TANDY 1400 LT PORTABLE COMPUTER, LAPTOPS MAKE SMART GIFTS FOR CHRISTMAS

For the business professional "on the road" or the student "on the go," a full-function PC-compatible laptop like the new Tandy® 1400 LT portable computer makes a smart Christmas gift and represents the best value on the market. An exceptionally powerful PC-compatible for its size, no laptop has more built-in features than the 1400 LT at a very competitive suggested retail price of \$1,599.

The Tandy 1400 LT portable computer gives users both the advantages of mobility and the power and efficiency of a desktop computer. Whether traveling, at home or in the office, the 1400 LT is compatible with industry standard software programs and easily runs complicated applications such as spreadsheets, data bases and word processing. Unlike most laptops, the 1400 LT comes with the MS-DOS® 3.2 operating system and GW-BASIC® programming language at no additional cost.

The Tandy 1400 LT portable computer comes with more memory than any laptop in its class and a clock speed fifty percent faster than many personal computers.

Its "backlit" supertwist liquid crystal display (LCD) represents the latest technology and provides dramatic improvement in readability -- from any angle. The adjustable display rivals a video monitor in readability and provides eight

shades of grey, creating sharper images and distinctive graphics for increased clarity. The 1400 LT's display has been touted by media and industry analysts as "the best LCD display" available today.

A unique removable, rechargeable battery pack powers the 1400 LT for up to four hours of continuous use. "Down time" problems due to spent batteries are eliminated by carrying an optional spare battery pack.

The Tandy 1400 LT portable computer is also equipped with the newest standard in data storage -- two internal 3.5-inch floppy disk drives. The 3.5-inch disk stores more data, provides more durability and, because of its compact physical size, is much easier to transport.

Other standard features of the Tandy 1400 LT portable computer considered "extras" by other manufacturers include a 76-key tactile feel keyboard with 12 function keys, parallel printer and RS-232C serial interfaces, RGB and composite monitor outputs, external keyboard and disk drive interfaces, real-time clock/calendar, low battery indicator, standby mode and carry handle for convenient transportation.

Radio Shack is also offering two other very popular battery-powered laptop models at extraordinary savings to the Christmas consumer.

The lightweight, versatile Tandy® 102 portable computer, complete with five instant-on application programs and 300-baud modem built-in, will be on sale for \$449, a savings of \$50 off the suggested retail price.

(more)

For complete spreadsheet analysis and calculations using built-in Multiplan® software and 40 x 16 flip-up screen, the popular Tandy® 200 portable computer is the right choice for Christmas. The 200 is on sale for only \$499, a savings of \$300 off the suggested retail price.

The Tandy 200 portable computer is equipped with many of the same built-in features as the 102, including a built-in modem and word processing, telecommunications, scheduling and address applications.

With easy-to-use word processors, the 102 and 200 are especially useful for journalists, sales executives, engineers, students or anyone who needs to write letter-perfect correspondence in a hurry.

As the pioneer of the portable computing market, Tandy has been setting the standards of quality, technology and dependability since 1983. The entire line of Tandy portable computers are backed by the extensive service and support system of Radio Shack®, the largest retailer of computer products and consumer electronics.

Holiday sale prices are good at more than 7,000 Radio Shack Computer Centers®, Radio Shack Plus Computer Centers™, Radio Shack Stores and participating dealers nationwide.
