no better value.[™]

The Tandy[®] 1400 LT

A price breakthrough
in dual-disk MS-DOS[®]
laptop computers.

PC compatibility is only the beginning for the portable Tandy 1400 LT laptop computer. Because it's portable, the biggest names in MS-DOS based software can be as mobile as you are. What's more, back in the office or at home, the Tandy 1400 LT is as powerful and functional as a desktop computer.

The 1400 LT's backlit, 80-character by 25-line display utilizes the latest "supertwist" LCD technology for superb readability. Two built-in 3 1/2" disk drives each store 720K of programs and data. The Tandy 1400 LT combines the best features of a desktop computer with portability and comes up with the perfect laptop computer.

Tandy 1400 LT Features:

High-Performance Microprocessor

The NEC V-20 microprocessor is compatible with the Intel® microprocessor found in most PCs. At 7.16 MHz, the 1400 LT provides 50% faster clock speed than ordinary PCs.

768K Memory

The 768K RAM puts a tremendous amount of computing power into your hands. With 640K addressed by MS-DOS, you'll have plenty of memory for those large spreadsheet applications and data bases. And the additional 128K can be used as a RAM-based disk drive or print spooler.

Removable Battery Pack

A removable, rechargeable battery pack allows up to four hours of continuous use. Optional spare battery packs are easily installed and avoid unnecessary "down time."

"Supertwist" LCD Display

While many laptops have standard Liquid Crystal Displays, the 1400 LT's 80-character by 25-line display utilizes the latest "supertwist" LCD technology. "Supertwist" alone is a big improvement in readability. But since the 1400 LT is also backlit, it's one of the best LCD displays available.

Comes with MS-DOS and GW-BASIC

The Tandy 1400 LT comes with the MS-DOS operating system and GW-BASIC—they aren't expensive options you have to buy before you can use your computer. With MS-DOS, you can choose from industry-standard applications software.

3½" Disk Drives

The standard in portable data storage, 3½" disks store more data and are more durable than 5¼" diskettes. What's more, the smaller size makes transporting disks easier—perfect for portables.

PC Compatible

The Tandy 1400 LT is completely PC compatible, allowing you to use the MS-DOS programs on compact, high-capacity 3½" diskettes.

Optional Modem

When away from the office, an optional 1200-baud, Hayes® compatible modem allows you to send and receive messages via electronic mail and to access data bases and computer services.

More Standard Features

The Tandy 1400 LT comes with many standard features the competition considers "extras," such as a parallel printer adapter, RGB and composite monitor outputs, an RS-232C serial interface, external keyboard adapter, external disk drive adapter and real-time clock/calendar.

Optional Soft Carry Case

A convenient soft carry case is also available for the 1400 LT. It's the perfect way to carry your portable while traveling. There's also room for a spare battery pack, an AC adapter, acoustic cups, diskettes, manuals and miscellaneous papers.

Tandy 1400 LT Specifications

Microprocessor:	NEC V-20 (8088 equivalent).
Clock Speed:	7.16/4.77 MHz (switchable).
Operating System:	Includes MS-DOS/GW-BASIC 3.2.
Memory:	16K ROM, 768K RAM. 640K accessible by MS-DOS, 128K available for RAM-based disk drive or print spooler.
Keyboard:	Full-size, 76 keys.
LED Indicators:	Caps Lock, Num Lock, Low Battery, Scroll Lock, Standby Mode.
Display:	Backlit "Supertwist" LCD, 640x200 pixels, 80x25 characters, aspect ratio 1:1.4. Optional RGBI color monitor.
Disk Drives:	Two internal 720K 3½" double-sided, double-density.
Modem:	Optional 1200-baud, Hayes-compatible internal modem.
External Connections:	AC adapter, DB-25 Parallel printer, DB-9 Serial Port, RGBI Color Monitor, Composite Video Out, External Disk Drive, Enhanced Keyboard.
AC Adapter:	15 VDC 700 mA, UL listed.
Battery:	Removable, rechargeable 12 Volt, 2200mAh. 4 hours of continuous use.
Other Features:	Battery-powered Clock/Calendar, Standby Mode and Speaker.
Dimensions:	14½ x 12¾ x 3½".
Weight:	13.5 lbs.
