

Manufacturer: Tandy Corporation
Computer tested: Tandy 3000 HL - 512 KB, 360 KB diskette, 20 MB disk, Dual Display Graphics Adapter
Operating System: MS-DOS version 3.20 - Tandy Version 03.20.00
BASIC Interpreter: GW-BASIC version 3.20 - Tandy Version 03.20.00
Test date: July, 1986

Future Computing's testing of personal computers includes a determination of whether or not a given computer will run selected top-selling software packages intended for PC-Compatible machines. One of the criteria for a computer to be rated operationally compatible is that it runs such software.

Future Computing has rated the system tested as being operationally compatible with the IBM PC AT. The above computer and operating system combination has been tested with the following software.

Programs that run include:

- | | | | |
|------------------------------|--------------------------------------|--|-------------------------------|
| • 1-2-3 release 1A | • Decathlon version 1.00 | • PFS:FILE version B:01 | • Smartcom II version 2.1 |
| • 1-2-3 release 2.0 | • Flight Simulator version 2.0 | • PFS:GRAPH version B:01 | • SuperKey version 1.11A |
| • Adventure version 1.0 | • *Framework version 1.1 | • PFS:PLAN version A:00 | • Symphony version 1.0 |
| • AutoCAD version 2.17k | • Framework II version 1.0 | • PFS:REPORT version B:01 | • Symphony version 1.1 |
| • CHART version 2.0 | • IBM PC Network Program version 1.0 | • PFS:WRITE version B:00 | • Think Tank version 2.1 |
| • Crosstalk-XVI version 3.60 | • MS-ACCESS version 1.01 | • R:base 4000 version 1.1 (diskette based only) | • TKISolver version TK-1(2J) |
| • dBASE II version 2.43 | • MSKERMIT version 2.27 | • R:base 5000 version 1.01 | • Turbo Pascal version 3.01A |
| • *dBASE III version 1.1 | • MultiMate version 3.30 | • RBBS CPC12.5B (compiled and interpreted BASIC) | • WORD version 2.0 |
| • dBASE III PLUS version 1.0 | • Multiplan version 2.0 | • Reflex release 1.0 | • WordPerfect version 4.1 |
| • Fido version 11 | • PC-TALK III | • SideKick version 1.56A | • WordStar release 3.30 |
| | • PFS:ACCESS version C:00 | | • WordStar 2000+ release 1.01 |
| | | | • Zork I release 88 |

* tested releases of dBASE III version 1.1 and Framework version 1.1 ran only from diskette and at 4 MHz operating speed - they could not be installed on fixed disk

The following IBM PC program could not be tested:

- IBM XENIX version 1.0 (could not be installed by 360 Kbyte diskette drive)

Future Computing makes no representation that it tested every possible factor relating to the computer's ability to operate with the named software. The software itself was not tested for bugs, errors in operation, or results of operation. Future Computing has performed the above tests at the request of and for the sole benefit of Tandy Corporation.
