

Orchestra-90™ CC

Stereo Music Synthesizer for the Color Computer™

THE PRODUCT

- o A unique combination of hardware and software that can transform any 16K Tandy Color Computer into a programmable music synthesizer for only \$79.95
- o Orchestra-90 CC comes with the easy-to-learn Music Language programming method that translates musical terms into a language the computer understands.
- o Connector jacks built into the Orchestra-90 cartridge connect the Color Computer to a stereo receiver to act as a stereo synthesizer.
- o Six octaves and up to five simultaneous voices are produced using two stereo channels.
- o Up to five voices are provided, each of which can be assigned to any of five instrumental choices (tone registers).
- o Files may be transmitted via optional 300-baud modem. A built-in communications package permits communication with on-line services. Orchestra-90 can be used with CompuServe to download any of the more than 200 music programs already on-line in the Color Computer Special Interest Group.
- o Existing Model I, III or IV Orchestra-90 music files may be ported to the Color Computer by uploading to CompuServe, then downloaded to the Orchestra-90 CC to be played without change.
- o Orchestra-90 CC is disk-compatible. (Disks not required).
- o Orchestra-90 CC (Cat. No. 26-3143) can be ordered from any Radio Shack Store or Radio Shack Computer Center.

SYSTEM REQUIREMENTS

- o Orchestra-90 requires:
 - o A Tandy 16K Color Computer
 - o A stereo receiver and speakers (for stereo sound) or television (for monaural sound).
- o To save compositions, a Color Computer Disk Drive or a cassette recorder is required.
- o To print a music file's contents, a Tandy serial printer and cable are needed.
- o To use the file transfer mode, a 300-baud modem and cable are needed.
