

TANDY 1200... Clearly Superior™

A "mirror image" of the industry standard in personal computers, the Tandy 1200 uses the same hardware and software, but costs much less.

The Tandy 1200 Gives You the Performance of the Industry Standard—for Less

Imagine . . . a personal computer that works like an IBM PC XT—but costs much less. The Tandy 1200 runs the same top-name software, and supports the same hardware as the PC XT. As a matter of fact, the 1200 is practically a mirror image of the XT—except for the price.

The Best Choice in Software

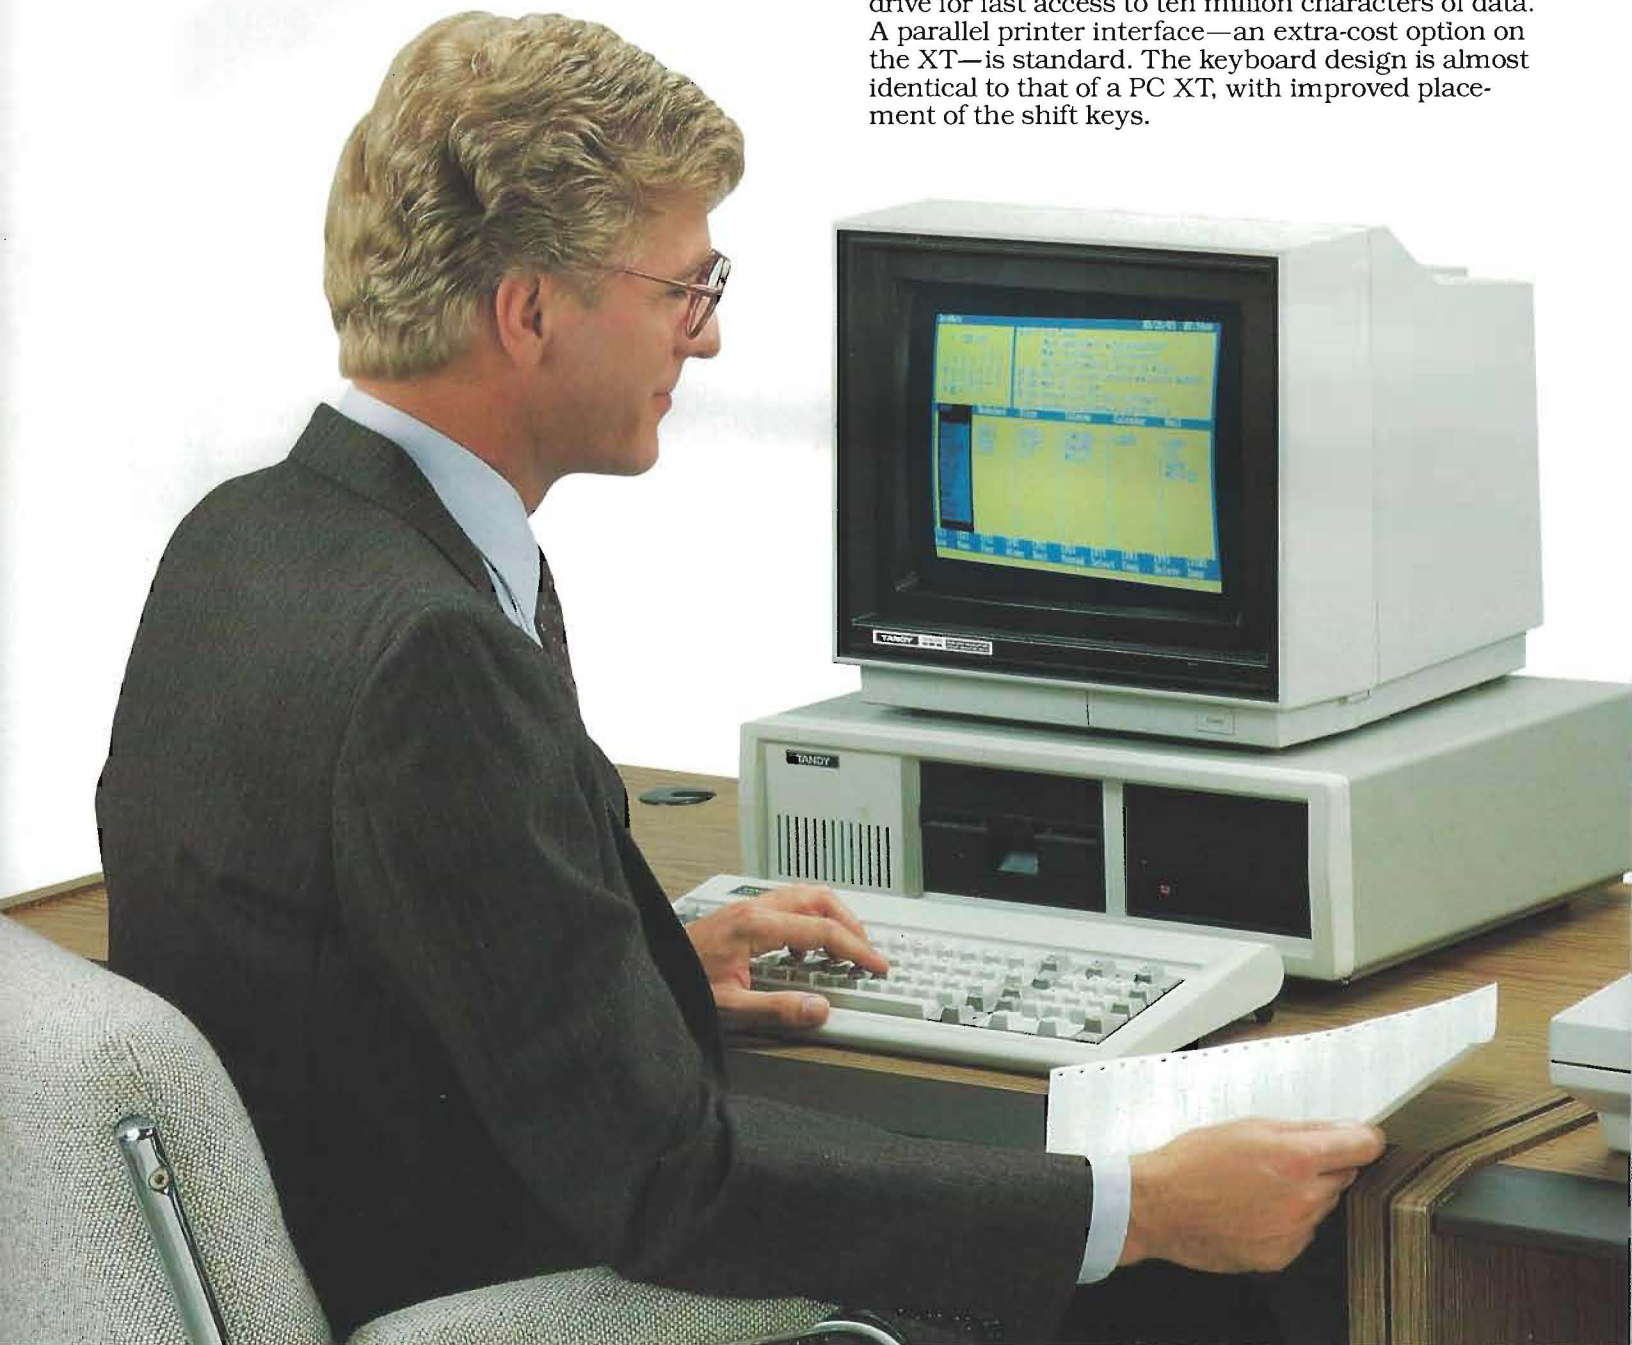

Radio Shack Computer Centers offer many popular MS-DOS packages off the shelf. Independent testing by Future Computing Inc. found the 1200 “operationally compatible” with IBM’s PC, their highest compatibility rating. Lotus Development Corp. rates the 1200 as Lotus 1-2-3/Symphony compatible.

This is great news, especially if you’re already using one or more IBM PC’s in your office. You know the advantages of an MS-DOS system—it’s the industry standard for personal computers. But if you’re thinking of adding more computers to your office, you can probably already envision costs rising out of sight.

