TANDY ANNOUNCES 3 1/2" PORTABLE DISK DRIVE

FOR TANDY 200/MODEL 100 COMPUTERS

The new battery-powered Tandy® 200/Model 100 Portable Disk Drive, storing 100K of data on 3 1/2 inch diskettes, will be available in November for Tandy's laptop computers. The portable disk drive weighs only 1 3/4 pounds, making it ideal for traveling.

Operating from a menu, the portable disk drive lists the files on the floppy diskettes. Format, save, load, and other functions also are available from the menu. Data transfer is at 19,200 baud, for fast access to stored data.

The drive will not initiate a new function if the batteries are low, but if low voltage is sensed during operation it will finish the job in progress.

A battery warning lamp alerts the user of low batteries, and a disk access lamp informs the user that the diskette is being accessed. Four "AA" batteries or an optional AC adapter are required for operation.

Tandy 200/Model 100 Portable Disk Drive -- ADD ONE

Operating software is included on the diskette that comes with the disk drive. The drive is initialized by typing in a simple three-line BASIC program.

The disk drive's dimensions are 2 inches by 4 5/16 inches by 6 1/8 inches.

The Tandy 200/Model 100 Portable Disk Drive (cat. no. 26-3808, \$199.95) will be available at Radio Shack Computer Centers and participating Radio Shack dealers nationwide.
