

TANDY... Clearly Superior™

Tandy 200

Model 100

These portable computers offer unparalleled performance for business or personal use. Both the Tandy 200 and Model 100 feature valuable built-in programs, plus a telephone modem and auto-dialer.

Tandy 200 and Model 100

Excellence in Portable Personal Computers

The Tandy 200 and Model 100 are versatile portable computers for professional, scientific, engineering, school and home use. With a variety of options available, each can perform as a portable or desktop system for dozens of applications.

Both computers include an easy-to-read liquid crystal display screen and a full-size typewriter keyboard. Both feature a built-in direct-connect telephone modem, plus peripheral interfaces. Each operates with an 8-bit 80C85 CMOS processor and a 2.4 MHz clock speed.

The Model 100 includes built-in software for word processing, address/telephone filing, appointment record-keeping, telecommunications and BASIC language programming. The Tandy 200 includes the same built-in applications, plus Multiplan spreadsheet software. Options available for both the Tandy 200 and Model 100 include printers, a floppy disk drive/video interface, portable 3 $\frac{1}{2}$ " micro floppy disk drive, bar code reader, cassette and disk software and additional memory upgrades.

Tandy 200

Our Tandy 200 portable computer represents a true second generation in portable computers, with built-in software, improved features, a bigger screen and a larger memory.

For complete spreadsheet analysis and calculations, we put popular Multiplan software into the Tandy 200's permanent memory. And with four other "instant-on" programs you can use the Tandy 200 as your personal appointment calendar, address and phone directory, and telephone auto-dialer. You can even write your own programs in BASIC, too.

Microprocessor: 8-bit 80C85 CMOS. 2.4 MHz clock speed.

Memory: 72K ROM, expandable to 104K. 24K RAM, expandable in banks of 24K to 72K.

Display: 40 $\times$ 16 liquid crystal display, upper and lower case ASCII characters, 240 $\times$ 128 dot-matrix graphics.

Input/Output: Parallel printer interface, internal 300-baud direct-connect modem with auto-dialer, RS-232C serial communications port, cassette tape interface, standard bar code reader interface.

Dimensions:
2 $\frac{3}{16}$ $\times$ 11 $\frac{3}{4}$ $\times$ 8 $\frac{1}{2}$ "

Weight: 4.5 pounds.

Model 100

A technological "first"—the Model 100 was the first computer to feature five instant-on programs, a 40 $\times$ 8 display and a modem—all built in.

With its easy-to-use word processing program, the Model 100 is especially useful for journalists, engineers, students or anyone who needs to write letter perfect memos, reports and correspondence in a hurry.

Microprocessor: 8-bit 80C85 CMOS. 2.4 MHz clock speed.

Memory: 32K ROM. 24K RAM expandable to 32K.

Display: 40 $\times$ 8 liquid crystal display, upper and lower case ASCII characters, 240 $\times$ 64 dot-matrix graphics.

Modem: Internal 300-baud direct-connect modem with auto-dialer.

Input/Output: Parallel printer interface, RS-232C serial communications port, cassette tape interface, standard bar code reader interface.

Dimensions: 2 $\times$ 11 $\frac{7}{8}$ $\times$ 8 $\frac{1}{2}$ "

Weight: 3.9 pounds.

Power Supply: Four "AA" alkaline batteries (not included) for operation. Internal rechargeable batteries for memory. Optional U.L. listed AC adapter available.
