HOLIDAY SAVINGS ON TANDY 1000 FAMILY OF PERSONAL COMPUTERS AWAIT SHOPPERS AT RADIO SHACK

Radio Shack®, the largest retailer of personal computer and consumer electronic products, offers a "Santa's bag" of exceptional holiday savings and true value on the popular Tandy® 1000 family of PC-compatible personal computers and accessories.

With the introduction of two new Tandy 1000 models, shoppers will be able to choose from four of the industry's easiest-to-use computer systems.

Through Christmas, the new Tandy® 1000 HX and Tandy® 1000 TX personal computers, each packaged with a CM-5 color monitor, are being offered at special prices of \$848.95 and \$1,248.95, respectively. Holiday shoppers can save a total of \$150 off the suggested retail price of the 1000 HX system and \$250 off the suggested retail price of the 1000 TX system.

The Tandy 1000 HX personal computer gives new meaning to the phrase "user-friendly." Without sacrificing power or capability, the advanced "Power and Run" design of the 1000 HX shields the user from the usual cryptic system start-up procedures.

(more)

The 1000 HX is ideal for the first-time PC user. There's no need for an operating system diskette -- the operating system is built in. Simply turn the power on and the 1000 HX is ready in less than three seconds.

Because no other PC on the market is so easy to operate, the 1000 HX is in a class by itself.

The powerful new Tandy 1000 TX personal computer gives business, home, home office and classroom users more speed and performance per dollar than any American-made name brand personal computer.

The 1000 TX is more than six times faster than a standard PC/XT and three times faster than the new IBM® Model 25 and Model 30 computers. No other PC/XT-compatible computer available today can match the performance of the 1000 TX -- at such an affordable price.

Both the 1000 HX and 1000 TX have standard value-added features which other PC-compatibles offer as "extra" cost options, including enhanced color graphics, three-voice sound, parallel printer port, two joystick ports and a headphone jack with volume control. The 1000 TX also features a serial interface for use with a mouse or modem. A large selection of accessories and expandable options are available, as well, to meet future needs of PC users.

While either computer offers a 5.25-inch drive option to accommodate existing software libraries, the 1000 HX and 1000 TX come with a 3.5-inch disk drive -- the latest in disk drive

(more)

technology. The 3.5-inch durable, pocket-sized diskette is capable of more data storage -- up to twice as many characters as the 5.25-inch format.

The 1000 HX and 1000 TX are both compatible with industry-standard software packages. Unlike many PC-compatibles, both computers are supplied with software necessary to begin -- at no additional expense. This includes versions of the MS-DOS® operating system, GW-BASIC® programming language and, as an added bonus, Radio Shack's new graphics-oriented Personal DeskMate™ 2 productivity software.

Personal DeskMate 2 puts the computer to work immediately with integrated basic applications like Text, Worksheet, Filer, Calendar, Telecom, an improved 16-color Paint application and a new Music composition program.

Using pull-down menus and pop-up dialogue boxes, Personal DeskMate 2 is state-of-the-art in easy-to-use software. Applications can be accessed by the keyboard, a joystick or a mouse, the most popular pointing device used in many homes, businesses and classrooms.

Computer shoppers can also save on the Tandy® 1000 EX personal computer, the lowest-priced MS-DOS based PC available. Complete with ready-to-use software, the 1000 EX with a CM-5 color monitor is sale priced until Christmas for only \$748.95.

For current owners of the popular Tandy® 1000 SX personal computer, Radio Shack answers their Christmas wishes with the new

80286 accelerator card -- for only \$399.95. Users can increase the speed of their 1000 SX to that of a 1000 TX without having to replace their existing computer.

"This is an example of the tangible value our customers can expect from Radio Shack," explained John V. Roach, chairman, chief executive office and president of Tandy Corporation.

"Our commitment is to improve technology and the quality of our products and, whenever possible, extend those benefits to our existing customer base. That's the kind of commitment consumers expect, and receive, when they purchase a product from a \$3-billion industry pioneer."

Holiday sale prices are good at more than 7,000 Radio Shack Computer Centers®, Radio Shack Plus Computer Centers™, Radio Shack Store and participating dealers nationwide.
