

TANDY® 3000 HL

Compatible With the IBM® PC/XT,
Plus Four Times the Performance!

The Building Block of Today's Business Systems

If you've already invested in IBM PC/XT software and hardware, and plan to expand your business system, then take a look at the Tandy 3000 HL (25-4070).

Get four times the Performance of the IBM® PC/XT

The Tandy 3000 HL was designed to accomplish two goals. First, it was engineered to be fully compatible with the XT. And second, it was engineered to outperform the XT. We made it faster and gave it ample memory to run the software you've grown accustomed to—and that's just what your business needs.

Because the Tandy 3000 HL uses the industry-standard MS-DOS® operating system, you can run the hottest names in software—all readily available off-the-shelf. Choose from advanced word-processing packages and heavy-duty database management to accounting software.

Because we know your business can grow quickly, we made sure the Tandy 3000 HL has the expansion capability you'll need to meet future business management requirements. We also realize that time spent composing memos, tracking meetings and writing reports is a costly expense. That's why we made the Tandy 3000 HL network compatible with all MS-DOS computers.

Network Ready

With the Tandy ViaNet local area network, you can connect your existing MS-DOS-based computers to the Tandy 3000 HL and communicate with your staff in an expedient, time-efficient manner. Users and departments are able to work together more effectively than ever before. Send memos, accounting reports and other important messages via computers, eliminating lost memos, forgotten meetings or incomplete reports. ViaNet can use any mix of MS-DOS computers. Computer power can be physically located where it's needed, so ViaNet reduces the duplication of computer resources.

For XT compatibility with more power and versatility, at a much lower cost, this is the computer your business needs.

The Tandy 3000 HL: Business Power, Speed and Dependability

In today's business world, if you want to compete, you have to have a reliable business computer system. One that will keep up with your company's expanding needs without compromising power. The Tandy 3000 HL was designed with just that intent.

Designed With Your Requirements in Mind

The Tandy 3000 HL was primarily engineered as an IBM® PC/XT compatible—then we improved upon it. First, we made it faster. With an 80286 processor, it's more than four times faster than the XT. Also, the Tandy 3000 HL comes with 512K memory and can be expanded to 4 megabytes using the built-in expansion slots.

Expansion Capability

For storage, the Tandy 3000 HL is equipped with a thin-line, 5¹/₄" floppy disk drive that can read 360K formats. You can expand to include two floppy disk drives and a hard disk, or one floppy and two internal hard disk drives. The total capacity of the 3000 HL can exceed 40 megabytes. The keyboard features 84 sculptured keys and includes a numeric entry keypad. The Tandy 3000 HL can expand internally with seven plug-in card slots, as well as four PC/XT compatible slots. An optional 80287 Math Co-

Processor can be added for high-speed numerical operations.

The Tandy 3000 HL features a built-in real-time clock with battery backup for automatic posting of jobs, process control and other time-sensitive applications. A standard parallel printer port connection is included as well.

SPECIFICATIONS

Microprocessor: Intel 80286 processor with 16-bit data path. Switchable clock speed, 4/8 MHz. Object code compatible with 8086/8088. Real-time clock with battery backup.

Operating System: Optional Microsoft® MS-DOS 3.2 with BASIC.

Memory: 512K RAM with parity. By using the expansion slots, memory is expandable to 4 megabytes. Includes powerup diagnostics. Sound included.

Keyboard: 84-key sculptured, including numeric entry keypad. Special keys include ESCape, Num Lock, Alt, Ctrl, Caps Lock, Prt Sc, Sys Reg, Scroll Lock, Up, Down, Right and Left arrows. Ten programmable Special-Function Keys. Retractable legs, 6-ft coiled cable.

Video Display: Optional high-resolution, non-glare, non-interlaced 12" monochrome (green) or 14" color monitor. 80 or 40 characters per line by 25

lines. Optional high-resolution 80 characters by 50 lines, 640 × 200 graphics and 320 × 200 graphics in 16 colors, or 640 × 200 graphics in 4 colors.

Disk Drives: Built-in thin-line 5¹/₄" floppy can read 360K formats. Disk storage is expandable to include two floppy disk drives and one hard disk drive, or one floppy disk and two internal hard disk drives. Total internal storage capacity can exceed 40 megabytes.

Internal Expansion: Seven plug-in card slots, including three 16-bit slots and four PC/XT-compatible slots. Optional 80287 Math Co-Processor can be added.

External Connections: Standard parallel printer port.

