BIRTHDAY CELEBRATION, UNSURPASSED SALES MARKED BY TANDY 1000 PERSONAL COMPUTER

"The Tandy® 1000 personal computer is possibly the best selling IBM®-compatible personal computer in retail distribution in North America," remarked John V. Roach, CEO and chairman of Tandy Corporation. The occasion was a planning session for a huge birthday celebration for the computer, which was "born" on November 8, 1984.

In a year when many computer companies have seen only doom and gloom, Tandy officials have been cheered by the unsurpassed sales performance of the Tandy 1000 computer. Among its achievements are:

- o Selection by more than 1,200 school districts, or nearly 100 school districts a month. One large district issued more than 100 separate purchase orders for the computer, as more and more teachers selected it for their classrooms.

TANDY 1000 BIRTHDAY CELEBRATION -- ADD ONE

o Sales records which have surpassed comparable sales periods in the life of every personal computer Tandy has ever introduced. Originally sold through approximately 1,200 Radio Shack® Computer Centers and Plus Computer Centers, the Tandy 1000's sales prompted company officials to increase distribution to the entire Radio Shack Store chain -- making it the most widely-available PC-compatible computer in America, with approximately 8,000 retail outlets in the U.S., Canada and Mexico.

o Acceptance as both a solid, IBM-compatible business computer and powerful home computer. Although originally sold and designed as a business product, the affordable price and wide range of available software prompted many users to purchase the Tandy 1000 computer for home as well as office. As the Christmas buying season gets underway, a "bonus" package of a Tandy 1000 personal computer with CM-4 RGB color monitor is priced at just \$999, and Tandy is confident of even higher sales for the record-breaking computer.

o Repeat purchase statistics which show that part of the Tandy 1000 personal computer's success is due to the same customers buying additional computer as their needs increase. For example, schools which have selected the Tandy 1000 computer issue an average of three purchase orders.

Workers at Tandy's Fort Worth, Texas, plants where the Tandy 1000 personal computer is built will be honored with a party hosted by John Roach on Friday, November 8. That same day, birthday cakes will be delivered to every floor of the corporate offices. Some employees

TANDY 1000 BIRTHDAY CELEBRATION -- ADD TWO

weren't willing to wait for cake to be brought to them, however, and are already at work baking a life-size replica of the Tandy 1000 which they plan to present to Tandy executives at a reception, on the eve of the birthday celebration, November 7.

"We're excited about the future of our MS-DOS® computer family, and we're looking forward to continued success for the Tandy 1000," Roach said. "We're proud to say that a computer made right here in Texas is breaking sales records, and we think it's time to celebrate!"

Asked to account for the success of the Tandy 1000 computer, Roach cited the quality assurance and careful work by the employees responsible for the computer, and unexcelled after-the-sale support. Tandy's extensive computer customer service program was recently honored by Consumer's Digest Magazine, which made Tandy the first computer retailer inducted into the Consumer's Digest Hall of Fame.

"It's nice to know that it's still possible to break sales records in a year when the industry as a whole is undergoing widespread changes," Roach added. "But it takes teamwork, to build the best possible product and then provide superior support and service. I'm proud of the computer, but even prouder of the team of dedicated Tandy/Radio Shack employees who made it possible."
