RADIO SHACK CONTINUES TO ADD VALUE TO TANDY 3000 LINE OF PERSONAL COMPUTERS

NEW YORK CITY--On its 10th anniversary in the PC industry, Radio Shack®, a division of Tandy Corporation, announced today several enhancements to its high-quality line of Tandy® 3000 personal computers.

In keeping with the company's philosophy that application software is essentially hardware independent, the Tandy 3000 and Tandy 3000 HL computers support MS-DOS® 3.3 and OS/2™ operating systems as well as the Microsoft® Windows operating environment. Both machines continue to support AT™ and XT®-compatible bus architecture, giving the customer a wide range of options including CGA, EGA and VGA video displays.

Compatible with today's standards, the performance of the 80286-based Tandy 3000 has been increased with a clock speed of 12MHz, software selectable to 6MHz. Standard memory has also been increased from 512 kilobytes (Kb) to 640Kb and is expandable to 16 megabytes (Mb). The Tandy 3000 features a 5.25-inch, 1.2Mb floppy disk drive to accommodate the user's current library of application software.

Tandy 3000 Personal Computers--ADD ONE

Designed with the future in mind, two additional drive slots allow room to add internal devices such as a 3.5-inch, 1.44Mb or 720Kb disk drive, hard drive, internal disk cartridge system or tape backup system.

The outstanding reliability record of the Tandy 3000 has made it a popular choice for a wide range of business and school administration applications, as an engineering workstation or network file server. It is equally at home in stand-alone use or connectivity environments.

An enhancement of the Tandy 3000 is a keylock/chassis locking mechanism which provides added security by locking out the keyboard and the reset button, and preventing removal of the computer's housing.

Other standard features are a 101-key enhanced keyboard, nine expansion slots (two XT-compatible and seven AT-compatible), one parallel and one serial port.

The Tandy 3000 computer has been reduced \$200 to \$1,999 making it a popular choice for low-cost AT compatibility.

The Tandy 3000 HL personal computer, at \$1,499 is Tandy's lowest cost "OS/2 ready" 16-bit computer. The 3000 HL also gives the customer the flexibility to configure a system with the storage options and video displays to meet his needs.

Tandy 3000 Personal Computers--ADD TWO

The 3000 HL operates at a clock speed of 8MHz and is software selectable to 4MHz. One 5.25-inch, 360Kb floppy disk drive is also included with two additional front drive slots to accommodate half-height internal drive options.

Standard configuration includes 512Kb RAM expandable to 4Mb, seven expansion slots (four XT-compatible and three AT-compatible) and a parallel port.

The Tandy 3000 HL computer's speed, expandability and reliability make it an ideal value for small-, medium-, and large-sized businesses, home businesses, school administration offices, classroom networks and larger connectivity environments.

This system retails for \$1,499, a reduction of \$200 from the original 3000 HL price.

Suggested retail prices of the Tandy 3000 (Cat. No. 25-4002) and Tandy 3000 HL (Cat. No. 25-4071) are good at Radio Shack stores, Radio Shack Computer Centers®, Radio Shack Plus Computer Centers™ and participating dealers nationwide.