The Tandy 1200 lets you expand for less—and continue using the same software. And the 1200 is compatible with virtually all boards made for the IBM PC, available from leading vendors.

All the Features You Demand

The Tandy 1200 (25-3001) comes with 256K RAM (expandable to a total of 640K), plus two half-height 360K floppy disk drives. The Tandy 1200 HD (25-3000) includes a built-in 10-megabyte hard disk drive for fast access to ten million characters of data. A parallel printer interface—an extra-cost option on the XT—is standard. The keyboard design is almost identical to that of a PC XT, with improved placement of the shift keys.

Put the Tandy 1200 to Work with the Most Popular Names in Software

Since the Tandy 1000 is compatible with the IBM PC, thousands of programs are currently available, and the list is growing every day. Many powerful MS-DOS software packages are available off-the-shelf at Radio Shack Computer Centers. Plus, you can order some of the hottest names in software from our exclusive Express Order Software service.

Accounting

The Tandy 1200 makes an ideal office business tool, and there are many fine accounting programs available. A good example is our own Quartet™ integrated accounting package which combines the most important accounting functions in an interactive system. Quartet handles General Ledger, Accounts Receivable, Accounts Payable and Payroll. Data in any part of the program is entered only once, then is automatically updated to the General Ledger. Quartet is designed so that even non-accountants can use it with ease, and its advanced user interface makes it simple to convert your present records to Quartet.

Database Management

Tandy 1200's capacity to handle large amounts of data makes it a powerful processing tool. There are many popular data management programs to choose from, like dBASE III, a powerful program that lets you custom-design your own information system. Using English-like commands and full-screen editing, dBASE III lets you quickly create a full business information system that will grow as you grow. And a special "Assist" function teaches you the system as you go along.

Word Processing

One of the most important applications of a desktop computer is word processing. You'll want a machine that can support software with the advanced features of a dedicated word processor. The Tandy 1200 does just that.

Choose popular programs like WordStar Professional. WordStar lets you write, edit, re-arrange, repeat, insert, delete, proofread—all you need to produce professional-looking work. Plus, WordStar finds mistakes and offers alternatives, lets you address labels and personalized mailings and even create a reference table for your documents.

Integrated Software

Integrated software makes you more productive because you can go from spreadsheet to graphics to information management instantly! You can turn complicated numerical data into easy-to-understand charts and graphs in a matter of seconds, search and sort information, and solve spreadsheet analysis problems fast—all with just one program.

A remarkable example is Framework, which combines word processing, spreadsheet analysis, data management, graphics and telecommunications all in one unique format. Framework doesn't just process numbers—it processes ideas. Each operation is placed in a "frame" that separates it from the rest of the program. Each frame is automatically placed in an outline form, which you can modify at any time.

