

TANDY 2000 ... Clearly Superior™

An ultra-high performance personal computer with dramatic speed and storage that lets you complete big jobs in less time...with stunning graphics

The Tandy 2000's Superb Graphics Make Computer-Aided Design Second Nature

If you've been searching for a quality computer that's flexible, has advanced graphics capabilities and doesn't go over budget, stop. There's only one way to cut through today's computer confusion, and that's to compare other personal computers with the Tandy 2000.

Superior Flexibility

The Tandy 2000 can use word processing software and conquer mountains of text. With spreadsheet software, it masters number manipulation. And business graphics translate numerical data into easy-to-understand charts and graphs. The increasing need for electronic pictures in turn creates the need for a true graphics editor—a picture processor similar to a word processor. Now you can create drawings that are as simple as an organization chart or as complex as a printed circuit board design. And that's where the superior graphics capabilities of the Tandy 2000 comes in.

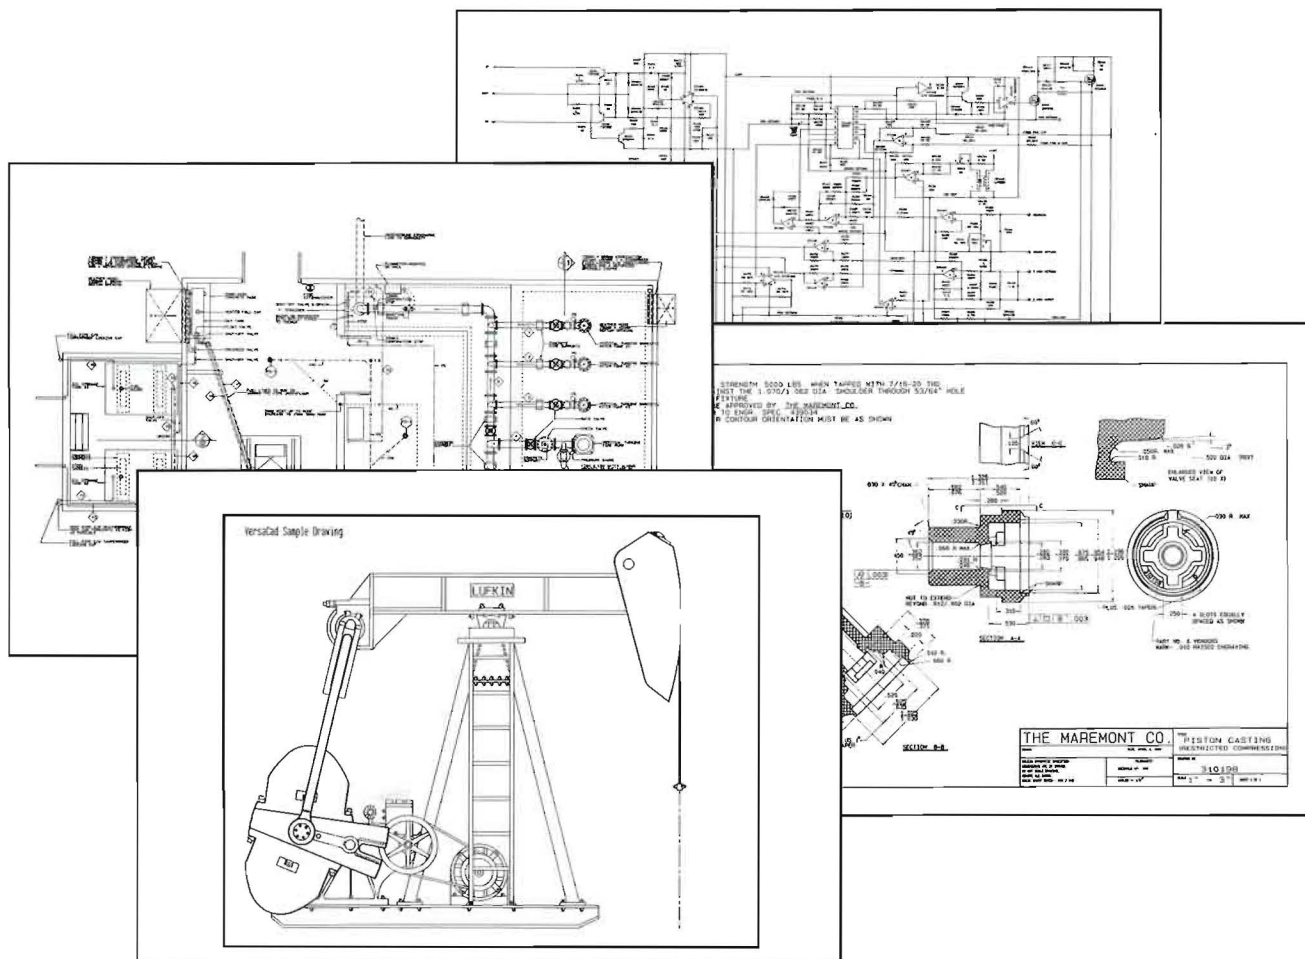

Powerful Graphics

The Tandy 2000's high-resolution graphics let you create razor-sharp charts, graphs and diagrams in a brilliant array of colors. And by adding computer-aided design (CAD) software and graphics periph-

als, the Tandy 2000 offers professional graphics manipulation and advanced minicomputer performance at an exceptionally low price.

Make CAD A Part of Your Work

A general-purpose CAD system is suitable for a wide variety of applications, and is used worldwide by engineers of every discipline—architects, systems designers, shopfitters, graphics designers, and factory and facilities planners. Computer-aided design has many potential applications, among them graphics design, illustration, flow charts, block diagrams, forms design, mapping, printed-circuit board/electrical design, space planning, architectural design, mechanical drafting, product design, and even such specialized areas as archaeological site documentation or stained glass layout. And because computer-aided design is so versatile, many offices find that CAD becomes a full-time "employee," as it is used 35-40 hours a week. A Tandy 2000 system combined with CAD software provides your company endless opportunities for growth, increased productivity and creativity—and overall cost savings. But most important, computer-aided design produces clean drawings with crisp notations of any type—the marks of a professional.

