RADIO SHACK BRINGS 80286 PERFORMANCE AND VALUE TO PC/XT-COMPATIBLE MARKET

NEW YORK CITY--Radio Shack®, a division of Tandy Corporation and leading retailer of personal computers, marked its ten-year anniversary in the computer business today by introducing a number of impressive new products including the powerful Tandy® 1000 TX personal computer.

This affordable PC brings business, home, home office and classroom users more performance per dollar than any American-made name brand personal computer.

The Tandy 1000 TX personal computer sets an industry speed standard in the PC/XT-compatible market with the advanced technology of Intel's® 8MHz 80286 microprocessor.

Three times faster than the new IBM® PS/2 Model 30 computer and more than six times faster than a standard PC/XT, the new 1000 TX provides--at an astonishing \$1,199--processing power previously found only in "AT" class machines.

The latest in 3.5-inch disk technology, coupled with seven custom-designed Application Specific Integrated Circuit (ASIC) chips, positions the Tandy 1000 TX personal computer in the forefront of engineered design and quality.

TANDY 1000 TX PERSONAL COMPUTER
Add One

At no additional expense, the Tandy 1000 TX personal computer is supplied with the MS-DOS® 3.2 operating system, GW-BASIC® software and Personal DeskMate™ 2 software, Radio Shack's second generation of its graphics-oriented Personal DeskMate applications package.

Using Microsoft's® Windows conventions, the Personal DeskMate 2 program features pull down menus and pop-up dialog boxes that can easily be accessed by either a joystick, newly simplified keyboard interface or a mouse, the most popular pointing device used in many classrooms, homes and businesses.

Personal DeskMate 2 provides the user with the basic applications necessary to begin computing immediately, including Text, Worksheet, Filer, Calendar and Telecom. Special functions like a Phone Directory, Calculator and Notepad are also available. An improved 16-color Paint application and a new Music composition application take advantage of the computer's sophisticated three-voice sound and enhanced graphics.

The 1000 TX continues Tandy's tradition of providing standard features which other PC-compatibles offer as extra cost options. These features are a parallel printer port, RS-232C serial port, two joystick ports, three-voice sound and headphone jack with volume control.

TANDY 1000 TX PERSONAL COMPUTER
Add Two

Standard configuration of the Tandy 1000 TX personal computer includes a full 640-kilobytes (Kb) of memory, one 3.5-inch 720Kb floppy disk drive and five 10-inch PC/XT expansion slots.

The Tandy 1000 TX personal computer's open architecture supports additional memory and a multitude of internal storage options. Internally, the computer provides a second half-height device slot for an optional 3.5-inch 720Kb floppy disk drive, 5.25-inch 360Kb floppy disk drive, tape backup system or a 20 or 40-megabyte (Mb) hard disk drive. This versatility is especially helpful to PC users with an existing library of MS-DOS software and represents Tandy's "building block" philosophy of allowing users to customize their own fully-configured systems.

The Tandy 1000 TX personal computer includes RGBI color and composite monochrome monitors. Enhanced CGA graphics provide either 640 x 200 resolution with four colors or 320 x 200 resolution with 16 colors. Higher resolution video support is available with industry-standard optional expansion boards.

Other options for the Tandy 1000 TX personal computer are an 80287 math co-processor and the new Smartwatch, a low-cost user-installable perpetual clock/calendar on a chip. Smartwatch plugs into the BIOS ROM socket, saving an internal expansion slot.
