

ATT 10 1983

Product : TRS-80 Model 100

Introduction: March 29, 1983

Config/Price: 8K RAM \$799.00

24K RAM \$999.00

Processor : 80C85 (CMOS) @ 2.4Mhz.

RAM : 8 or 24K (CMOS), expandable to 32K.

ROM : 32K - Operating system (proprietary) and 5 applications.

Optional - Additional 32K plug-in applications ROM.

Standard I/O: Parallel printer, 1500-baud cassette, RS-232C, telephone modem and bar-code wand ports, plus AC adapter plug.

Disk Drives : Optional Disk/Video interface with 1, 184K, 5-1/4-inch drive, \$799.00. Expands to 2 drives, and includes video adapter for 40x24 (TV) or 80x24 (monitor) displays. AC only.

Keyboard : 56-Key full-size, integral. 8 function keys, 4 command keys, 4 cursor keys plus embedded 10-key numeric pad.

Monitor : 8-line x 40-character LCD display, full ASCII character set.

Graphics : 240x64, dot addressable.

Construction: One-piece, hi-impact "notebook size" 2"x11-7/8"x8-1/2" case.

Color : Fawn Gray (off white) and black.

Languages : Microsoft floating-point BASIC in ROM.

Op. System : Unique, proprietary, invisible to the user.

Power : Operates from 4 AA batteries, approximately 20 hours.

Optional AC adapter. RAM is powered by separate internal Ni-cad battery which charges automatically from AA cells or AC unit.

Ni-cad maintains RAM continuously, up to 30 days without AA or AC power, depending on the amount of RAM installed.

Modem : Built-in 300-baud, auto-dial (pulse) modem.

Features : Unique 3.9 lb portable computer with built-in, ready-to-run software for BASIC programming, text preparation, telecommunications, scheduling and maintaining address and telephone number files. Using the built-in, F.C.C.-registered modem and TELCOM software, you can auto-dial any number in your ADDRSS file. Automatic log-on to computer systems (MCI Mail, Dow-Jones, Compu-Serve, etc.) is supported as a part of the auto-dial sequence. Up and down-loading of ASCII files from and to RAM is a one-button operation. The terminal emulator also allows interactive communication with other computers. TEXT allows text file preparation, including insert, delete, and "cut & paste" block moves. SCHEDL maintains a NOTE file which you can search for key-words or appointment times. ADDRSS will locate listings in the address file by name, number, or any key word included in the listing. And the BASIC language is Microsoft's most accurate (14-digit floating point) BASIC ever. Other features allow printing of any text file in selectable widths up to 132 characters, with full word-wrap. You can 'ECHO' all telecommunications to your printer. Optional acoustic cups substitute for direct telephone connection if desired (but without auto-dial capability). Named Hardware Product of 1983 by InfoWorld Magazine, the Model 100 has encouraged unprecedented user support. CompuServe's Model 100 Special Interest Group contains more than 500 public-domain programs, available at no charge beyond normal connect time. Accessories include acoustic cups, bar-code wand, and carrying case.