Dimensions: 6¹/₈ × 17 × 15¹/₂".

Weight: 32 pounds.

Power Requirements: 120VAC, 60 HZ. UL listed.

Accessories For the Tandy 3000 HL Make Your System "The" System

We've got the monitor that's right for your business! Choose either the CM-1 Color Monitor (26-5112) with 14" screen for 80×25 text and 640×400 color graphics, or the VM-1 Monochrome Monitor (26-5111) with 12" screen for 80×25 text and 640×400 graphics.

Other video display options include our Deluxe Text Display Adapter (25-3046), which lets you display text on the VM-1 Monochrome or CM-1 Color Monitors, and the Deluxe Graphics Display Adapter (25-3047) that allows your Tandy 3000 to display high-resolution graphics (using the monitors above).

The 80287 Math Co-Processor (25-4033) lets you perform one set of functions while simultaneously performing sophisticated mathematical functions.

The Memory Expansion Kit (25-4030) comes with one megabyte of memory. It can be expanded with 256K Parity Memory Kits (25-3062) to provide a

maximum of two megabytes of memory. The Serial Parallel Adapter (25-4034) lets you connect a second printer or add a modem.

These days a reliable data communication system is a must. Our 300-Baud PC Modem Board (25-1003) is easy to install and is entirely controlled by your keyboard entries or software. And the 300-Baud Modem Board doesn't take up valuable workspace—it fits right inside your Tandy 3000 HL. The 300-Baud Modem Board features originate/answer modes and auto/answer dial. And it works with single-line or multi-line telephones.

Our 1200-Baud PC Modem (25-1013) is a high-speed auto-dial/auto-answer modem for your Tandy 3000 HL that features powerful automatic dialer commands. It's compatible with virtually all communications software—including Hayes®. Cut on-line time with faster transmission of your data.

Increase the Efficiency of Your 3000 HL With These Expansion Options

Now you can get a reliable hard-disk backup on tape! In fact, with our TCS-100 Tape Cartridge System (25-3020) you can back up 10 megabytes in as little as 6 minutes. The TCS-100 uses standard $\frac{1}{4}$ " cartridges (one included) for over 48 megabytes of archival storage and features a powerful file-by-file backup/restore function. You can select single files, groups of files or all files. Selection of files is based on globals, wild cards, files modified since last backup, file creation data, directory structure and more. Three heads—read, write and erase—provide one-pass backup with immediate read-after-write verification. Requires Interface Kit.

As an external data storage device, our Disk Cartridge System is hard to beat. The Disk Cartridge System provides speed, reliability, expandability, security and data transportability—because the cartridges are removable. The cartridges are designed

to store either ten or twenty megabytes. You can store an unlimited amount of data just by adding more cartridges. The Disk Cartridge System is available with two twenty-megabyte drives (25-4066) or with one ten-megabyte drive (26-1245). Either model is also an easy way to back up your conventional hard-disk system. Requires Interface Kit.

Other expansion options include the 1.2 Megabyte Floppy Disk Kit (25-4050) and the 360K Floppy Disk Kit (25-4051). The Hard Disk Controller (25-4060) lets you add a 20-megabyte hard disk.

To add an enormous amount of internal storage capability to the Tandy 3000, choose a 20-Megabyte (25-4062) or 40-Megabyte (25-4061) Hard Disk Kit. The 20-Megabyte Hard Disk Card (25-1029) lets you get 20 megabytes of hard disk storage on a user-installable card.

Tandy Computers are Backed With Total Support

Professional Training. Radio Shack's training and support is unequalled in the industry. You can select from a variety of courses taught at over 60 Computer Centers across the country. Or choose on-site instruction available through Customer Training and Support Centers in 60 major metropolitan areas.

Nationwide Service. 188 strategically located company-owned Radio Shack Computer Service Centers assure convenient service nationwide—performed by employees of the same company that manufactured and sold you your computer. We back the products we sell.

Customer Support. Radio Shack provides more support operations at less cost (much of it free of charge, in fact) than any other microcomputer company. Our support specialists are your "on-demand" experts, and can be reached by telephone hotline at 60 nationwide support operations centers.

Commercial Leasing. Your business may lease computer systems on a 37-month lease. Payments may be fully tax deductible since ours is a true lease. Leasing terms are also available for non-profit, governmental and educational organizations, too. Get details at any Radio Shack Computer Center.

Available at over 1200
Radio Shack Computer Centers and at
participating Radio Shack stores and dealers.
