

**Radio Shack® Educational Software
Catalog 1986**

Radio Shack's Commitment to Education

A Wide Selection of Field-Tested Programs

Radio Shack involves the experts—teachers, curriculum developers and administrators—in designing and field-testing our courseware. Compare our courseware with other programs available. You'll see what a difference a commitment to quality can make.

Meeting Classroom Computing Needs

Radio Shack's Tandy microcomputers are valuable teaching tools used in schools nationwide. We have a major commitment to support educational uses of Tandy microcomputers by producing a growing list of instructionally-sound courseware. We have developed

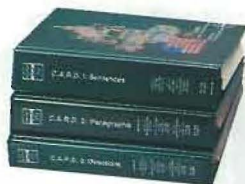

a networking system for the classroom to better utilize your computer resources and make your program more cost-effective and efficient. We provide help and support with our free training classes, user-friendly manuals, and a staff of 20 Regional Educational Coordinators and more than 100 Education Specialists.

Radio Shack Classroom Courseware

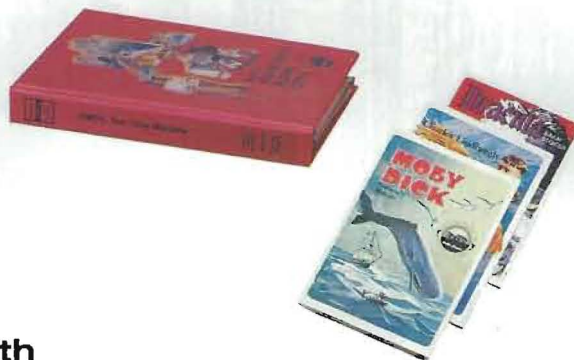

Learning is Fun With Our Electronic Book

The Color Computer Electronic Book (26-3141, \$24.95) allows children to interact with the computer by pressing the book's touch-sensitive surface. Six programs are available for use with the Electronic Book. Each includes software and colorful pages which are to be inserted into the Electronic Book. Requires 16K. Programs available include: **Professor Press-note's Music Machine** (26-2573, \$24.95), **Solar Explorer** (26-2546, \$19.95), **Word Wizard** (26-2544, \$19.95), **Shape Maker** (26-2542, \$19.95), **Maze Master** (26-2541, \$19.95) and **The Number Factory** (26-2543, \$19.95).

Computer Assisted Reading Development

Adapted from the successful Philadelphia Computer Assisted Reading Development Program, the C.A.R.D. series helps students in grades four through eight develop reading skills. Choose from **C.A.R.D. I: Sentences** (*26-2603, \$199), **C.A.R.D. II: Paragraphs** (*26-2604, \$199) or **C.A.R.D. III: Directions** (*26-2605, \$199.00). Requires on disk-based Model III, Model 4 or Network 3 and the appropriate AUTHOR I Presentation Package.

High Motivation Reading Series

The programs in our **High Motivation Reading Series** are written for grade levels 4-6. Each program in the series comes with four student readers and a read-along audio cassette tape. These computer programs are designed to measure reading comprehension. Require a Model III or Model 4 disk system and MicroPILOT™ (26-2718).

Select **Charles Lindbergh/Amelia Earhart** (*26-2513, \$74.95), **The Hound of the Baskervilles** (*26-2514, \$69.95), **Dracula** (*26-2515, \$69.95), **Moby Dick** (*26-2516, \$69.95), **The Beatles** (*26-2517, \$69.95), **20,000 Leagues Under the Sea** (*26-2518, \$69.95), **Time Machine** (*26-2519, \$59.95), **Frankenstein** (*26-2520, \$59.95), and **HMRS Student Records System** (26-2521, \$29.95).

Introduction to the Alphabet (*26-1718, \$39.95), is a skill-building drill that helps 4 to 6 year-olds learn the alphabet, capital and small letters, and the locations of the letters on the computer keyboard. Available on cassette and disk for Model III or 4.

