Radio Shack® Introduces the Heavy Duty LMP 2150
Radio Shack® Introduces the Heavy Duty LMP 2150,
A Line Matrix Printer With Full Triple Mode Capabilities
A Line Matrix Printer With Full Triple Mode Capabilities

The new heavy-duty TRS-80® LMP 2150 from Radio Shack®, a division of Tandy Corporation, is the first line matrix printer versatile enough to meet every office microcomputer printing need, from word processing to business graphics or heavy data processing.

Radio Shack's first line matrix printer, the LMP 2150 prints high resolution characters at 80 lines per minute (LPM) for word processing, 150 LPM for data processing, nearly twice as fast as any previous Radio Shack printer.

Its flexible graphics capability allows generation of a wide range of customized business graphics, including bar codes, labels, enlarged characters and reverse images.

Superior print quality is produced by patented HammerBank technology. Crisp, uniform dots overlap to create characters so solid they're clear to the last copy of a six-part form.

Built to take the pressure of high-duty cycle processing, the LMP 2150 is superb for big jobs like database reports, inventory reports or payroll.

(MORE)

Quality construction and design give the LMP 2150 the highest mean time between failure rates in the industry. The print mechanism's one-piece unitized assembly offers precision dot placement that won't shift or get out of register. Periodic readjustments typical of other printers are not needed. The only maintenance needed is periodic cleaning, typically every six months.

Measuring 24 $\frac{3}{5}$ inches by 20 $\frac{7}{10}$ inches by 10 $\frac{1}{2}$ inches, the LMP 2150 weighs 60 pounds. It uses one-to six-part continuous fanfold paper with sprocket holes in the side edges. The paper may be from three to 16 inches wide with stock weight from 15 to 100 lbs.

The LMP 2150 (26-1272) will be available in late December for \$3,995 at more than 1,000 Radio Shack Computer Centers and participating Radio Shack Dealers nationwide. It uses a 1-inch wide nylon fabric ribbon (26-1287, \$12.95), capable of producing 15 million characters per ribbon. The LMP 2150 is backed by dependable Radio Shack service, with on-site service contracts available.
