Radio Shack® Launches Express Order Software Program

Radio Shack®, a division of Tandy Corporation, is launching the new Express Order Software Program. This innovative program offers customers a broader spectrum of application programs from a large number of nationally recognized software vendors.

The program will give Radio Shack an opportunity to meet the special needs of customers requiring specific market-proven or special application software not available through the regular Radio Shack product line.

Software products carried in the Express Order Software Program will run on the full line of Tandy Corporation/Radio Shack TRS-80® microcomputers, including the new ultra-high-performance MS-DOS® based Tandy 2000.

Customers may order Express Order Software from Radio Shack Computer Centers, Radio Shack Stores or participating Radio Shack Dealers nationwide. Orders will be transmitted electronically, and software will be shipped out of Tandy Corporation's Fort Worth warehouse the following day.

(MORE)

The Express Order Software Program offers software vendors an opportunity to distribute their software for TRS-80 microcomputers through Radio Shack retail outlets nationwide.

Software vendors will be required to offer total support of end users who have purchased software through the Express Order program.

Software authors and vendors who wish to have their products considered for inclusion in Radio Shack's Express Order Software Program should write:

Express Order Software Program

1300 One Tandy Center

Fort Worth, Texas 76102

###

Radio Shack and TRS-80 are registered trademarks of Tandy Corporation. MS-DOS is a registered trademark of Microsoft Corporation.
