

Product : TRS-80 Model 16B

Introduction: June 28, 1983

Config/Price: 2-disk, \$4,699.00

1-disk, \$3,999.00

1-FD/15Mb HD, \$6,499

Processor : MC-68000, 32-bit @ 6Mhz, plus Z-80A 8-bit @ 4 Mhz.

RAM : 256K std, 768K maximum, plus 16K I/O Buffer and 2K video RAM.

Standard I/O: Parallel printer port

Two RS-232 ports, and external disk port.

Disk Drives : 1 or 2 internal, plus 2 external 8" DS/DD, 1.25Mb each.

Up to 4 external 15Mb winchesters (2 max on model which comes with built-in HD).

Keyboard : 82-Key detached, with 10key pad and 8 function keys.

Monitor : 80x24 12", high-resolution, green, built-in.

Graphics : Standard - 32 block graphics characters.

Expansion : Two internal 8" disk drives, internal card cage with four available plug-in slots.

Construction: Two-piece, with space for 2 internal disk drives.

Color : Fawn Gray (off white).

Operating : TRS-XENIX Multi-user with XENIX run-time core and COBOL runtime

Systems & : system (included).

Languages: Optional - Xenix Development System (includes "C"), COBOL Development System, FORTRAN 77, PASCAL-2, BASIC interpreter.

TRSDOS-16 (Single User OS) Optional. Includes Assembler-16.

COBOL Development System under TRSDOS-16 is available separately.

TRSDOS 4.2 (Z-80 Single User OS) with Microsoft BASIC is included with Model 16B.

CP/M-Plus (Z-80 Single User OS) and CBASIC are optional.

Features : Very powerful multi-user computer, capable of running many UNIX applications, or in single-user mode, all TRS-80 Model 12 software.

Note: TRS-XENIX is Microsoft's version of (and a true Bell-licensed) UNIX. Supports three users (two terminals) as supplied, or may be expanded to six by adding a 3-user plug-in card. Available applications include the full complement of accounting packages, two powerful data base managers (Profile and Unify), and our own full-featured multi-user word processor. The Model 16 is reported by several industry research firms to have the largest installed base of any UNIX computer... micro, mini, or mainframe.
