

MARKETING INFORMATION DEPARTMENT 817-390-3300

A Division of Tandy Corporation

1700 ONE TANDY CENTER, FORT WORTH, TEXAS 76102

Product : Tandy TRS-80 Model 2000

Introduction: November 30, 1983

Config/Price: 2-disk, \$2,750.00

1FD/10Mb HD, \$4,250.00

Monochrome Monitor, \$249.00

Color Monitor, \$799.00 (requires color and graphics options.)

Processor : Intel 80186, true 16-bit, at 8Mhz clock speed.

RAM : 128K std, 768K maximum, with parity.

Standard I/O: Parallel printer port, RS-232C, and monochrome video connector.

Disk Drives : 1 or 2 internal 5-1/4" DS/DD, 720K each, plus 10Mb internal winchester drive. Internal HD kit can be added to 2-floppy disk unit.

Keyboard : 90-Key detached, with sculptured keys, 10-key pad and 12 function keys.

Monitors : 80x25, non-interlaced, high-resolution optional monitors: 12" non-glare monochrome, or 14" color.

Graphics : Optional hi-res. monochrome graphics card for 640x400 resolution. Add color graphics chip kit for 640x400 in 8 colors (selected from 16).

Expansion : Two internal floppy and one hard disk drive, plus four available, user-accessible plug-in card slots.

Construction: Two-piece plus monitor, with space for internal disk drives.

Color : Fawn Gray (off white).

Languages : Microsoft BASIC interpreter included.

Optional: MS-PASCAL, MS-GWBASIC Compiler, MS-FORTRAN, MS-Assembler, and COBOL.

D.O.S. : MS-DOS 2.0.

Features : 8Mhz Intel 80186 processor with full 16-bit data path is object code compatible with 8086/8088.

Two direct memory access channels. Three programmable timers. Power-on diagnostics. Sound. User-definable character set. Non-interlaced monitors provide exceptionally crisp, flicker-free display. Reverse video, underline, blank, blink, double-wide/double-high characters. Smooth scrolling and split screen. Special keys include HOLD, ESCape, CTRL, CAPS, INSERT, DELETE, HOME, and 4 cursor keys. Detached keyboard has retractable legs, coiled cable, and "keyclick". 96-TPI drives will read 320K "IBM" diskettes. Applications written for other MS-DOS computers, which respect operating system calls, will generally run without modification on the Tandy 2000. The most popular programs which are machine-specific, have been or are being adapted to the Tandy 2000. Many add-on options are user plug-in installable. First additional 128K memory does not occupy one of the 4 card slots (shop installation required). Optional floor stand for computer, and pedestal for monochrome monitor provides small "footprint" on desktop. Keyboard slides out of the way, under CPU. Other options include Mouse, Mouse/perpetual time/date clock board, and memory expansion. The advanced processor, true 16-bit data path, and faster clock speed allow many applications to run significantly faster than on other MS-DOS computers (various Lotus 1-2-3 operations are 2 to 6 times faster than on IBM PC).
