CELLULAR TELEPHONES GIVE THE GIFT OF TIME AND SECURITY

This Christmas why not consider giving a gift that provides security and saves time? The gift of a cellular telephone from Radio Shack® will give the business executive an extra edge in business. As a present to a family member, however, a cellular phone provides highway security as well as the convenience of continuous communication with the rest of the family.

"Cellular telephone technology is no longer reserved just for business use by high level executives, explains Bernard S. Appel, president of Radio Shack. "Much like VCRs and home computers, cellular telephones are becoming more affordable and very attractive for personal use."

For business people, a cellular telephone is an important tool that provides a competitive advantage in business and personal communication. It helps manage time and resources more efficiently by keeping the user always "in touch".

Even non-business cellular phone users will reap many benefits. Now no one must ever drive "alone" again. If help is needed, the police, a tow truck, the family doctor or mechanic are just a cellular phone call away. Just as a cellular phone gives the business executive more time, it adds free time to anyone who wants to keep in touch while running errands, shopping or taking kids to practice.

In an effort to make cellular technology more affordable and accessible to a variety of consumers, Radio Shack offers three models. "We want to make this new technology available to everyone," explains Robert Miller, Radio Shack's vice president of consumer merchandising.

"By offering a portable hand-held cellular phone, a low-cost mobile-only unit and the best-selling transportable phone on the market, we can meet every cellular need at an attractive price", he said.

The new CT-300 Portable Cellular Telephone combines advanced technology and design simplicity in a lightweight, hand-held cellular phone with many special features normally found only in a full-size unit.

The CT-300 is about the size of a cordless telephone and weighs only 28 ounces including the antenna and battery. A multi-function LCD display shows the number being dialed, cumulative call length, your own telephone number and more. Other features include memory dialing of up to 40 phone numbers, one-button redial, and an electronic lock which prevents unauthorized outgoing calls except for "911" emergency calls. A No Service/Roam indicator tells you when you are beyond cellular service or out of your service area. The phone has backlighted controls for easy operation at night, touch-tone dialing for access to low-rate long distance and other computerized services, and a scratch pad memory to temporarily store a number during a call.

The CT-300 (Cat. No. 17-2001) retails for \$1,499 and includes the transceiver, built-in rechargeable battery pack, portable antenna, and carrying case with strap. Separate accessories include a charging stand, AC adapter, mobile mounting kit, hands-free data/interface and an extra rechargeable battery pack.

-more-

The CT-100 is Radio Shack's lowest priced, full-featured cellular phone. This mobile-only unit delivers full 3-watt performance and includes the handset, transceiver, monitor speaker, a microphone that attaches to the sun visor (for hands-free operation), and all the hardware needed for installation under the dash or seat.

The CT-100 has all the features of the CT-300 as well as a speaker monitor that lets you dial and listen without lifting the handset, a speaker jack for an optional external speaker, and 98-number memory. The CT-100 (Cat. No. 17-3001) retails for \$799.

An improved version of Radio Shack's popular 3-watt Transportable Cellular Telephone (mobile mount or battery-operated portable) continues at \$1,199. (Portable adapter and batteries optional.)

Your neighborhood Radio Shack store, at time of purchase, will assign your cellular telephone number, program it into the telephone, and handle all the paperwork so the phone can be used immediately. The equipment is backed by a one-year warranty, honored nationwide, and an optional three-year Extended Service Plan. To make the cellular telephones easily affordable, Radio Shack offers financing and a commercial lease plan.

Prices apply at over 7,000 Radio Shack stores, Radio Shack Computer Centers® and participating dealers, wherever cellular service is available.
