

TANDY® 3000

The Tandy 3000 Personal Computer has the power to manage your business, network computers or create a multiuser system...placing you in command.

Our Most Powerful Computer Ever! Unmatched in Performance!

Personal computers have changed the way businesses operate, making individuals, as well as departments, more productive. Yet as productivity increases, so do the demands on a company's computer resources. Most systems are eventually stretched to the limit. That's why we designed the Tandy 3000 (25-4001). It has the power to tackle a multitude of data-intensive jobs with ease, and in record time. And it has the power to share with others in your office.

Designed for High Performance

The Tandy 3000 (25-4001) comes with an Intel 80286 microprocessor for the ultimate in speed and performance. Its 16-bit architecture operates at 8 megahertz—that's twice the speed of the industry standard. It features 512K main memory and a high-capacity 5¹/₄" slim-line floppy disk drive. For the utmost in compatibility, this drive can read 1.2-megabyte and 360K formats for use with either IBM® PC/AT or IBM PC diskettes.

The "Mainframe" Micro

The 3000 HD comes with a built-in hard disk drive for fast access to volumes of important data. For maximum storage capacity, choose either the 512K Tandy 3000 HD (25-4010) with a 20-megabyte hard disk, or the 640K Tandy 3000 HD (25-4011) with a 40-megabyte hard disk.

All versions of the Tandy 3000 feature a built-in real-time clock with battery backup for automatic posting of all jobs, process control and other time-sensitive applications. A serial/parallel adapter is standard, making the Tandy 3000 ready to interface with such peripheral devices as telephone modems, printers and precision plotters.

The Ultimate Productivity Tool

The Tandy 3000 represents the next level of sophistication in microcomputer performance. Indeed, because of its power, its multiuser and networking capabilities, the Tandy 3000 is a personal computer that can put you in command of your business.

More to the point, if you consider yourself or your business an overachiever, the Tandy 3000 can help you achieve even more.

Tandy 3000 Delivers the Most in Versatility and Expandability

Unmatched Compatibility Gives You the Best Choice in Software

The Tandy 3000 is designed to be fully compatible with the most popular personal computers on the market. The 3000 uses the latest MS-DOS 3.2 operating system (optional), and is compatible with IBM PC, PC/XT and PC/AT software and most software for the Tandy 1000 and 1200. This gives you an unprecedented choice in everything from advanced word processing packages to database management and accounting software.

In addition, the Tandy 3000 uses the same hardware boards designed for the IBM PC which are available from leading vendors. But when it comes to versatility, compatibility is just part of the story.

Multitasking, Multiuser Capacity

The Tandy 3000 is designed to use the forthcoming XENIX 5.0 multiuser operating system. In a typical multiuser office configuration, up to five users with low-cost display terminals will be able to tap the power of the Tandy 3000's high-performance Intel 80286 microprocessor.

Thanks to its high processing speed, two to six users throughout an office will be able to use the Tandy 3000 simultaneously. Each user can work independently on such projects as accounting, word processing and electronic filing. All of the system's users can share the Tandy 3000's accessories, eliminating the need for a printer or modem at each workstation. Thus, each remote user has all the power of a fully configured computer system for the price of a terminal. And for maximum effectiveness, the 40-megabyte Tandy 3000 HD is the ideal multiuser computer for your office or department.

Network Readiness

In offices already equipped with MS-DOS computers, the Tandy 3000 is the link that brings all of them together. Using our ViaNet local area network (LAN), resources can be shared.

Because of the Tandy 3000 HD's massive storage capacity, speed and compatibility, it's the perfect computer to link with less powerful cpu's. Groups of

TANDY 3000/IBM® PC/AT COMPARISON		
FEATURES	TANDY 3000 40 MB HD	IBM AT 319/339
Microprocessor	80280	80286
Clock Speed	8 MHz	8 MHz
Standard Memory	640 KB	512 KB

Parallel Port	Included	Included

computers and peripherals can be organized into "clusters", each with a Tandy 3000 HD as its main "server". The clusters, are linked together in ViaNet's unique peer-to-peer relationship.

Remarkable Expandability

The Tandy 3000 is equipped with ten expansion slots, including seven PC/AT-compatible slots, two PC/XT-compatible slots and a PC/XT-compatible half-slot for the serial/parallel adapter.

By using the expansion slots, you can expand the main memory to 12 megabytes (under XENIX). Disk storage is expandable to include two floppy disk drives and one hard disk drive, or one floppy disk and two internal hard disk drives.

When outfitted with the optional 80287 math co-processor, the Tandy 3000 increases the processing speed of complex numerical calculations. It is the ideal configuration for engineering, scientific, statistical and other math-intensive applications.

Specifications

Microprocessor: Intel 80286 processor with 16-bit data path. Clock speed, 8 MHz. Object code compatible with 8086/8088. Real-time clock with battery backup.

Operating System: Optional Microsoft MS-DOS 3.2 with BASIC.

Memory: Tandy 3000 (25-4001) and the 20-meg Tandy 3000 HD (25-4010) have 512K RAM standard, expandable to 640K on the main board and to 12 megabytes under XENIX. The 40-megabyte Tandy 3000 HD (25-4011) has 640K standard and is expandable to 12 megabytes under XENIX.

Keyboard: 84-key sculptured, including numeric-entry keypad. Special keys include HOLD, ESCape, BREAK, CTRL, CAPS, INSERT, DELETE, HOME, Up, Down, Right and Left arrows. Ten programmable Special-Function keys. Retractable legs, 6-ft. coiled cable.

