RADIO SHACK SHIPS MICROSOFT OS/2 OPERATING SYSTEM

NEW YORK CITY--Radio Shack®, a division of Tandy Corporation, announced today that Microsoft® OS/2 operating system for personal computers is now shipping.

MS® OS/2 is a single-user, multi-tasking operating system which offers the customer several enhancements over MS-DOS® 3.XX while still maintaining compatibility with most existing programs.

Using the 80286 protected mode on either an 80286 or 80386 computer, MS OS/2 breaks the 640 kilobyte (Kb) memory barrier and allows 16 megabytes (Mb) of addressable memory. This ability allows the user to run much larger application programs that are currently limited by 640 Kb of memory.

Designed to run on the Tandy® 3000, Tandy® 4000 and newly-announced Tandy® 5000 MC personal computers, MS OS/2 operating system (Cat. No. 25-4100) has a suggested retail price of \$325.00 and is available from Radio Shack Computer Centers®, Plus Computer Centers and participating dealers nationwide.
