RADIO SHACK INTRODUCES FIRST PC-COMPATIBLE TANDY LAPTOP

NEW YORK CITY--Radio Shack®, a division of Tandy Corporation and pioneer of the personal computer industry, celebrated ten years in the computer business today by unveiling several new products including its first PC-compatible laptop, the Tandy® 1400 LT personal computer.

Radio Shack's newest addition to a successful generation of Tandy portable computers is a competitively priced, full-featured, battery-powered system that can easily perform as either a portable or desktop computer. Busy executives, sales professionals, journalists and students will find the Tandy 1400 LT personal computer especially attractive.

The Tandy 1400 LT personal computer features the NEC® V-20 microprocessor, a high performance, 8088-compatible, operating at switchable clock speeds of 7.16 or 4.77 MHz.

Equipped with 768-kilobytes (Kb) of random access memory (RAM), the Tandy 1400 LT personal computer contains more memory than any other laptop in its class. A full 640Kb of memory can be addressed by MS-DOS® while the remaining 128Kb of memory is dedicated to RAM-based disk or print spooler. Two internal, front-mounted 3.5-inch 720Kb disk drives provide additional storage capacity.

Add One

Unlike most laptops, the Tandy 1400 LT personal computer features a "backlit" supertwist LCD display, the latest technology in superior readability. The adjustable, 80 x 25 display has 640 x 200 resolution plus eight shades of grey for distinctive graphics.

A removable, rechargeable 12-volt battery pack or AC adapter powers the Tandy 1400 LT personal computer, allowing extended operation between charges. Battery life is rated at approximately four hours of continuous use. An optional, spare battery pack (Cat. No. 25-3520, \$79.95) serves as an alternative power source for endless hours of work and eliminates dead battery drain problems associated with many other PC-compatible laptops.

If users prefer their portable computer to function as a desktop system, the Tandy 1400 LT personal computer provides standard adapters for an RGBI or composite monitor and an 101-key Enhanced Keyboard.

Other features of the Tandy 1400 LT personal computer include a 76-key tactile-feel keyboard with 12 function keys, parallel and serial interfaces, real time clock/calendar, low battery indicator, standby mode and carry handle for convenient transportation.

The Tandy 1400 LT personal computer is bundled with the MS-DOS 3.2 operating system and GW-BASIC® programming language, giving the user access to a large selection of industry standard software.
