

TANDY... Clearly Superior™

10-Megabyte Disk Cartridge System

Removable disk cartridges make it easy to back up and store data from a conventional hard disk system. You can also use the Disk Cartridge System as a secondary 10-megabyte drive.

10-Megabyte Disk Cartridge System

Get a Versatile Data Backup System

If you're using a hard disk system with your Tandy 6000, 1000, 1200 HD, IBM PC or PC compatible, you know the advantages. You can store massive amounts of data and programs for instant retrieval.

But if you want to make sure that all of your valuable data is kept safe, you have to make numerous individual backups on small-capacity floppy diskettes. That is, you had to—until now.

Our 10-Megabyte Disk Cartridge System (26-1245) is a remarkable technological advance that replaces the cumbersome method of multiple floppy diskettes. With the Disk Cartridge System, you get the flexibility of floppy disk storage combined with the high access time of hard disk drives.

Just insert the 10-megabyte cartridge into the drive to make rapid backups of important data and programs. Additional 10-megabyte cartridges (26-1372) are available to create a complete backup library. The 10-megabyte drive in the cartridge system can also be expanded to 20 megabytes of storage by adding our 10-megabyte kit (26-1246).

The Disk Cartridge System may also be used as a primary stor-

age source. Either way, you'll have unprecedented power and flexibility in a versatile and safe environment.

The Disk Cartridge System combines the obvious advantages of a floppy disk drive:

- Low cost
- Removable convenience
- Simplicity of operation
- Total interchangeability

Plus, you get the best features of a hard disk drive:

- High capacity
- High reliability
- Fast data transfer

There are distinct advantages to using the Disk Cartridge System as a primary storage source:

- Removable 10-megabyte cartridges for true data security
- High reliability
- Fast response time
- 10-megabyte storage—Expandable to 20 megabytes

The Disk Cartridge System is the ultimate backup system as well. You can:

- Transfer megabytes of files safely and swiftly, in minutes, not hours

- Archive the system's slim cartridges economically and conveniently
- Package multiple or complex software and applications on single 10-megabyte cartridges

Beyond that, the system is simply fast:

- Data transfer rate is as fast as your host allows, up to 1.13 Mbytes per second
- Average access time is just 30 ms.

The physical space needed for large storage space is minimal. Cartridges fit easily on the shelf, or even in your briefcase.

Add it up. Our 10-Megabyte Disk Cartridge system delivers:

- Unsurpassed data integrity and reliability
- Field-proven performance in the toughest of applications
- Unequalled resistance to shock or vibration
- Lowest cost per megabyte
- Unparalleled portability
