Accounting	State of Art
Accounting	Structure Sys
Legal Time/Bill	Systems Plus
Accounting	Tandy R & D
Project Planning	Westminister
Financial	WITS
Point of Sale	XtraSoft
Point of Sale	XtraSoft
Point of Sale	XtraSoft

Note: This list is for information only, not for direct quotation, since in some cases a particular version of the program is required. Example - IBM version of Wordstar does not operate, but a generic MS-DOS version produced under their name does. In some cases some preliminary action on the user's part is required, such as loading BASIC from a Tandy 2000 diskette, or copying the application to a Tandy 2000 disk, or installing the ANSI.SYS keyboard driver.
