TANDY...

Clearly Superior™

Customer Training and Support

Tandy Computers are Supported by the World's Largest Computer Retailer

Purchasing a Tandy/Radio Shack computer system is a wise investment. But to get maximum return from your investment, you might need some help. Fortunately, Radio Shack understands this better than any other company.

Our customers are not expected to "go it alone" to become compatible with their computer and comfortable with their investment.

Training and support are those vital after-the-sale services which enable customers to get their systems up and running quickly and which ensure they remain that way.

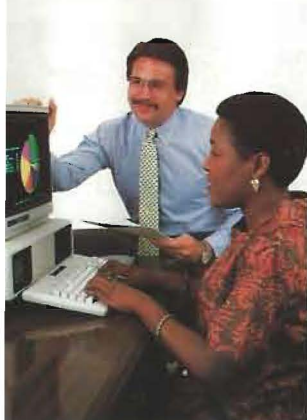

Whenever a customer needs answers to questions or solutions to problems, help from qualified Radio Shack training and support representatives is as close as the telephone. Each member of our training and support staff is dedicated to customer satisfaction.

Radio Shack®

A DIVISION OF TANDY CORPORATION

Total Training, Support and Service No Other Company Offers!

Our training and support services are structured to help customers enjoy all of the applications and benefits they expected of their computer right from the start. And with no surprises! That's why Radio Shack, through its more than 55 Area Training and Support Operations offices

coast-to-coast, provides more help and assistance to customers after the sale than any other company in the industry!

Our "System Purchase" Concept Includes:

New User Orientation . . .

. . . is that type of customer support generally referred to as "hand-holding". Typically, most users require and fully appreciate having someone to turn to and talk to for assistance as they learn about their computer systems and how they function. Radio Shack provides that initial "coaching" to help customers become familiar with their new computer investment, and to overcome any "computerphobia" they might have.

Installation . . .

. . . is often the first shock a new owner of a "boxed" computer system encounters. Order-takers in most computer salesrooms try to avoid the subject or, when specifically asked, offer answers such as "you'll have no problem" or "it's easy—just follow the instructions".

But once the computer system arrives at the office, do-it-yourself system set-up can become a nerve-racking, time-consuming hassle.

With a Tandy/Radio Shack system, you won't have to worry about installation! When

you purchase an On-Site Service Agreement or a System Installation and User Orientation Agreement, we will come out and set up your system. Also, we will show and carefully explain (in non-technical jargon) the right hook-up procedure every step of the way in case you ever have to do it yourself at another time. Your Tandy/Radio Shack system is delivered, set up and ready to go from day one.

Training . . .

. . . is one of the most important and integral parts of our "system purchase" concept. Our secret ingredients for making training a reality are fully-equipped computer training rooms and professional instructors at Radio Shack Computer Centers nationwide. About 300 of them!

We offer popular low-cost in-store training sessions which you will find so important in helping you gain a clear understanding of your new hardware as well as your new software. Or, at your invitation, a Radio Shack instructor will visit your office or business to train you in your own environment. The on-site sessions can be tailored to your specific needs and are suitable for one-on-one or multiple-employee groups. You will find our on-site training rates to be easy on your training budget.

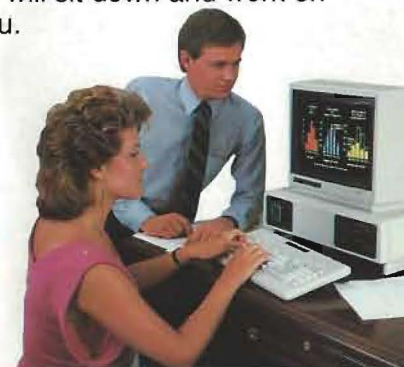

Problem Solving . . .

. . . is our response to your questions concerning various aspects and procedures for running your software. If you encounter a situation which isn't explained in the software manuals, or experience difficulties that go beyond your areas of expertise, simply call our customer "helplines" (see back panel for numbers). Trained hardware and software specialists are available to answer your questions, make suggestions, and otherwise help you out—all free of charge*!

If, by chance, your problem can't be resolved over the telephone, a Customer Service Representative can be dispatched, at your request, to your office or place of business to help resolve the problem. The Customer Service Representative will sit down and work on the problem with you.

On-site service, billed at a reasonable hourly fee, is available within a 150 mile radius of each Radio Shack Area Training and Support Operations office.

Radio Shack Customer Training and Support Is Clearly Superior!

In short, you have an army of over 500 "problem solvers" at your disposal to ensure that you enjoy success and satisfaction with your Tandy/Radio Shack computer system.

Upon comparing our services, we're sure you will agree, Tandy/Radio Shack is, in fact, Clearly Superior.

*Subject to change at Radio Shack's discretion.
