

Tandy® Computers: The broadest line of PCs in America.

The Tandy® 4000 LX

Get the power and
performance of
Intel's 80386
...at 20 MHz.

To complete complex business tasks on schedule, turn to the Tandy 4000 LX. With its 32-bit Intel 80386 microprocessor operating at 20 MHz, the 4000 LX delivers a new level of performance to sophisticated database management and spreadsheet applications.

Two megabytes of zero wait state memory make the 4000 LX ready to use with MS OS/2 as well as MS-DOS software. With this much memory standard, the Tandy 4000 LX is also ready to use as the hub of a multiuser office system running SCO XENIX software. And as a network file server, the 4000 LX provides 20 MHz performance for exceptionally high-speed data transfers.

Because of its highly expandable design, consider the Tandy 4000 LX as an investment in the future. Three front panel device slots and eight expansion slots give power users the flexibility needed in configuring the optimum desktop solution.

The new generation Tandy 4000 LX. From the best-selling family of PC Compatibles made in America.

Tandy® Computers: Because there is no better value.™

Tandy 4000 LX Features:

80386 Power

The Intel 80386 is a 32-bit microprocessor which operates at a 20 MHz clock speed. Ordinary PCs operate at 4.77 MHz with an 8-bit path, so you can imagine the improvement in performance. You'll be able to fly through applications—saving time and money. When measured through the Norton Computing Index, a well-known performance standard, the Tandy 4000 LX (25-5100) hit an index of "22.0." To put that in perspective, an IBM® PC XT™ registers an index of "1.0."

The 80386 microprocessor can function in three modes. In the real mode, it runs PC and AT® software. This software will come alive with incredible 20 MHz clock speed. When used with the new MS OS/2 operating system, the protected mode will allow multitasking between applications. Virtual mode will deliver the full potential of the 80386 processor under operating systems such as SCO® XENIX 386.

XENIX Compatibility

Put the incredible power of the Tandy 4000 LX to work for your entire office with the XENIX multiuser operating system. With data terminals, users can tap into the 4000 LX's power, working independently on applications such as accounting, word processing and filing. Plus, each of the users can share the 4000 LX's accessories, eliminating the need for a printer or modem at each workstation. Thus, each remote user has the capabilities of a fully configured computer system for the price of a terminal.

Workgroup Solutions

The Tandy 4000 LX makes an ideal file server for a 3Com workgroup. Workgroups allow for the exchange of information between workstations and the sharing of peripherals, like modems and printers, for maximum office productivity. Share information, update files in a common data base and route messages and other mail. People in your office will still be able to work independently, but they'll have the advantage of working together as a group.

3 1/2" 1.44MB Disk Drive

The Tandy 4000 LX has a built-in, high-capacity, 3 1/2" disk drive that stores up to 1.44 million characters on floppy diskettes, yet has the versatility to read and write 720K formats. And the 4000 LX gives you flexibility—two additional front-panel drive slots, plus one optional internal 3 1/2" drive slot, allow you to customize your system with the kind of options your office needs most. Choose either 3 1/2" or 5 1/4" floppy disks, hard disks with capacities from 20 MB to 344 MB, tape backup or disk cartridge systems.

Expandable 2MB Memory

Two megabytes of RAM are standard with the Tandy 4000 LX. Using 1MB chips allows expansion to 16MB. Memory expansion utilizes state-of-the-art, space-saving Single Inline Memory Modules (SIMM) for improved reliability.

Built to Grow

System expansion is provided by six AT slots and two XT-style slots (one used for serial/parallel printer adapter, included with the system). A 32-bit high-performance memory slot provides for fast access to up to 16 MB of high speed memory. There's also a socket for an 80387 microprocessor that will speed the operation of your numeric-intensive applications.

Keylock and Chassis Lock

A system keylock is included to protect your data from unauthorized access. This keylock prevents keyboard use, system reset and also locks the chassis to prevent cover removal.

Tandy 4000 LX Specifications

Microprocessor:	Intel 80386 processor with 32-bit data path.
Clock Speed:	20 MHz.
Math Coprocessor:	Optional Intel 80387. 20 MHz clock speed.
System Memory:	2MB standard, (expandable to 16MB via a dedicated, high-speed 32-bit memory slot).
Video Support:	Optional VGA, EGA, CGA color and monochrome graphics.
Display Options:	12" VM-5 Monochrome Monitor. 14" VGM-100 Monochrome Analog Monitor. 13" CM-11 RGB 1 Color Monitor. 14" EGM-1 EGA Color Monitor. 14" VGM-200 RGB Analog Color Monitor with .42mm dot pitch. 14" VGM-300 RGB Analog Color Monitor with .31mm dot pitch.
Mass Storage Devices:	3 1/2" 1.44 MB floppy disk drive built-in. Supports two additional internal drives—either 3 1/2", 5 1/4", hard disk or disk cartridge.
Hard Disk Controllers:	ST-506 and SCSI options.
Keyboard:	Ergonomic, 101-key enhanced keyboard with tactile feedback. 12 function keys, separate numeric keypad, LED indicators for Num Lock, Caps Lock and Scroll Lock.
Expansion Slots:	Six AT and two XT card slots, plus 32-bit dedicated memory slot.
Standard Interfaces:	Asynchronous communications port (RS-232 serial), parallel printer port.
Real-Time Clock:	Built-in real-time clock with battery backup.
Operating Systems:	Optional MS-DOS 3.3 with BASIC, MS OS/2 and SCO XENIX 386.
Power Supply:	Input: 120VAC, 60 Hz. Output: 192 watts. U.L. listed.
Dimensions:	6 1/2" x 19" x 18".
Shipping Weight:	47 lbs.
Certification:	FCC class A.
