TANDY CORPORATION INTRODUCES NEW 40 MB VERSION OF TANDY 3000 HD PERSONAL COMPUTER

FORT WORTH, TEXAS -- Tandy Corporation today announced a new version of the Tandy® 3000 personal computer featuring a 40-megabyte high performance hard disk drive. This new computer system is Tandy's most powerful personal computer offering to date.

"Priced at \$4299.00, this version continues to bring the business customer the superior quality and price/performance expected from Tandy. The Tandy 3000, 40 MB HD computer runs the MS-DOS® version 3.2 operating system and provides PC/AT compatibility. It offers ten megabytes more storage, 128K more RAM, and greater memory expansion than the PC/AT," said John V. Roach, Tandy's chairman, CEO and president. "Those businesses with large spreadsheets and data bases will find the extra storage and 28-millisecond average access time valuable features."

NEW 40 MB HD--ADD ONE

The standard configuration for the Tandy 3000, 40 MB HD computer includes a 1.2-megabyte floppy disk drive and 640K RAM. Memory expansion to 12 megabytes will soon be possible with the release of XENIX® System V operating system.

The Tandy 3000 computer utilizes the Intel® 80286 microprocessor operating at 8 megahertz. Standard features include a real-time clock with battery backup, a serial/parallel adapter, and provision for an optional plug-in math co-processor.

The Tandy 3000, 40 MB HD computer is available at Radio Shack® stores, Radio shack® Computer Centers, Plus Computer Centers and participating Radio Shack dealers nationwide. Tandy is the leading manufacturer of PC compatibles.
