

**Tandy Printers:
Because there is
no better value.**

Tandy® Dot-Matrix Printers

**The affordable
solution for your
printing needs.**

Get the speed and efficiency of a Tandy dot-matrix printer. Both the DMP 440 and DMP 2120 are PC compatible and accept continuous feed or single sheets up to 16" wide.

DMP 2120. A precision 24-wire print head gives superior-quality correspondence fonts in a single pass, with printing at up to 240 characters per second. Use Font Editing Packages (sold separately) to load different type styles for print quality that rivals a daisy-wheel printer. Includes data-processing, word-processing and graphics modes. Includes built-in "push-type" tractor so a single form or fanfold sheet can be detached without waste. Accepts optional 4-color ribbon for printing in multiple colors.

DMP 440. A top printing speed of 300 characters per second helps get the job done quickly. Correspondence of any type is given emphasis with printing in elongated, elite, condensed and super/subscripts at 10, 12 or 16.7 characters per inch. For even more variety in print style, downloadable fonts are available using optional-extra font packages. Creates bit-image graphics, as well.
