RELEASE NO.: RS-83-225

SUBJECT: TRS-80® DMP-120

FOR IMMEDIATE RELEASE

Radio Shack's New TRS-80® DMP-120 Ideally Suited to Data Processing

The new TRS-80® DMP-120 (26-1255) from Radio Shack, a division of Tandy Corporation, is a fast general purpose printer now available for \$499.95 at Radio Shack Computer Centers and participating Radio Shack stores and dealers.

The DMP-120 is an impact dot-matrix printer ideally suited to data processing, capable of printing monospaced characters (standard and condensed) and graphic characters. It prints 120 characters per second and is code compatible with all other Radio Shack printers, with the exception of some word processing codes.

The DMP-120 operates in two modes. Character printing mode allows report generation or program listing, while graphics mode is useful for drawing pictures, figures or graphs.

In the character printing mode, the DMP-120 prints monospaced, 9 x 8 dot matrix characters. A variety of pitches are software or switch selectable, including 10, 12 and 16.7 c.p.i. Underline and elongation modes are also available. The graphics mode allows creation of almost any type of graphic configuration needed.

(MORE)

-2-

Three types of paper can be used with the DMP-120 — standard typewriter paper, standard 8.5 inch roll paper or standard computer fanfold forms. The printer can print one original and up to two carbon copies.

Other features include bi-directional minimum-distance access carriage motion and software-controlled full, half and three quarters forward line feed.