Hall of the Mountain King (*26-2616, \$39.95). Classroom version lets students answer any multiple-choice quiz in this action game. Player battles through a maze to rescue a princess held prisoner. Requires Model III, or Model 4 disk system or 16K with cassette. Network 2 compatible.

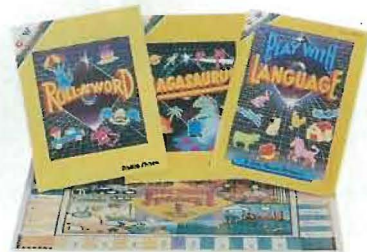

Courseware from MECC

Programs were developed by the Minnesota Educational Computing Corporation. Many include a manual containing learning objectives, lesson plans, student exercises and worksheets. Choose **Basic Arithmetic** (26-2790, \$44.95), **Word Games** (26-2791, \$44.95), **Expeditions** (26-2792, \$44.95), **Puzzles and Posters** (26-2793, \$44.95), **Graphing** (26-2794, \$34.95), **Music** (26-2795, \$34.95), **Pre-Reading** (26-2796, \$34.95), **Earth Science** (26-2797, \$34.95), **Marketplace** (26-2798, \$34.95) and **Outdoor Biology** (26-2799, \$34.95). Programs 26-2790 through 26-2793 require a 48K Model III or Model 4 disk system. Programs 26-2794 through 26-2799 require a 32K Extended BASIC Color Computer.

Children's Television Workshop Software

Designed by the CTW Software Group, a division of Children's Television Workshop, for use with first and second graders. Requires a Color Computer disk system and includes diskettes, teacher's guide and other material.

Play-With-Language™ (26-2538, \$99) consists of three word and reading activities to teach sight and vocabulary words, decoding and comprehension skills. **Hands On!™** (26-2539, \$99) lets students write with beginning word processing aids and create pictures in ways unique to computer art.

Colorful Programming Languages

Super Color LOGO helps students develop problem-solving skills while learning to program a computer. Creating graphics on the screen using an easily controlled symbol called a turtle, students gain insight into fundamental mathematical, geometric and logical concepts. Children under reading age can use Super Color LOGO's "doodle" mode to

create their own graphics using one-key commands. Older students use Super Color LOGO features like a "hatch" command which allows creation of multiple turtles that are capable of running separate programs simultaneously. Super Color LOGO includes list processing capabilities, decimal arithmetic, advanced editing and more. Other features let you control the turtle speed, change screen colors and create animation. Procedures written with Super Color LOGO may be uploaded or downloaded with a Network 2. **Disk Super Color LOGO** (26-2716, \$99) requires a 32K Extended BASIC Color Computer and disk drive. The **Program Pak Super Color LOGO** (26-2717, \$49.95) requires a Standard BASIC Color Computer. Use

your own TV with either. **Super Color LOGO Network 2** (26-2738, \$299) requires a 32K Color Computer host, 32K student stations and Network 2 Controller.

Color LOGO Teacher's Book (26-2761, \$3.95). Instructional ideas and activities for presenting LOGO in the classroom.

Color LOGO Parent's Book (26-2763, \$3.95). Parents and kids learn LOGO together.

Color LOGO Lab (26-2770, \$199.00). Includes comprehensive teacher's manual, transparencies and 25 workbooks. The Lab may be used with or without a Network 2 system. Requires Super Color LOGO disk (26-2716) or Program Pak (26-2717). Color LOGO Lab Workbook (26-2771) available for \$2.00 each.

Courseware Development Made Easy

Our authoring systems make it easy to create courseware. No programming knowledge is required. Each program requires a Model III or Model 4 disk system.

AUTHOR I (26-1727, \$149.95) is a screen-oriented authoring system. Sample lesson included.

AUTHOR I Lesson Presentation Package (26-2707, \$64.95) presents lessons created using AUTHOR I. (Not required if you have AUTHOR I).

