made up of eight reports, each of which shows sales activity from a different perspective:

Features

- Sales Analysis by Customer
- Sales Analysis by Customer Type
- Sales Analysis by Customer Sales Volume
- Sales Analysis by Responsible Salesman
- Sales Analysis by State
- Sales Analysis by Item
- Sales Analysis by Item Category
- Sales Analysis by Item Sales Volume

Each report presents detailed, comparative information which shows sales, percent of sales, cost of sales, profit and percent of profit for each subdivision listed. These figures are presented for both the period-to-date and the year-to-date. Thus, at a glance, you can readily determine important relationships that might otherwise go unrecognized.

System Requirements

TRS-80 Model II with 64K Memory
Accounts Receivable System (26-4604)
Order Entry System (26-4607)
Expansion Unit with Two Disk Drives
Radio Shack Line Printer capable of 132 columns per line on 15" paper (such as LP V) and appropriate connecting cable

Cat. No. 26-4608 **Suggested Retail Price (may vary at individual stores and dealers) \$299.00**
