RADIO SHACK STRESSES EASE OF USE WITH REVOLUTIONARY TANDY 1000 HX PERSONAL COMPUTER

NEW YORK CITY--Radio Shack®, a division of Tandy Corporation and the leading retailer of personal computers, celebrated its tenth anniversary in the computer business today by introducing an elaborate array of products including the new Tandy® 1000 HX personal computer.

The Tandy 1000 HX personal computer's "Power and Run" design is said to be the product with more technology per dollar than any other PC-compatible. At \$699, it is an ideal value for classroom, home, home office and first-time PC users. Its "instant-on" capability is found in no other PC, setting it apart from any MS-DOS® computer in its class and establishing a new industry standard in user-friendliness.

A significant feature which facilitates the Tandy 1000 HX personal computer's "Power and Run" design is the storage of the MS-DOS 2.11 operating system in read only memory (ROM), eliminating the need for an ever-present MS-DOS diskette. No other PC/XT-compatible manufacturer has introduced this innovative design in a desktop computer.

TANDY 1000 HX PERSONAL COMPUTER
Add One

The use of an Electrically Erasable Programmable Read Only Memory (EEPROM) device assists the "instant-on" feature of the Tandy 1000 HX personal computer. The EEPROM stores the system configuration and user-specified start-up mode. More than 20 system configuration selections are available.

Without sacrificing power or capability, the "Power and Run" design shields the user from cryptic MS-DOS operating system "A>" prompts and switch-selected configuration options. Simply turn the power on and it's ready.

Students in a classroom, for example, can insert their software diskette, turn the computer on and begin their lesson with no intermediate steps.

Users of the 1000 HX may bypass the operating system prompts upon initial start-up and proceed directly to the application of their choice, a simple user-friendly menu for easy operation, or Radio Shack's new Personal DeskMate™ 2 software, an integrated, graphics-oriented personal productivity package supplied with the Tandy 1000 HX personal computer at no additional expense.

The core of the Personal DeskMate 2 program is stored in ROM, along with the operating system, to create a faster, more user-friendly operation. Basic applications such as Text, Worksheet, Filer, Calendar and Telecom can easily be accessed by using either a mouse, joystick or the 1000 HX's simplified keyboard interface. Dialog boxes and pull down menus using Microsoft's® Windows conventions are used.

Add Two

An improved 15-color Paint application and a new Music composition application which take advantage of the computer's enhanced graphics and three-voice sound capability have been added to Personal DeskMate 2 software.

The Tandy 1000 HX personal computer provides a number of standard features not found on many PC/XT-compatibles except as extra cost options. These features include two joystick ports, parallel printer port, three-voice sound and headphone jack with volume control.

The Tandy 1000 HX personal computer incorporates five Tandy-designed Application Specific Integrated Circuit (ASIC) chips and the latest in 3.5-inch disk technology. Its Intel® 8088-2 microprocessor operates at selectable clock speeds of 7.16 or 4.77 MHz.

Its sleek one-piece design, similar to that of the popular Tandy 1000 EX personal computer, is configured with 256-kilobytes (Kb) of memory (expandable to a full 640Kb) and one internal, front-mounted 3.5-inch 720Kb disk drive. A second 3.5-inch 720Kb internal floppy drive may be added to the Tandy 1000 HX personal computer as well.

Other storage options include an external 5.25-inch 360Kb floppy disk drive and the addition of three internal "PLUS"-style expansion boards when used with a Memory PLUS Expansion Adapter.

Add Three

The Tandy 1000 HX personal computer connects directly to a RGBI color monitor or composite monochrome monitor. Enhanced CGA graphics provide either 640 x 200 resolution with four colors or 320 x 200 resolution with 16 colors.

Additional options for the 1000 HX are high-resolution video, RS-232C serial port and 300 or 1200 baud modems.

Along with MS-DOS version 2.11 operating system in ROM and Personal DeskMate 2 software, the Tandy 1000 HX personal computer is supplied with GW-BASIC® software.

The Tandy 1000 HX personal computer (Cat. No. 25-1053) is available at more than 7,000 Radio Shack Stores, Radio Shack Computer Centers®, Radio Shack Plus Computer Centers™ and participating dealers nationwide.