Courseware Development with AUTHOR I (26-2697, \$350) is a

training course designed to help educators use AUTHOR I. Educators are guided through actual lesson creation using text, graphics and special characters.

Courseware Development Student Manual (26-2698, \$4.95).

Network 3 AUTHOR I Lesson Presentation Package (26-2713, \$299) allows the Network 3 Controller to present lessons created with AUTHOR I. Requires host computer with two disk drives.

MicroPILOT™ (26-2718, \$119.95) is a command-oriented language that lets you create your courseware or adapt it from any curriculum suitable for computer assisted instruction. Based on the PILOT computer language, it also offers extended graphics and handling capabilities. Requires a Model III or Model 4 disk system.

Color PILOT lets you mix text and graphics. It features a line editor and easy one-letter commands.

Disk Color PILOT (26-2710, \$79.95) requires an Extended BASIC Color Computer with disk drive. **Tape Color PILOT** (26-2709, \$59.95) requires a Standard BASIC Color Computer. Use your own TV with either.

Quick Quiz: A Mini-Authoring System (26-1728, \$39.95) makes it easy to create, store, and give multiple-choice tests. Requires a Model III or Model 4 disk system.

Game Writer (26-2572, \$44.95) is a unique programming language for creating programs that draw pictures, produce sounds and make shapes move about the screen. Requires a 32K Color Computer disk system.

Educational Resource Materials

The fourth edition of our **Tandy Educational Software Sourcebook** (26-2747, \$9.95) is a complete guide for educational courseware for Tandy computers. It contains 2500 vendor-furnished listings of programs classified under 14 subject areas. Each listing gives program content, grade

level, instructional technique used and hardware required. Many contain user-site references. Also includes publisher profiles.

My TRS-80 Likes Me (26-2751, \$2.50) is a teacher's guide to helping elementary students understand BASIC.

The **TRS-80 Microcomputer Information Handbook for Educators** (26-2757, \$2.50) describes what microcomputers

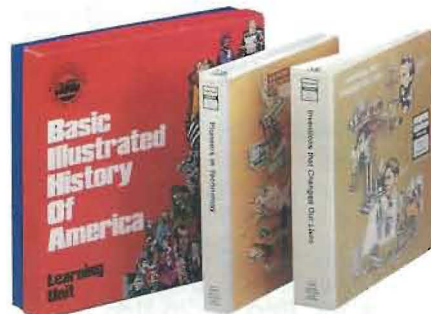

and courseware are and how they can be used.

Radio Shack's Proposal Writing Guide (26-2754, \$9.95) is a guide for educators who want to write proposals for funding from an outside source for computer-related education projects.

Number Patterns (26-2752, \$2.50) is a 36-page booklet that shows how to introduce sequences and series in an entertaining way using computers.

History and Social Studies Courseware

Basic Illustrated History of America Learning Unit (26-2645, \$299) includes twelve illustrated books on American history—from 1500 to the 1980's. Uses Model III, 4 or Network 3 and AUTHOR I software. Our two **History of Technology** packages use colorful graphics, text, sound effects and recorded speech. They require 16K Color Computer, TV and cassette recorder.

Pioneers in Technology (26-2624, \$94.95) includes The Age of Flight, Space Exploration, and History of Computers. **Inventions That Changed Our Lives** (26-2625, \$94.95) includes Edison's Electric Inventions, Bell and the Telephone, and The Age of Television. **The Next Four Years: Electing the President** (26-2664, \$19.95). Study of the American election process. A 32K Model III is required.

Math and Science Courseware

K-8 Math Series of programs supplements regular classroom math instruction in kindergarten through eighth grades. Include summaries and a K-8 Math Cross-Reference

The **K-8 Math Program, Vol. I** (*26-1715, \$199) provides drill-and-practice problems in arithmetic and number concepts. A Model III or 4 cassette or disk system is required.

K-8 Math with Student Management, Vol. I (*26-1725, \$199) combines the K-8 program with a student management capability. A Model III or Model 4 disk system is required. Printer is optional.

