TANDY CORPORATION INTRODUCES NEW COLOR COMPUTER 3

FORT WORTH, TX--Tandy Corporation announced today the introduction of the Color™ Computer 3, an affordable high-performance personal computer with twice the memory, twice the speed and better graphics than the popular 64K Color Computer 2.

The Color Computer 3, available at more than 7,000 Radio Shack® Stores, Computer Centers® and participating dealers nationwide, is Tandy's latest addition to an already successful line (more than one million installed) of Color Computers.

The 128K Extended BASIC Color Computer 3 uses a 6809E 8/16-bit microprocessor with a clock speed of .87 MHz or optional 1.7 MHz.

The Color Computer 3 comes with 128K RAM, internally expandable to 512K. A proprietary chip incorporating a memory management function gives the Color Computer 3 the ability to run the powerful OS-9 Level 2.0 operating system.

Twenty-one new commands have been added in Extended BASIC. Four new keys, Control, Alternate, F1 and F2, have been added to

the computer's typewriter-style keyboard and all four arrow keys have been relocated on the right side.

Not only does the Color Computer 3 have twice the memory and more power but it also has better graphics than any other Color Computer. In the higher graphics mode, users can select 160 x 192 or 320 x 192- resolution with 16 colors (out of a palette of 64) or 640 x 192-resolution with 4 colors.

Tandy's new CM-8 Color Monitor (Cat. No. 26-3215), designed especially for the Color Computer 3, provides crisp graphics and easy-to-read text displays, up to 24 lines of 80 characters (upper and lower case). Retailed at \$299.95, this high-resolution RGB color monitor has a 13" diagonal screen and excellent audio/video capabilities.

All Tandy software and hardware accessories for the Color Computer 2 are compatible with the Color Computer 3. Users can determine the overall system cost by choosing the peripherals and software which meet their specific needs.

"Since its initial introduction in 1980, unit sales of the Color Computer have continued to increase. The Color Computer is unique in that it is the only home computer which, because of its architecture and operating system, has the ability to run business applications and even perform multi-tasking functions," explains John V. Roach, chairman and chief executive officer of Tandy Corporation.

"We are confident the new Color Computer 3 will continue the tradition of excellence. It's incredible price performance, additional memory and versatility will no doubt make it the choice computer of many professionals, educators and families."

Suggested retail price of the Color Computer 3
(Cat. No. 26-3334) is \$219.95.
