

Meet the Ten-Megabyte Tandy 1200 HD Personal Computer

How would you like a system that does everything an IBM® PC/XT does—but costs at least \$1400 less? The Tandy 1200 HD personal computer is compatible with virtually all software and hardware for the IBM XT. As a matter of fact, the 1200 HD is a mirror-image of the XT—except for the price tag.

A Tandy 1200 HD, a VM-3 high-resolution monochrome monitor and monochrome display adapter (system shown, less software) totals \$3437. A comparably equipped IBM XT, based on manufacturer's pricing as of June 1984, totals \$4920. The 1200 HD provides the same performance and you save \$1483!

Or compare color graphics systems. A 1200 HD with CM-2 color display and color graphics adapter is \$3847.95. The comparable PC XT system is priced at \$5394. Pick the 1200 HD and save \$1546! Whatever configuration you choose, going with Tandy will save you money—without sacrificing quality.

The Tandy 1200 HD (25-3000, \$2999.00) comes standard with 256K RAM, expandable to a total of 640K. A standard parallel interface—an extra-priced option on the IBM—is included. And the 1200 HD is compatible with additional boards made for the IBM PC, and available from leading vendors.

The 1200 HD features a 360K 5¼" double-sided, double-density floppy drive, plus an internal 5¼" 10-megabyte hard disk drive. The 84-key detachable keyboard with tilt legs has the same layout as an XT, with improved placement of the shift keys.

With the Tandy 1200 HD, you get the same performance and access to the same popular software and hardware options as the IBM PC/XT. But you get it for a lot less. Of course, if you want performance above and beyond the IBM PC, you really want to compare our Advanced Technology Tandy 2000. See them both at your nearby Radio Shack Computer Center.

The Tandy 1200 HD Is Backed by a Complete Line of Accessories

Options provided directly from your Radio Shack Computer Center include a monochrome display adapter (25-3040, \$219), and a graphics display adapter (25-3043, \$299). The graphics adapter produces color graphics on a suitable color monitor, such as the CM-2 high resolution color monitor (26-3212, \$549.95), and monochrome graphics on the Tandy VM-3 high-resolution monochrome monitor (25-3010, \$219).

The Tandy 1200 HD includes an introductory user's guide that takes you through setup and initial use. MS-DOS and Microsoft BASIC, along with user's manuals for each, are available together for only \$89.95 (25-3130).

We also offer Tecmar's Captain (25-3061, \$795) and Graphics Master (25-3044, \$695). The Captain™ multi-function board adds 384K of RAM, RS-232, clock/calendar with battery backup, additional printer port and the "treasure chest" of software, including RAM spooler, RAM disk, appointment alert and more. The Graphics Master provides up to 640 by 400 resolution with 16 colors, light pen interface and PC Paintbrush™ drawing software that allows you to create and print pictures and text in a variety of typesyles on your monitor with keyboard or optional mouse.

Radio Shack Computer Centers also offer popular MS-DOS packages off-the-shelf for the Tandy 1200 HD.