Color Math (26-3202, \$39.95) provides practice at the student's skill level. A 32K disk or 16K cassette Color Computer system is required. Network 2 compatible.

K-8 Math Worksheet Generator (26-2162, \$99.95) prints worksheets and answer sheets based on K-8 Math lessons. A Model III or 4 disk system and line printer are required.

Secondary Math and Science

Our **Essential Math** programs are drills for grades 7-12. **Essential Math, Vol. I** (Model III/4 26-1716, \$199; **Color Essential Math** 26-2643, \$120) includes exercises in addition, subtraction, multiplication, division, and more. **Essential Math,**

Vol. II (Model III/4 26-1719, \$199) covers fractions, decimals and percents, and pre-algebra concepts.

Euclid Geometry Tutor (*26-1724, \$39.95) lets students practice constructing proofs using nine basic postulates.

Advanced Graphics (*26-1714, \$39.95) analyzes equations and plots graphs of functions and polar and parametric equations.

Vector Addition (*26-1720, \$39.95) illustrates and plots components and sums of student-provided vectors. **Vector Addition for the Color Computer** (26-2638, \$39.95) requires Extended BASIC and is available on cassette or disk.

Interpreting Graphs in Physics: Position and Velocity vs. Time (*26-1721, \$39.95) generates graph-related questions.

Graphical Analysis of Experimental Data (*26-1722, \$39.95) plots data pairs that the student inputs.

Plane Analytic Geometry (*26-2602, \$39.95) generates problems on straight lines and conic sections.

Investigations in Integral Calculus (*26-2600, \$39.95) graphs and computes areas of functions. **Investigations in Integral Calculus for the Color Computer** (26-2641, \$39.95) requires Extended BASIC and is

available on cassette or disk.

Number Theory (*26-2613, \$69.95) provides explanations, examples and exercises on number theory concepts.

Matrices, Determinants, and Simultaneous Equations (*26-2620, \$49.95) generates problems related to simple matrix algebra.

Quadratic Equations (*26-2623, \$49.95) covers coefficient recognition, discriminant evaluation, and more.

Not including Color Computer programs, the above are available on cassette and disk for Model III and Model 4.

The Solar System: Featuring the Discovery of the Planet Pluto (26-2647, \$59.95) combines graphics and recorded speech to present information about the planets. A 16K Color Computer, TV and cassette recorder are required.

Chemistry Lab uses graphics and equations to simulate chemical reactions. Students control variables.

Chemistry Lab, Vol. I provides six simulations for Model III and Model 4 (*26-2609, \$199), and for Color Computer cassette system with Extended BASIC (26-2626, \$199). **Additional Student Experiment Books** (26-2666, \$3 each) are available.

Train Students for the Business World

Business Education: Computer Applications in Small Business (26-2654, \$599.00). Designed to supplement business accounting curriculum, the package includes visual materials, student workbooks and four business program: General Ledger, Accounts Receivable, Accounts Payable and Payroll. The course is based on a field-tested, structured teaching model. The instruction manual and student workbooks parallel each other in content,

form and wording. Requires a 48K Model III or a 64K Model 4 with 2 disk drives. Printer is required. **Additional Student Manuals** (26-2655, \$11.95 each).

The **Corplan™** business simulation program (*26-2619, \$49.95) gives instructors an effective way to demonstrate the many facets of business management. Corplan realistically simulates how a company operates. Requires no previous knowledge of

computer operation or business programs. Requires a 48K Model III or a Model 4 disk system. Produce charts and screen reports with an optional printer.

Numeric Data Entry Practice (*26-2601, \$39.95) is 25 lessons to help students develop speed and accuracy in entry of numeric data using the computer's 10-key pad. Requires a 32K Model III or Model 4 disk system. Printer optional.

