The Tandy[®] 1000 HX

The first desktop
PC compatible with
MS-DOS[®] built in.

The Tandy 1000 HX is a new dimension in state-of-the-art technology that's just right for the home or classroom. The 1000 HX's high-technology design brings a new standard in user friendliness.

The 1000 HX is the first computer to have the popular MS-DOS[®] operating system stored in ROM memory. A built-in 3 1/2" disk drive lets you store 720K of data on pocket-size diskettes. And every Tandy 1000 HX comes with Personal DeskMate[™] 2, a seven-in-one software package.

The HX comes standard with features that cost extra on other PCs: like adapters for joysticks, monitor and printer. It has more technology per dollar than any other MS-DOS computer.

Tandy 1000 HX Features:

8088-2 Microprocessor

The Tandy 1000 HX features an Intel® 8088-2 microprocessor with a switchable clock speed of 7.16/4.77 MHz. The top clock speed is 50% faster than an ordinary PC. You'll breeze through spreadsheet calculations, data processing and other functions faster than ever.

MS-DOS in ROM

The 1000 HX is the first desktop personal computer with MS-DOS built in. MS-DOS loads from ROM automatically in just seconds—just insert your program diskette and you're ready. (With other PCs, you insert the MS-DOS operating system diskette, wait for it to load and then remove the diskette—all before you load your program diskette.) It's the ultimate in ease of use for first-time users, the ultimate in time-saving convenience for experienced users. And it's the ideal personal computer for classroom situations.

Built-In 3½" Disk Drive

A high-capacity 3½" disk drive (720K) is built in—and there's room for a second 3½" drive, too. The Tandy 1000 HX is PC compatible, so you can use all the popular MS-DOS programs available on 3½" diskettes. And you can run software on 5¼" diskettes with our optional 5¼" external disk drive for total flexibility.

Personal DeskMate 2

Your first program is included—Personal DeskMate 2 seven-in-one software. Personal DeskMate 2 is an easy-to-use integrated program that lets you put your Tandy 1000 HX to work right away. Features include pull-down menus and "dialogue boxes" for selecting functions, applications like a 16-color Paint program and a Music program that lets you explore your creative urges. Additionally, there are other productivity applications that you'll find useful, like Text, Worksheet and Filer. There's also a Communications program and a Calendar.

Easy to Expand

The Tandy 1000 HX offers conveniences that you would have to pay extra for in other computers. You'll be able to plug in joysticks, RGBI or Composite Video monitor, printer—even a second disk drive—without buying extra adapters. By adding the Memory PLUS Expansion Adapter, you can have modem telecommunications and extra memory options.

And There's More

The Tandy 1000 HX is loaded with features, including 256,000 characters of memory and a built-in keyboard with the same layout as the popular Tandy 1000 EX. There's an advanced three-voice sound circuit for generating music through the built-in speaker and a headphone jack with volume control—a great asset in the home or classroom.

Tandy 1000 HX Specifications

Microprocessor:	Intel 8088-2.
Clock Speed:	7.16/4.77 MHz, software selectable.
Operating System:	Includes Microsoft's MS-DOS 2.11 with GW-BASIC.
Memory:	256K RAM, expandable to 640K. Includes 128K ROM and 256 bits EEPROM with MS-DOS resident, BIOS, Diagnostics, System Configuration and User Interface.
Keyboard:	Integral 90-key sculptured, including numeric-entry keypad. Special keys include HOLD, ESCape, BREAK, CTRL, CAPS, INSERT, DELETE and HOME. Twelve programmable Function keys.
Video Modes:	Text: 80 or 40 characters per line by 25 lines, 256 character types. Reverse video, blank, blink. Graphics: CGA compatible with enhancements; 640 × 200 pixels, 4-color; 320 × 200 pixels, 16-color. 16 colors—black, blue, green, cyan, red, magenta, brown, white, gray, light blue, light green, light cyan, light red, light magenta, yellow, high-intensity white.
Disk Drives:	One double-sided, double density 720K (formatted) thin-line 3½" mini-floppy. 96 tracks per inch.
Internal Expansion:	One "PLUS" style expansion board or two "PLUS" style expansion boards when used with Memory PLUS Expansion Adapter (25-1062). Second 3½" disk drive.
External Connections:	5¼" 360K or 3½" 720K external disk drive, standard parallel port, composite video out, ⅛" headphone jack with volume control, two joysticks, RGBI color monitor. AC outlet.
Shipping Weight:	19 lbs.
Power:	Input 120 VAC, 50/60 Hz. Output 25 watts. UL listed.