Professional-Quality Graphics Make Your Office Work and Look Its Best

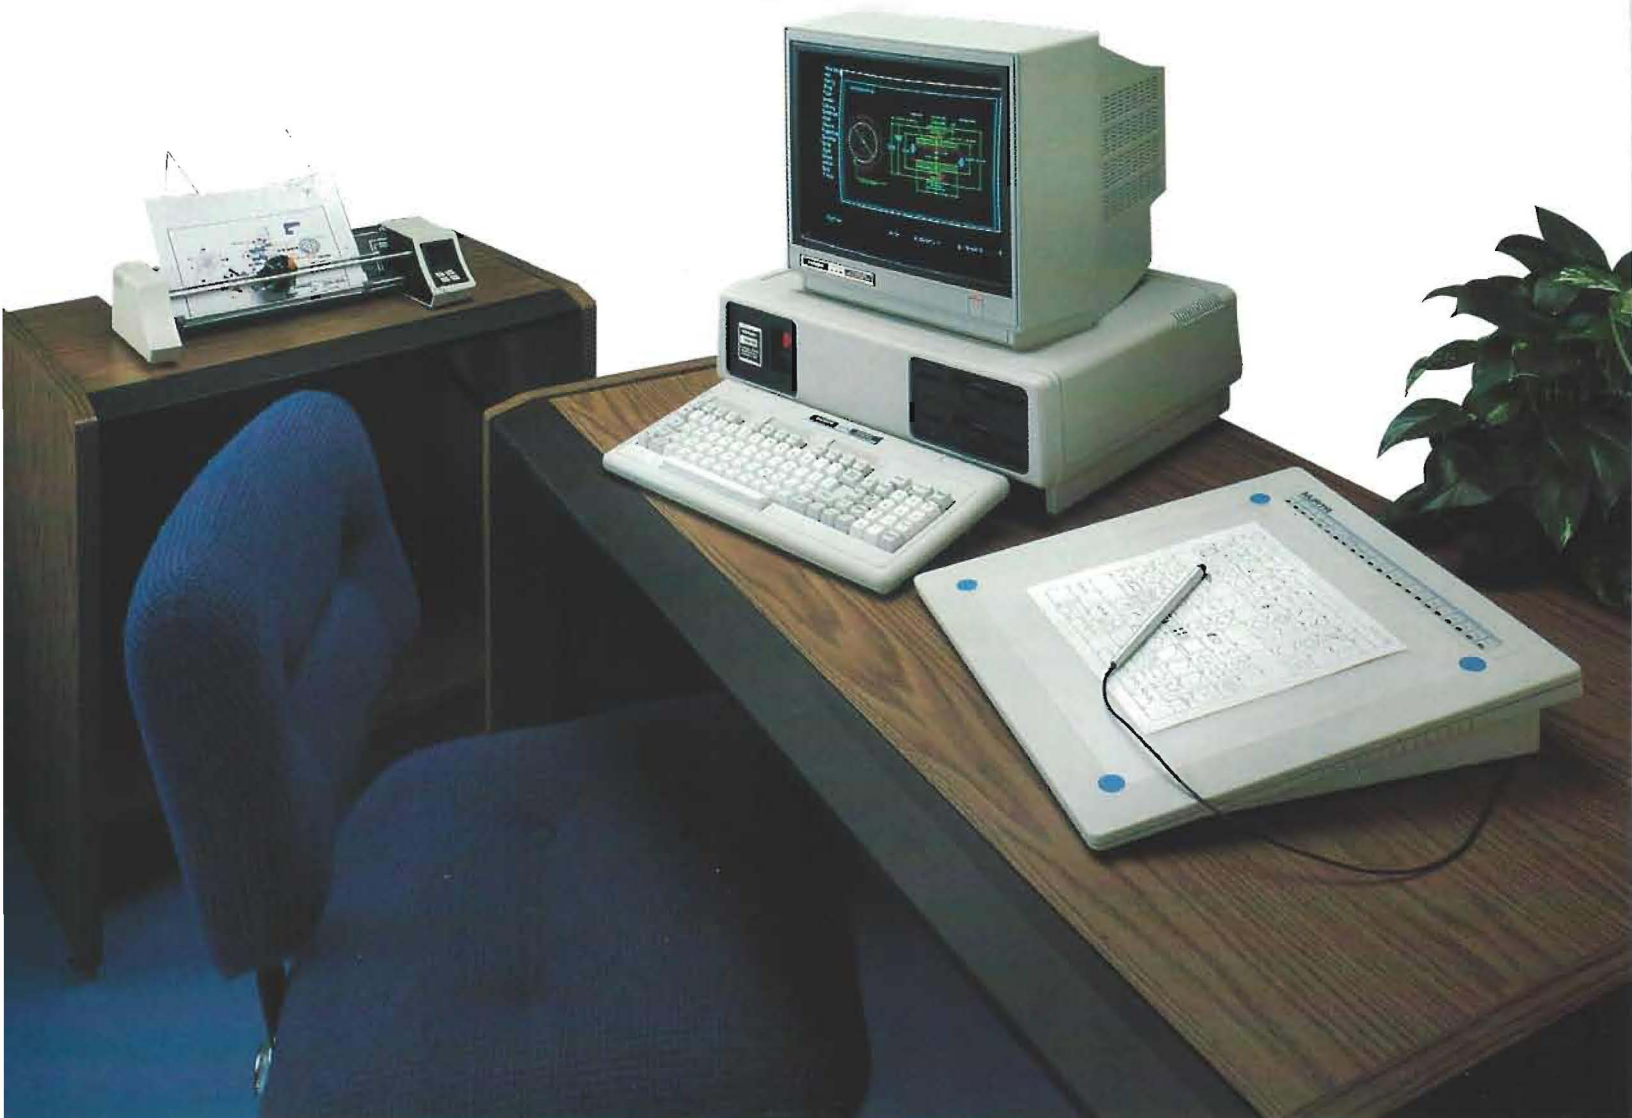

Save Valuable Time

Because the Tandy 2000 uses an 80186 micro-processor, it runs approximately three times faster than ordinary PCs. This means you can complete your drawings nearly three times faster on the Tandy 2000 than you can on most other micros. Even the superior resolution provides for faster drawings on the Tandy 2000. With the 640 x 400 resolution, you can spend less time zooming in on your drawings and waiting for your screen to be redrawn. And the higher resolution also makes your drawings more attractive and easier to work with.

The Tandy 2000 combined with VersaCAD Entry-Level software allows you to handle drawings as easily and efficiently as a word processor handles text. Drawings of any size can be created and edited interactively, simply by using a digitizer or our Digi-Mouse™ (26-1197) to point to the screen or tablet menu items, and then move the drawing cursor around the screen. Once stored on a floppy or hard disk, the drawings you've created may be plotted at

any scale, as required, and can be used freely as components in other drawings. Print your completed design on a plotter or on our high-resolution DMP-2100P dot matrix printer (26-1274).

