RELEASE NO.: RS-84-144

SUBJECT: DMP-110

FOR IMMEDIATE RELEASE

Radio Shack® Introduces the High-Performance TRS-80® DMP-110,
A Low-Cost, Triple Mode Dot Matrix Printer

The new TRS-80® DMP-110 Printer is a high-performance, triple mode dot-matrix printer. It features correspondence quality word processing, data processing and high resolution, bit image graphics, all for only \$399.95.

The DMP-110 provides the widest font selection of any printer in the Radio Shack line. Fonts include new cursive-italic and micro font styles, as well as fonts for correspondence and data processing. All fonts on the DMP-110 can be elongated. The printer also supports the use of underline.

The correspondence font prints at 10 or 12 characters per inch, or proportional spacing. In correspondence mode, the DMP-110 prints 25 characters per second. Half height printing, super and subscripts can be achieved using the DMP-110's microfont type style.

(MORE)

The data processing mode allows printing 10, 12 or 17 characters per inch, at up to 50 characters per second, in either standard, elite or condensed mono-spaced characters. It is ideal for printing program listings.

Users also can take advantage of the DMP-110 to produce the lowest-priced high-resolution, dot-addressable bit-image graphics available from Radio Shack. Graphics mode produces up to 960 dots per horizontal 8-inch line, with dot-addressable 7 or 16 dot columns.

Measuring 4-5/86 x 16-1/2 x 12-7/16 inches, the DMP-110 weighs 12 pounds. It prints an original plus one copy on 4" to 10" fanfold paper or single sheets. Both parallel and TRS-80 Color Computer serial interfaces are included, so it can be used with any TRS-80 microcomputer. The DMP-110 uses a 1/4-inch wide re-inking fabric ribbon (26-1283, \$7.95), capable of one million impressions per ribbon.

The DMP-110 (26-1271) is available at Radio Shack Computer Centers and participating Radio Shack Stores and Dealers nationwide. Radio Shack is a division of Tandy Corporation.
