Orchestra-90™ CC Transforms

Color Computer Into a Stereo Music Synthesizer

Creating electronic music used to be the private realm of scientists and rock musicians who had access to equipment costing thousands of dollars. Now, any Color Computer™ can be turned into a programmable music synthesizer for just \$79.95 with Orchestra-90™ CC, a unique combination of hardware and software. To explore a wide world of electronic music, more than 200 music programs - from the Beatles to Bach - can be downloaded from CompuServe's Color Computer Special Interest Group.

The Orchestra-90 cartridge slips into the Program Pak™ port of the Color Computer or into one port of a Multi-Pak Interface. Connector jacks built into the Orchestra-90 cartridge connect the Color Computer to a stereo system to produce a stereo synthesizer.

Six octaves and up to five simultaneous voices are produced using two stereo channels. Up to five voices are provided, each of which can be assigned to any of five instrumental choices (tone registers).

-MORE-

Orchestra-90 CC -- ADD ONE

Files may be transmitted through an optional 300-baud modem. A built-in communications package permits communication with on-line services. Existing Model I, III, or IV Orchestra-90 music files may be ported to the Color Computer by uploading to CompuServe, then downloaded to Orchestra-90 CC to be played without change.

Orchestra-90 CC comes with the easy-to-learn Music Language programming method that translates musical terms into a language the computer understands.

A Tandy 16K Color Computer and a stereo receiver and speakers (for stereo sound) or television (for monaural sound) are required to operate Orchestra-90 CC. A color computer disk drive or a cassette recorder is required to save compositions. A Tandy serial printer and cable are needed to print a music file's contents. A 300-baud modem and cable are needed to use the file transfer mode.

Orchestra-90 CC (cat. no. 26-3143) is disk-compatible, but disks are not required. It can be purchased through any Radio Shack® Store or Radio Shack Computer Center.

Orchestra-90 and Program Pak are trademarks of Tandy Corporation. Radio Shack is a registered service mark of Tandy Corporation.
