no better value.**

The Tandy® 3000

**Discover high-speed
286 performance that's
multiuser ready.**

For cost-effective solutions to modern business management, the Tandy 3000 will take you into the next generation of computing. The Tandy 3000 runs today's PC XT™ and AT® software with high-speed 286 performance. The 3000 can also use the OS/2™ operating system for a variety of multitasking applications.

Adding a 20 or 40-megabyte hard drive to the Tandy 3000 opens the door to multiuser applications using the XENIX® System V/286 multiuser operating system. Such a system can accommodate up to six users. The 3000 also makes an ideal file server within a workgroup, using the 3Com® network. With 640K of standard memory and the capacity for expansion up to 16 MB under XENIX, the Tandy 3000 is the computer that will take your business into the future.

Tandy 3000 Features:

80286 Microprocessor

If speed is important, compare and you'll choose the Tandy 3000. The 16-bit architecture operating at 12 MHz delivers far greater processing power than ordinary PCs, allowing you to fly through applications.

Remarkably Expandable

Because we know how quickly your business can grow, we made sure it has room for flexible expansion. It comes standard with nine expansion slots: two 8-bit/XT compatible slots and seven 16-bit/AT compatible slots. Expand with more memory, hard disk drives, communications and more. An optional 80287 math co-processor can be added for high-speed numerical operations.

The Tandy 3000 comes standard with a built-in high-density, thin-line, 1.2 MB 5¹/₄" disk drive. And its open architecture lets you add a high-capacity 3¹/₂" drive later on. You can also add a built-in 20 or 40-megabyte hard disk drive.

The Tandy 3000 comes with 640K memory and can be expanded to sixteen megabytes using the built-in expansion slots.

Keylock and Chassis Lock

A system keylock is included to protect your data from unauthorized access. This keylock prevents keyboard use, reset, and also locks the chassis to prevent cover removal.

XENIX Multiuser System

The addition of a hard disk drive and a controller allows the Tandy 3000 to use the XENIX System V/286 operating system. Up to six terminals can be connected to the Tandy 3000 when operating under XENIX. Multiuser systems permit several individuals to work on different tasks and allow the sharing of expensive peripherals like modems and printers.

Workgroup Solutions

When equipped with a hard disk drive and controller, the Tandy 3000 makes an ideal file server within a 3Com workgroup. Workgroups get people and PCs working together, exchanging information between workstations and sharing peripherals like modems and printers.

Tandy 3000 Specifications

Microprocessor:	Intel® 80286 processor with 16-bit data path. Clock Speed, 12 MHz, 1 wait state (switchable to 6 MHz). Object code compatible with 8086/8088. Real-time clock with battery backup.
Operating System:	Optional Microsoft MS-DOS 3.2 with BASIC.
Memory:	640K RAM, expandable to 1 MB on the main board. By using the expansion slots, memory is expandable to 16 megabytes under XENIX.
Keyboard:	101-key enhanced keyboard, including separate cursor and numeric pad, 12 function keys. Special keys include ESCape, Num Lock, Alt, Ctrl, Caps Lock, Prt Sc, Sys Req, Scroll Lock, Up, Down, Right and Left arrows. Retractable legs, 6-ft. coiled cable.
Video Display:	Optional high resolution, non-glare, non-interlaced 12" monochrome (green) or 14" color monitor. 80 or 40 characters per line by 25 lines. Monitor adapter required.
Disk Drives:	Built-in high-density, thin-line 1.2 MB 5 ¹ / ₄ " floppy. High-capacity disk drive can also read 360K format. Disk storage is expandable to include two floppy drives and one hard disk drive, or one floppy disk and two internal hard disk drives. Total internal storage can exceed 80 megabytes.
Internal Expansion:	9 plug-in card slots: 2 XT and 7 AT. Optional 80287 math co-processor can be added.
External Connections:	Standard parallel printer port, RS-232C serial communications port.
Dimensions:	6 ¹ / ₂ x 19 x 18"
Weight:	42 lbs.
Power Requirements:	Input: 120VAC, 60 Hz. Output: 192 watts. U.L. listed.