Lumena software and the Tandy 2000 together make an advanced creative tool for graphics artists and professionals. Lumena is an amazingly versatile design program for artists, designers and illustrators to produce complex images with ease. Free-hand drawing with our GT-2000 Graphics Tablet (26-1186) is as easy as using a pencil on paper. Just touch the correct portion of the graphics tablet to select colors, shapes, letters, fonts, or to draw free-hand. Your images can be duplicated, moved, changed in size, rotated and more at the touch of the pen. Lumena even provides cycling and animation functions for really impressive graphics. And since all copying, re-scaling, rotating and changing colors are done directly from the tablet, there's no interruption of creative flow. With Lumena, you're limited only by your imagination.

Tandy 2000 Supports A Large Selection of Powerful Personal Software

The Tandy 2000 doesn't have to stop at graphics applications either. Choose from many popular titles such as Symphony, the all-in-one business software system; SuperCalc³ for integrated graphics and database management; Framework, the "idea processor" with word processing, spreadsheet, database management, communications and graphics; and DeskMate™, our own low-priced multi-function disk software package.

Business Accounting Software

Streamline your bookkeeping with the MAI/Basic Four Interactive Accounting Series. It's complete with documentation that's clear, concise and easy-to-understand. And because all modules are fully integrated, Accounts Receivable, Accounts Payable, Payroll and Inventory Control all easily pass transaction information to the General Ledger.

Quartet™, a Tandy exclusive, includes four integrated accounting programs to give you the most up-to-date information on your company's financial health. Because all Quartet functions are integrated, there is no constant disk swapping. And Quartet provides easy access to invoices, bills, paychecks, expense checks and ledger transactions.

Advanced Business Programs

Our powerful, user-friendly word processing programs are packed with sophisticated features. SCRIPSIT® lets you prepare memos, letters, reports and manuscripts right on the screen. Microsoft Word is a deluxe word processing system that displays up to eight windows at once, so you can move text from one document to the other with ease. WordStar is a truly amazing professional-quality word processor.

You can find mistakes quickly and simply, address labels and produce personalized mailings, or even create a reference table for your documents.

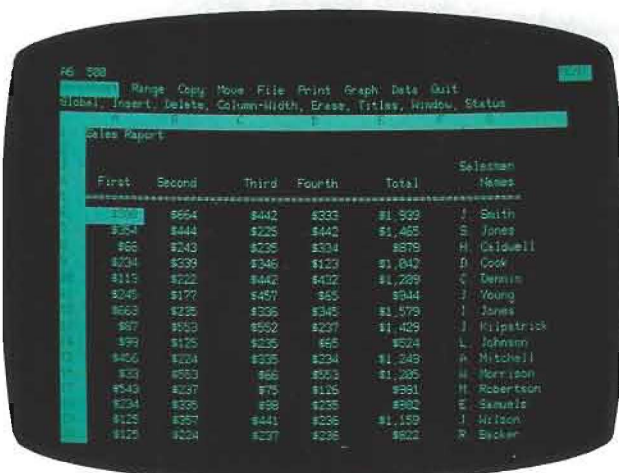

dBASE II and dBASE III are extremely powerful relational database management programs that permit easy manipulation of data bases using English-like commands. Files are easy to create, sort, retrieve and edit. You can perform complex mathematical calculations within a file. dBASE III, an enhanced version of dBASE II, features a greatly increased record capacity. Plus, the "Assist" feature practically teaches you the system as you go along.

Popular Lotus 1-2-3 is an easy way to go from spreadsheet to graphics to information management—instantly. And by using the Tandy 2000 you can perform computations up to three times faster than with the IBM PC.

A different approach to integrated software is the popular *pfs*: series of software. Each of these family of programs can be used separately, or together. The *pfs*: programs can interact with each other so you only enter data once. Choose from *pfs*: electronic filing, tabular reports, word processing and graphics.