*Network 3 Compatible

Classroom Network Systems

A Radio Shack **Network** lets you implement a shared learning system—connecting non-disk student stations to the teacher's disk, or "host" computer. Students can access programs with low-cost, non-disk Tandy computers. The teacher can send programs to the student computers, and their work can be saved on the teacher's diskettes. An optional line printer attached to the host computer lets students get printouts of their programs. Your computer lab requires less duplicate courseware because several students share the same software. We also offer a variety of Network systems to meet your particular needs.

The **Network 4 Shared Learning System** adds flexibility and economy to your computer lab or classroom. Using a twisted-pair cable, you connect as many as 63 upgraded Model III or 4 student stations to a host computer with a hard disk drive. The student stations can then share hard disk files, each station operating virtually as a stand-alone system. Each user can quickly access a set of teacher-designated programs and data files from the hard disk. Each station in the system can support a printer. The Network 4 system requires a disk or non-disk Model 4 that has been upgraded with a Master Upgrade Kit (26-1136, \$299.95, plus installation); a 15 or 35-megabyte hard disk drive (depending on your storage requirements); and the

Network 4 Operating Software (26-2773, \$230.00). Network 4 uses 64K Model 4 student station(s) (26-1058, \$1099) or any Model III or Model 4 computer can be upgraded for use as a station with the Student Station Upgrade Kit (26-1137, \$299.95, plus installation). Operation of more than 32 stations in the system requires the addition of a line amplifier, called an Active Junction Box (26-1225, \$299.95). All network stations connect to one "trunk cable." Spools of trunk cable are available in the following lengths: 100 feet (26-1218, \$16.95), 500 feet (26-1214, \$69.95) and 1000 feet (26-1215, \$119.95). The Network 4 System can use many software packages designed for the Model III and Model 4 computers, and utilizes a network version of TRSDOS 1.3 and Disk BASIC. Plus, boards and operating systems are under development for the Color Computer (under OS-9) and the Tandy 1000 Computer (under MS-DOS 2.x). Any of these computers can be networked together in the same system.

Contact your Regional Educational Coordinator for more information, or ask your store for the Network 4 brochure (FC-0615).

The **Network 3 Controller** (26-1212, \$599) enables up to 16 non-disk Model III or Model 4 student workstations (with RS-232C interfaces) to select and access lessons stored on the teacher's Model III or Model 4 disk system.

Network 3 is designed for use with the educational software packages indicated in this catalog by an asterisk (*). Connecting cables available separately. Requires **Network 3 Operating Software** (26-2775, \$149), or **Network 3 Hard Disk Operating Software** (26-2778, \$149).

Radio Shack's **Network 2 Controller** (26-1211, \$499) enables up to 16 non-disk student stations to be connected to the teacher's host computer using the cassette ports. The Network 2 Controller can be used with a Model III or Model 4 disk and non-disk computers; with Color Computer disk and non-disk systems; or with the Model 100 computer. Controllers can be cascaded to connect more stations. All cables are included.

Education Management Systems

School Administrative Software Series

This interactive system helps schools collect, store, retrieve and print basic student information, attendance data, grades and scheduling information. Each program requires a Model 12, Model 16 or Tandy 6000 with two floppy disk drives (or one floppy drive and hard disk), or a Model II with one floppy drive and hard disk. A line printer is required to produce reports. All packages except the Student Information System require a Radio Shack CR-510 Card Reader plus the Student Information System.

Student Information System (26-2729, \$249). Construct a list of student profiles from student population, based on your unique needs.

Attendance System (26-2730, \$330). Takes attendance on period-by-period or daily basis and calculates monthly statistics.

Grade Reporting System (26-2731, \$380).

Scheduling System (26-2732, \$290).

CR-510 Card Reader

Automate data compilation, evaluate surveys and polls, or correct multiple-choice tests with the CR-510 Card Reader (26-1266, \$1595). It provides single, demand, or continuous-feed operation; reads marked or punched cards; and is controlled through manual switches or software. The CR-510 includes owner's manual, diagnostic test card, 200 cards, and a diskette with COBOL and BASIC driver routines. Requires a Tandy computer with RS-232C port. Cables available separately.

