Tandy® 1200 HD Personal Computer

Offers IBM™ PC/XT Capabilities At Significant Cost Savings

The newest MS-DOS® operating system based computer in the Radio Shack line, the Tandy 1200 HD Personal Computer, offers IBM™ PC/XT capabilities at a savings of up to \$1400 per system.

The Tandy 1200 HD computer includes a 10 MB hard disk, and is functionally identical to the PC/XT, using the same software and option cards. At \$2,999, the Tandy 1200 HD computer represents a significant price/performance improvement.

Where price and manufacturer support are important factors, and IBM compatibility is required, the Tandy 1200 HD computer is a superior alternative to the PC/XT. For business customers who require much higher speed, more detailed graphics, more memory and more disc capacity, the Tandy TRS-80® Model 2000 Computer is still one of the highest performance MS-DOS personal computer available today.

(MORE)

The Tandy 1200 HD computer (Cat. No. 25-3000, \$2999) comes standard with 256K RAM, expandable to a total of 640K. A standard parallel interface - an extra-priced option on the IBM PC/XT - is included. And, the five expansion slots will accept option boards made for the IBM PC by a variety of leading vendors. In the standard configuration, one slot is used for the hard disk controller and one slot is used for the floppy disk controller.

Standard features of the Tandy 1200 HD computer parallel those of the IBM PC/XT computer by providing a single 360K full height double sided double density 5 1/4 inch floppy disk drive and a 10 MB hard disk drive housed in the desktop unit. The 84-key detachable keyboard with tilt legs has the same layout as the PC/XT, with improved placement of the shift keys.

The Intel 8088 microprocessor in the Tandy 1200 HD computer operates at 4.7 MHz, offering the same performance as the PC/XT. An 8087 math co-processor, from other sources, can be readily added to the main logic board.

Options provided directly by Radio Shack include a monochrome display adapter (Cat. No. 25-3040, \$219), and a graphics display adapter (Cat. No. 25-3043, \$299), either of which require one slot. The owner may select one of these two options. The graphics display adapter produces color graphics on a color monitor such as the 13-inch CM-2 High Resolution Color Monitor (Cat. No. 26-3212, \$549.95) or monochrome graphics on the 12-inch green screen VM-3 High Resolution Monochrome Monitor (Cat. No. 25-3010, \$219).

The Tandy 1200 HD introductory user's guide takes you through setup and initial use. MS-DOS operating system version 2.11 plus Microsoft BASIC, along with user's manuals for each, are available for \$89.95 (Cat. No. 25-3130).

(MORE)

Additional options include TECMAR's Captain™ multi-function board (25-3061, \$795) which adds 384K of RAM, an RS-232 port, a clock/calendar with battery backup, an additional printer port and the "treasure chest" of software, including RAM spooler, RAM disk, and an appointment alert. The TECMAR Graphics Master card (Cat. No. 25-3044, \$695) provides 640 by 400 resolution in 16 colors and includes PC Paintbrush™ software that allows you to create and print pictures and text in a variety of typestyles.

A selected number of top-selling programs for the Tandy 1200 HD Computer will be offered. These programs include Framework™, the new integrated applications package and dBase III™ database management program from Ashton-Tate, the PFS:® series from Software Publishing and Wordstar™ Professional from MicroPro International.

Both the Tandy 1200 HD Personal Computer and programs for it will be available in mid-October.
