TANDY CORPORATION ANNOUNCES THE TANDY 1000 EX COMPUTER

FORT WORTH, TEXAS -- Tandy Corporation today announced the Tandy® 1000 EX computer, a PC-compatible school and home computer priced at \$799, that runs 50 percent faster than the PC. The Intel 8088 microprocessor-based system runs most MS-DOS® software at 7.16 MHz, and is software switchable to 4.77 MHz. It comes with more memory than the original Tandy 1000 computer, features an integral CPU/keyboard, and Personal DeskMate™, a new, graphics-oriented, multi-function applications program.

"Educators and new home users asked us for a sturdy, high speed PC-compatible computer at a truly low price. Educators tell us they require networking capabilities, and prefer the simplicity of a one-piece unit. The Tandy 1000 EX computer succeeds the popular Tandy 1000 -- the best selling PC in U.S. retail distribution -- and is specifically for our home and education customers," said John V. Roach, chairman, CEO and president of Tandy Corporation.

Tandy 1000 EX Computer -- ADD ONE

The Tandy 1000 EX computer comes with 256K RAM expandable to 640K RAM, one 5-1/4 inch, 360K floppy disk drive (a second, external 3-1/2 inch or 5-1/4 inch floppy drive may be added), space for three PLUS expansion boards, and it supports the classroom Network 4 network. For educational users, the Tandy 1000 EX computer includes a headphone jack and volume control, perfect for the school lab environment.

The Personal DeskMate program features handy pull-down menus and pop-up boxes that make it easy to use. The package includes word processing, spreadsheet, electronic filing, paint, a calendar for scheduling appointments, and telecommunications programs as well as desktop accessories such as an electronic calculator, notepad, and phone directory.

Microsoft's MS-DOS 2.11 with GW-BASIC® also is included with every Tandy 1000 EX computer.

The Tandy 1000 EX computer (25-1050) is available at more than 7,000 Radio Shack® Stores, Radio Shack Computer Centers and participating dealers nationwide.

The Tandy 1000 EX computer is made in the United States by Tandy Corporation, the leading manufacturer and retailer of PC-compatible computer products.
