no better value.[™]

The Tandy[®] 1000 TX

The most affordable
80286-powered
PC compatible
made in America.

The Tandy 1000 TX will change the way your business operates. Utilizing a powerful 8 MHz 80286 microprocessor, you'll fly through applications faster than ever. The 1000 TX also features a 3 1/2" disk drive that can store 720,000 characters of information.

The Tandy 1000 TX comes with MS-DOS[®] 3.2, as well as Personal DeskMate[™] 2, an integrated program that puts your TX to work right away.

With 640K of RAM and five card slots, the TX offers you the memory and expansion capabilities to address your every need. And we provide adapters you'd pay extra for on other PCs.

Get the power and performance you need at the best price available—the Tandy 1000 TX.

Tandy 1000 TX Features:

80286 Microprocessor

The Tandy 1000 TX features an 8 MHz 80286 microprocessor for far greater performance than ordinary PCs. This brings 80286 technology, previously found only in AT® class machines, to an affordable PC. The 1000 TX boasts over six times faster throughput than a standard PC XT™—you'll fly through your applications.

Built-In 3½" Disk Drive

The Tandy 1000 TX is outfitted with a new 3½" disk drive, ready to use MS-DOS 3.2 software released on durable, pocket-size diskettes. Each diskette can store up to 720,000 characters, and you can internally add a second 3½" disk drive anytime. If you prefer, you can expand with a 5¼" disk drive instead of a second 3½" drive—so you can use existing 5¼" software along with the new releases available on 3½" diskettes.

Personal DeskMate 2

Your first program is included. Personal DeskMate 2 is an easy-to-use integrated program that lets you put your Tandy 1000 TX to work right away. Features include pull-down menus and "dialogue boxes" for selecting functions. You can use Personal DeskMate 2 to extend your business day by using Text, Worksheet and Filer to complete your office or personal business tasks. After you've left the office, you can relax at home with the 16-color Paint program and the Music program. You can use these two functions of Personal DeskMate 2 to express your creative urges. A Communications program and an optional modem will let you access the latest news or stock quotes from the various computer information networks.

MS-DOS Included

The 1000 TX includes Microsoft's MS-DOS 3.2 and GW-BASIC software—an expensive option with other PCs. MS-DOS gives you access to the most powerful and proven software packages on the market today. Choose from the best names in business, entertainment and educational programs.

Easy to Expand

The Tandy 1000 TX comes with 640K RAM—enough power to handle almost any application. Five card slots make it easy to customize the 1000 TX just the way you want. Add more memory, an internal modem, a hard disk card—or add an additional card for connecting the TX to your workgroup environment.

And There's More

The 1000 TX includes the adapters you'd pay extra for with ordinary PC compatibles. Monochrome and color graphics adapters, parallel printer adapter, joysticks adapters and an RS-232C serial port are all built in. There's even an advanced three-voice sound circuit for generating music through the built-in speaker and a headphone jack with volume control.

Tandy 1000 TX Specifications

Microprocessor:	Intel 80286.
Clock Speed:	8/4 MHz, software selectable.
Operating System:	Includes Microsoft's MS-DOS 3.2 with GW-BASIC.
Memory:	640K RAM, expandable to 768K (640K for MS-DOS, 128K for video memory). Includes power-up diagnostics.