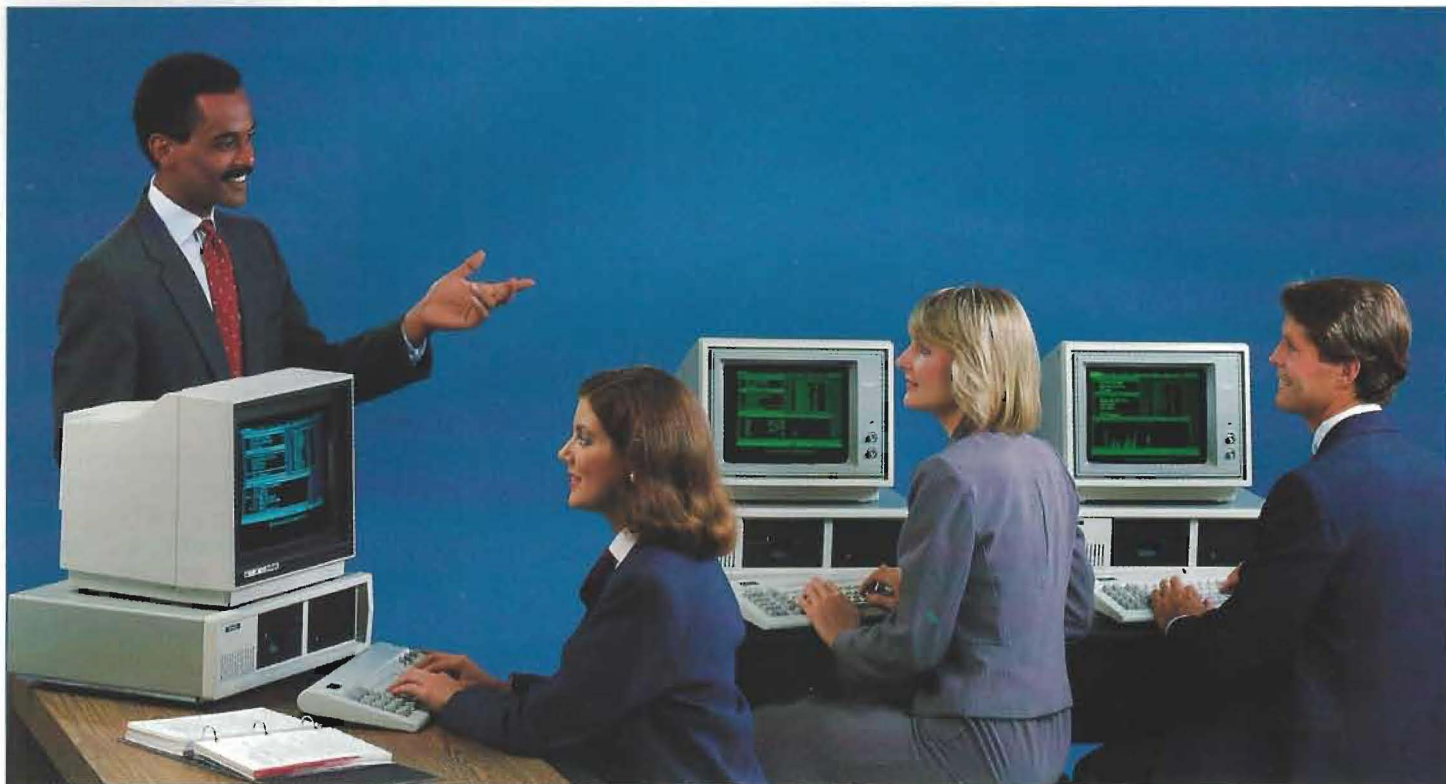

A completely different approach to integrated software is the popular *pfs* series. Each of these family of programs can be used separately, or together. The *pfs* programs can interact with each other so you only need to enter data once. Choose from *pfs:file* electronic filing, *pfs:report* for preparing tabular reports, *pfs:plan* spreadsheet analysis and *pfs:write* word processing programs.

Designed to Meet All Your Software Needs

These are just a few examples of the remarkable programs available for the Tandy 1200. And if our selection doesn't include the software you want most, PC compatibility ensures you can get thousands of packages for the Tandy 1200 from other sources.

Tandy Computers are Backed With Total Support From The World's Largest Computer Retailer: Radio Shack

You'll find everything you need at your nearby Radio Shack Computer Center—"off the shelf" software, printers, custom forms, accessories and even furniture. And that's just part of the story.

Professional Training. Radio Shack offers training and support that is unequalled in the industry. Letting us teach you about your computer system shortens and smoothes that period of "becoming compatible with each other." You can select from a wide variety of courses taught at over 430 Computer Centers. On-site computer instruction with training tailored to your specific needs is available from our Customer Training and Support Centers located in 60 major metropolitan areas.

Support Services. Radio Shack provides more support options at less cost (much of it free of charge, in fact) than any other microcomputer company. Over 500 support specialists are your "on-demand" experts. Nationwide, 60 support operations, plus our

Fort Worth-based customer support operation, ensure that help is available to you where and when you need it. Ask for our Customer Support brochure which details the various support services available, as well as the locations and telephone "hotline" numbers of each support office.

Nationwide Service. 188 company-owned Radio Shack Computer Service Centers assure convenient service nationwide—service that's performed by employees of the same company that manufactured and sold you your computer.

Commercial Leasing. Your business may lease computer systems on a 37-month lease. And since ours is a true lease, payments may be fully tax deductible as a business expense. We can provide leasing terms to non-profit, governmental and educational organizations, too. Get complete details at any Radio Shack Computer Center.