Video Display: Optional high-resolution, non-glare, non-interlaced 12" monochrome (green) or 14" color monitor. 80 or 40 characters per line by

25 or 50 lines. Optional high-resolution 640 × 400 monochrome graphics or 320 × 200 graphics in 16 colors, or 640 × 400 graphics in 4 colors.

Disk Drives: Built-in high-density thin-line 5¹/₄" floppy can read 1.2 Mb and 360K formats. Tandy 3000 HD also has built-in 20 and 40-megabyte hard disk drive. Disk storage is expandable to include two floppy disk drives and one hard disk drive, or one floppy disk drive and two internal hard disk drives. Total external storage capacity can exceed 40 meg.

Internal Expansion: 10 plug-in card slots, including 7 PC/AT-compatible slots, 2 PC/XT-compatible slots and 1 PC/XT-compatible half-slot for the serial/parallel adapter. Optional 80287 math co-processor can be added.

External Connections: Standard parallel printer port, RS-232C serial communications port, AC outlet.

Dimensions: 6¹/₂ × 19 × 18". Weight: 47 lbs.

Power Requirements: 120VAC, 60 Hz. U.L. listed.

Accessories For the Tandy 3000 Make Your System "The" System

We've got the monitor that's right for your business! Choose either the CM-1 Color Monitor (26-5112) with 14" screen for 80×25 text and 640×400 color graphics, or the VM-1 Monochrome Monitor (26-5111) with 12" screen for 80×25 text and 640×400 graphics.

Other video display options include our Deluxe Text Display Adapter (25-3046), which lets you display text on the VM-1 Monochrome or CM-1 Color Monitors, and the Deluxe Graphics Display Adapter (25-3047) that allows your Tandy 3000 to display high-resolution graphics (using the monitors above).

For those of you who want to take advantage of the multiuser capability of the Tandy 3000, our DT-100 Deluxe Data Display Terminal (26-6052) is the perfect complement. It features a green display screen, a high-resolution character set, 16 programmable keys, cursor control keys and numeric pad. And with the Serial-to-Parallel Converter (26-1198), you can attach a printer directly to the DT-100 for on-the-spot printing.

The 80287 Math Co-Processor (25-4033) lets you perform one set of functions while simultaneously performing sophisticated mathematical functions.

As your data needs expand, you can increase memory by up to two megabytes with the Memory Expansion Board (25-4030), or add 256K memory with the Parity Memory Kit (25-3062). The Serial Parallel Adapter (25-4034) lets you connect a second printer or add a modem.

These days a reliable data communication system is a must. Our 300-Baud PC Modem Board (25-1003) is easy to install and is entirely controlled by your keyboard entries or software. And the 300-Baud Modem Board doesn't take up valuable space—it fits right inside your Tandy 3000. The 300-Baud Modem Board features originate/answer modes and auto/answer dial. And it works with single-line or multi-line telephones.

Our 1200-Baud PC Modem (25-1013) is an auto-dial/auto-answer modem for your Tandy 3000 that features powerful automatic dialer commands. It's compatible with virtually all communications software—including Hayes®. Cut on-line time with faster transmission of your data.

CM-1 Color Monitor

Increase the Efficiency of Your 3000 With These Expansion Options

Now you can get a reliable hard-disk backup on tape! In fact, with our TCS-100 Tape Cartridge System (25-3020) you can back up 10 megabytes in as little as 6 minutes. The TCS-100 uses standard $\frac{1}{4}$ " cartridges (one included) for over 48 megabytes of archival storage and features a powerful file-by-file backup/restore function. You can select single files, groups of files or all files. Selection of files is based on globals, wild cards, files modified since last backup, file creation data, directory structure and more. Three heads—read, write and erase—provide one-pass backup with immediate read-after-write verification. Requires Interface Kit.

As an external data storage device, our Disk Cartridge System is hard to beat. The Disk Cartridge System provides speed, reliability, expandability, security and data transportability—because the cartridges are removable. The cartridges are designed

to store either ten or twenty megabytes. You can store an unlimited amount of data just by adding more cartridges. The Disk Cartridge System is available with two twenty-megabyte drives (25-4066) or with one ten-megabyte drive (26-1245). Either model is also an easy way to back up your conventional hard-disk system. Requires Interface Kit.

Other expansion options include the 1.2 Megabyte Floppy Disk Kit (25-4050) and the 360K Floppy Disk Kit (25-4051). The Hard Disk Controller (25-4060) lets you add a 20-megabyte hard disk.

To add an enormous amount of internal storage capability to the Tandy 3000, choose a 20-Megabyte (25-4062) or 40-Megabyte (25-4061) Hard Disk Kit. The 20-Megabyte Hard Disk Card (25-1029) lets you get 20 megabytes of hard disk storage on a user-installable card.

Tandy Computers are Backed With Total Support

Professional Training. Radio Shack's training and support is unequalled in the industry. You can select from a variety of courses taught at over 60 Computer Centers across the country. Or choose on-site instruction available through Customer Training and Support Centers in 60 major metropolitan areas.

Nationwide Service. 188 strategically located company-owned Radio Shack Computer Service Centers assure convenient service nationwide—performed by employees of the same company that manufactured and sold you your computer. We back the products we sell.

Customer Support. Radio Shack provides more support operations at less cost (much of it free of charge, in fact) than any other microcomputer company. Our support specialists are your "on-demand" experts, and can be reached by telephone hotline at 60 nationwide support operations centers.

Commercial Leasing. Your business may lease computer systems on a 37-month lease. Payments may be fully tax deductible since ours is a true lease. Leasing terms are also available for non-profit, governmental and educational organizations, too. Get details at any Radio Shack Computer Center.

Available at over 1200
Radio Shack Computer Centers and at
participating Radio Shack stores and dealers.