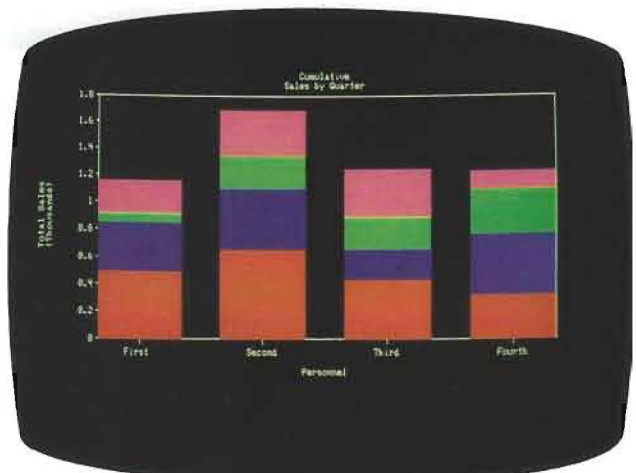

Express Order Software

Now, in addition to our "off-the-shelf" software, you can get other top sellers through our exclusive Express Order Software service. This service makes every Radio Shack Computer Center your one-stop software headquarters. All you have to do is drop by—and choose from the most complete selection of software available. Your software comes to you performance proven and professionally supported by each software manufacturer.

The high-speed Tandy 2000 recalculates Lotus 1-2-3 spreadsheets in 3 seconds, vs. the industry standard of 9.5 seconds.

Graphics on a Tandy 2000 are generated faster than on a standard PC, and offer twice the resolution, too.

The Tandy 2000 Has the Features and Performance You Demand at a Low Price

The Tandy 2000 is a remarkable system that offers you more than other MS-DOS based computers. More speed. More disk storage. More expansion. Higher resolution graphics. And beyond that, the support and superior price/performance ratio that have kept Tandy Corporation in the forefront of the microcomputer industry from the beginning. Take a look at what we offer.

Extremely High Speed

Tandy 2000's "next generation" 16-bit microprocessor is dramatically faster than other MS-DOS computers. That means all the Tandy 2000 software runs faster, so you get the job done quicker.

Flexible, Ergonomic Design

With its stylish white exterior the Tandy 2000 enhances any office environment. But it's more than just attractive. Unmatched flexibility and comfort make the Tandy 2000 a milestone in the science of ergonomics. So it works for you, not against you. Choose from a variety of options to increase usable desk space and add convenience.

You can easily adapt the Tandy 2000 to your environment. In fact, you can actually "fine-tune" the modular system to your personal needs. Using our space-saving options, you have the smallest possible "footprint"—only 8½ × 12¼". And the low-profile,

90-key keyboard with 12 function keys and a 10-key numeric datapad assures fast, comfortable typing.

The Tandy 1200 Outperforms the "Industry Standard"

To see just how advanced the Tandy 2000 is, compare it to today's most popular MS-DOS computer—the IBM PC. A true 16-bit microprocessor makes the Tandy 2000 almost three times faster in actual benchmark comparisons. Tandy 2000 disk drives have over four times the storage of their standard drives. Our color graphics offer twice the resolution and twice as many colors. Unlike the PC, all four of our user-accessible card slots are available for future growth. Tandy 2000 options even cost less, and in most cases you can install them yourself.