General Purpose Standard Cards. 40-column with timing marks. Package of 500 cards. (26-1241, \$9.95).

Radio Shack's Computer Education Series

These packages are complete teaching packages for secondary and post-secondary levels that include overhead transparencies, a teacher's manual and 25 student workbooks with note-taking guide, quizzes, and hands-on activities.

NEW! Personal Computer Applications: Part 1 (26-2590, \$500) introduces the microcomputer, word processing applications, and database applications. The course is based on the Tandy 1000 and DeskMate. Data diskette included for use with DeskMate. **Additional Student Workbooks for Part 1** (26-2591, \$4.95 each) are available.

Part 1: Introduction to BASIC (26-2150, \$220) introduces students to the computer and BASIC. **Additional Student Workbooks for Part 1** (26-2151, \$3.50 each) are available.

Part 1: Videotape Lessons (26-2753, \$349) is a series of ten 30-minute lessons based on Part 1: Introduction to BASIC. Requires the Part 1 student workbook.

Introduction to Color BASIC (26-2680, \$350). **Additional Student Workbooks** (26-2681, \$5.95 each).

Part 2: BASIC Programming (26-2152, \$260). **Additional Student Workbooks for Part 2** (26-2153, \$4.50 each).

Part 3: Advanced BASIC (26-2154, \$260). **Additional Student Workbooks for Part 3** (26-2155, \$4.50 each) are available.

Part 4: TRSDOS (26-2156, \$299) covers TRSDOS operating system. **Additional Student Workbooks for Part 4** (26-2157, \$4.50 each).

Introduction to Level II BASIC (26-2116, \$9.95) is a beginning BASIC textbook for secondary students.

NOTE: Software not included in the above series. Student activities are designed for hands-on experience with Level II or Model III BASIC (or TRSDOS in Part 4).

Learn Machine Language

The **Illustrated Computer** (26-2670, \$44.95) introduces secondary students to machine language programming concepts using simplified machine language. Requires 32K Extended BASIC Color Computer with disk drive.

Network Pascal (26-2739, \$799) is a version of TRS-80 Pascal (26-2211) designed for use with Model III/4 and Network 3 in a classroom environment.

Additional Student Manuals (26-2740, \$14.95 each).

Introduction to Pascal (26-2674, \$350) is a complete, structured teaching package with teacher's manual, overhead transparencies and 25 student workbooks.

Additional Student Workbooks (26-2675, \$7.95 each).

COBOL Instruction. Model III 26-2702 \$64.95. Model II 26-2706 \$49.95.

Computer Literacy Packages

Computer Discovery™ for Junior High (26-2630, \$189.95) requires a

Model III or Model 4 disk system. **Additional Workbooks** (26-2631, \$4.25 each). **Computer Discovery for Senior High** (26-2632, \$189.95) requires a Model III or Model 4 disk system. **Additional Workbooks** (26-2636, \$4.25 each).

Careers in Computing with AV materials (26-2758, \$130).

The **Computer Connection** (26-2663, \$69) introduces basics of computer literacy to junior and senior high school students.

Superior Systems for Your Classrooms

We offer educators a variety of special services. Our National Bid Department gives prompt attention to school bids. Tandy Computer Leasing can put the Tandy microcomputer systems into your classroom with terms that meet almost any budget. We offer "carry-in" and "on-site" service plans, too. And as an educator, you may attend our classes for educators without charge.

Radio Shack gives you complete support. We have 20 Regional Educational Coordinators located across the country. They can conduct demonstrations, workshops, and in-service training sessions for your school district. And our Regional Educational Coordinators can assist you in selecting the computer system and courseware that best suit your classroom needs.

For the name of the full-time Regional Educational Coordinator in your area, call our Education Division at 800-433-5682, toll free. In Texas, call 800-772-8538.
