# The Tandy® LP 1000 Laser Printer

**A breakthrough  
in typeset-quality  
desktop publishing.**

The LP 1000 delivers laser-sharp clarity that rivals professional typeset quality. The 1.5 megabyte memory provides 300 × 300 dots-per-inch print quality on a full 8½ × 11" page. Quietly prints up to six pages per minute. Optional software-downloadable fonts are available for variety in typstyles. Convenient front panel selection of program, fonts and type styles means no cartridges to load and unload. Compatible with Tandy, IBM® and HP LaserJet Plus®. And unlike many other laser printers, the LP 1000 comes complete and ready to print—no special controller board is required.

# Tandy LP 1000 Laser Printer Features

## Ideal for Desktop Publishing

Along with your personal computer and easy-to-use software, the Tandy LP 1000 brings publishing capabilities previously handled either manually or by expensive dedicated systems. You can design, edit and print high-quality reports, newsletters, brochures, manuals, and signs easier than manual systems, more affordably than dedicated systems.

## Efficient Throughput

After your page—text and/or graphics—is assembled using the appropriate desktop publishing software and downloaded to the LP 1000, you'll receive professional-looking results at the rate of six pages per minute. Naturally, you can also download files directly from standard PC software, to give your word processing and spreadsheet files, as well as graphs and charts, a sharp, professionally-produced image— at six pages per minute.

## Choose Your Typestyles

The LP 1000 comes with four type fonts built in, selectable from the front panel or software: Letter Gothic (12 pitch), Letter Gothic (16.7 pitch), Prestige Elite (12 pitch) and Courier (10 pitch). Standard print attributes include pitch and bold face. By using an optional font package, two additional fonts can be downloaded to create documents with any or all of the six fonts at the optimum resolution of 300 dots-per-inch. Still more fonts can be downloaded to create documents with up to 16 different fonts on a single page (resolution will be less than 300 dpi).

## Designed for Office Use

Because of its quiet operation, the LP 1000 can be used in virtually any office environment. And it requires no more space than conventional printers—it's more compact, in fact, than most wide-bed printers.

## Easy to Use . . . Hard Working

No special paper is required for the LP 1000. You can use your letterhead, legal sheets or standard 8½ × 11" twenty-pound bond paper. It's perfect for designers, marketing firms and other businesses that print as many as 3000 sheets per month.

## Ready to Use

Virtually any system can be used with the LP 1000, because it offers the three top printer emulations: Tandy, IBM and HP LaserJet Plus. A standard parallel printer interface, as found on all Tandy business systems, is all that is required—just add cable and you're set. Note: a video interface is provided to permit connection to an external page description device or alternate controller for custom, vertical-market applications.

## LP 1000 Supplies

**Kit A.** Includes drum, 20,000-sheet life and cleaner/maintenance kit with 10,000-sheet life.

**Kit B.** Includes cleaner/maintenance supplies sufficient for 10,000 sheets.

**Toner:** 1,500 sheets, A4 size, 5% duty cycle.
