CAMCORDERS CAPTURE THE SIGHTS AND SOUNDS OF CHRISTMAS

This holiday season Radio Shack's new Realistic® Moviecorder™ camcorders make it easy to capture the magic of Christmas and create a vivid, living volume of memories that come only once in a lifetime.

"More and more people are discovering how affordable our Moviecorders are and just how much fun it is to own one," said Bernard S. Appel, president of Radio Shack®. "Our state-of-the-art camcorders are loaded with the most technologically advanced features available in high-tech home video recording, yet are simple and easy to operate. This is one gift that will be enjoyed for many years to come."

Available in full-size or compact VHS-C models, each unit combines the features of a video camera and portable VCR into one light-weight package to turn any holiday gathering into a cinematic production. Automatic features such as the auto focus and iris take the guesswork out of focusing and lighting, freeing you to concentrate on capturing your child's first Christmas or your best friend's crazy antics on New Year's Eve. The advanced HQ circuitry and MOS imaging systems insure picture sharpness and high-resolution video when shooting in low light.

Then, play back movies anywhere by connecting the camcorder to any television set or by loading the tape into a VCR.

Need to make sure you caught that special moment? Just press the camera's instant review and watch through the viewfinder the last few seconds you recorded. If you don't like it, rewind the tape and shoot the scene over again.

VCR features include HQ circuitry, SP recording/playback speed (the compact model also has EP speed), and a digital tape counter with memory. The full-size Model 100 also has variable shutter speed up to 1/2000-second to reduce blurring during freeze-frame or high-speed action, and a date code generator which can record the date in the corner of the picture.

Both Moviecorder camcorders feature a 6-to-1, f1.6 power zoom lens that moves continuously from wide-angle to telephoto shots at the touch of a button. This variable zoom lens allows a myriad of interesting and entertaining shots. For example, if you are recording in a small room, the wide-angle position will take in as much of the action as possible. If you're attending a football game, the zoom's telephoto mode puts you right down on the field with the players. The full-size Model 100 also features a Macro Mode which enables you to fill a TV screen with objects as small as stamps, coins, flowers or insects.

The full-size Model 100 (Cat. No. 16-801) and the compact Model 150 (Cat. No. 16-851) retail for \$1,299 each. Prices are good at over 7,000 Radio Shack stores and participating dealers nationwide.
