DATE: November 30, 1983

RELEASE NO.: RS-84-108

SUBJECT: TANDY TRS-80 MODEL
2000 ANNOUNCEMENT

CONTACTS:

Garland P. Asher
Director of Financial Planning
(817) 390-3731

or

Sidney A. Bates
Director of Publicity
(817) 390-3885

Nov. 28 - Dec. 1 Contact at
Caesars Palace (702) 731-7110

TANDY CORPORATION INTRODUCES HIGH-PERFORMANCE

MS-DOS BASED TANDY TRS-80 MODEL 2000 PERSONAL COMPUTER

LAS VEGAS, COMDEX SHOW, November 30, 1983.....Tandy Corporation adds a new dimension to its microcomputer product line and a state-of-the-art innovation in the computer technology industry with the Tandy TRS-80 Model 2000 Personal Computer, an MS-DOS based system which offers a high-performance, next generation processor and a strong price/performance ratio for the professional market of microcomputer users.

The Tandy 2000 is powered by the Intel 80186 microprocessor with full 16-bit data path -- making it almost three times faster than other MS-DOS based systems currently in the marketplace. The Tandy 2000 disk drives have more than twice the storage of drives in such competitive computers as the IBM-PC with twice the color resolution (640x400) and twice as many colors (8).

-more-

Advanced MS-DOS based software programs that will run on the Tandy 2000 include the recently-announced MS-Windows productivity option by Microsoft; Ovation, a new innovative integrated spread sheet, graphics and word processing package; the MAI/Basic Four Integrated Accounting Series, possibly the best accounting software ever developed for the minicomputer market. dBase II, the popular database management program; the PFS File and PFS Report from the PFS family of filing and graphics programs; the Multimate word processing program; Microsoft's Multiplan spreadsheet package and The Home Accountant Plus finance package.

The Tandy 2000 will be supported with most popular productivity and accounting software packages. The MS-DOS operating system will also enable the user, in many cases, to run specialized application software developed for MS-DOS machines.

The sleek, modular Tandy 2000, with detachable, low-profile keyboard and optional "mouse," offers maximum flexibility and the utmost in user convenience.

The Tandy 2000 is available in two configurations, both expandable to 768K of internal memory. A basic Tandy 2000 System (26-5103) with 128K RAM and two 5-1/4" floppy disk drives totalling 1.4 megabytes of storage is priced at \$2,750.

A Tandy 2000 HD System (26-5104) with a single floppy disk drive, 256K RAM and built-in 10-megabyte hard disk is \$4,250.

Both a VM-1 High-Resolution Monochrome Monitor (26-5111, \$249.) with 12" non-glare 80x25 green phosphor screen, and a CM-1 High-Resolution Color Monitor (26-5112, \$799.) with vivid 14" screen are available. Optional 640x400 high resolution graphics are available for either monitor.

-more-

The system's VM-1 monochrome display can be placed on an optional Monitor Pedestal (26-5115, \$89.95) that swivels and tilts to provide optimum viewing angle. An optional Floor Stand (26-5116, \$145) allows the CPU to be placed beside or under a desk resulting in the smallest possible "footprint". In the standard desktop configuration, the keyboard slides under the computer when not in use to increase usable desk space.

At a press conference announcing the new computer, John V. Roach, chairman said, "The Tandy TRS-80 Model 2000 is a high performance product that leverages off the increasing standardization in the industry created by MS-DOS and the IBM-PC without being a 'me-too' product. It is rather a superior new generation product that represents one of several steps we plan to take to leverage off of this standardization trend without becoming vulnerable to other manufacturers strategies.

"We entered the microcomputer business with an aggressive leadership posture," continued Roach, "and this important new addition to our product line indicates our intention and ability to continue in the forefront of the computer technology field."

Roach also emphasized the company's continued commitment to the existing TRS-80 product line with technological hardware enhancements and on-going software development.

"With our more than 1,100 Radio Shack Computer Center locations throughout North America, there is no one who can provide our level of quality, product availability, training and support for the consumer, small business and education markets," said Roach.

-more-

Tandy TRS-80 Model 2000 Personal Computer Systems, optional Monitor Pedestal and Floor Stand, and Model 2000 MS-DOS programs are available at Radio Shack Computer Centers and participating Radio Shack Stores and Dealers nationwide.