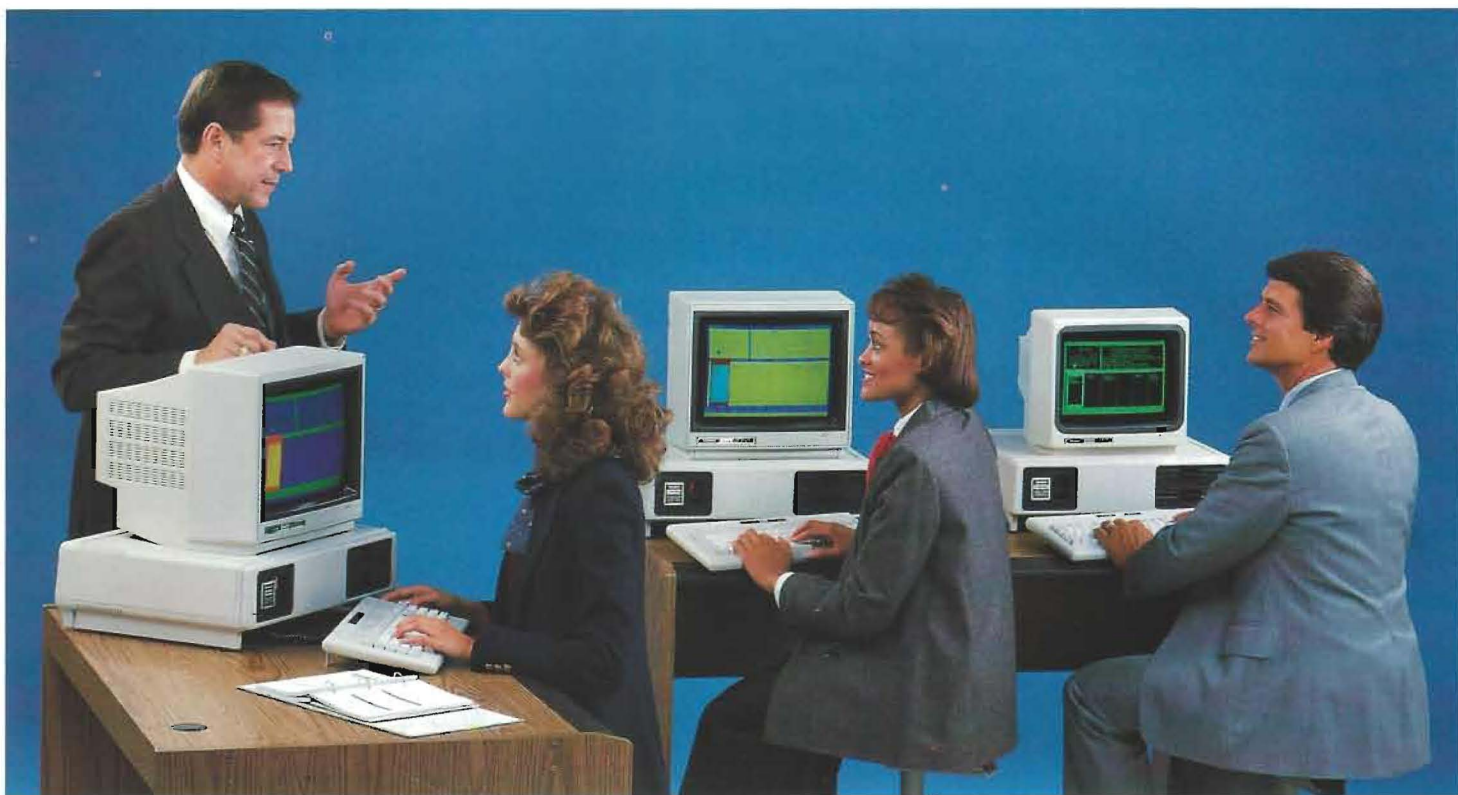

The Logical Choice

Putting it simply, the Tandy 2000 delivers extraordinary quality with higher performance at a lower cost than the so-called industry standard.

Ask for a Demonstration Today

The Tandy 2000 is available at over 1500 Radio Shack Computer Centers nationwide. By staying a step ahead, we not only keep quality high, we keep costs down. One look will tell it all—the Tandy 2000 is clearly superior.

Tandy Computers are Backed With Total Support From The World's Largest Computer Retailer: Radio Shack

You'll find everything you need at your nearby Radio Shack Computer Center—"off the shelf" software, printers, custom forms, accessories and even furniture. And that's just part of the story.

Professional Training. Radio Shack offers training and support that is unequalled in the industry. Letting us teach you about your computer system shortens and smooths that period of "becoming compatible with each other." You can select from a wide variety of courses taught at over 430 Computer Centers. On-site computer instruction with training tailored to your specific needs is available from our Customer Training and Support Centers located in 60 major metropolitan areas.

Support Services. Radio Shack provides more support options at less cost (much of it free of charge, in fact) than any other microcomputer company. Over 500 support specialists are your "on-demand" ex-

perts. Nationwide, 60 support operations, plus our Fort Worth-based customer support operation, ensure that help is available to you where and when you need it. Ask for our Customer Support brochure which details the various support services available, as well as the locations and telephone "hotline" numbers of each support office.

Nationwide Service. 188 company-owned Radio Shack Computer Service Centers assure convenient service nationwide—service that's performed by employees of the same company that manufactured and sold you your computer.

Commercial Leasing. Your business may lease computer systems on a 37-month lease. And since ours is a true lease, payments may be fully tax deductible as a business expense. We can provide leasing terms to non-profit, governmental and educational organizations, too. Get complete details at any Radio Shack Computer Center.
