

Tandy® 5000 MC Professional System

Our most powerful Micro Computer ever! The Tandy 5000 MC is targeted at the following markets:

CAD/CAM

With its high-speed processing power and VGA graphics capability, the Tandy 5000 MC makes the ideal CAD/CAM workstation.

Computer Aided Engineering

Because of its 20 MHz clock, high-speed memory caching and 80387 co-processor support, the Tandy 5000 MC Professional System is perfect for all types of Computer Aided Engineering in a variety of fields.

Desktop Publishing

The ever increasing demands placed on desktop publishing solutions—more memory and disk storage, high-quality display graphics and high-performance processing power—all add up to the features found in the Tandy 5000 MC.

Local Area Networks

As the hub of a Local Area Network, the Tandy 5000 MC complements the Tandy Workgroup solutions offered by Tandy and 3Com. Very high throughput on the bus, as well as overall system performance, make the Tandy 5000 MC ideally suited for networking solutions.

Power User

All of the features offered by the Tandy 5000 MC make it the system of choice for the "power user." Large database manipulation, spreadsheet and other data/numeric intensive applications will operate with maximum throughput.

Multiuser environments

Imagine a whole department connected to a Tandy 5000 MC—all accessing and updating information via low-cost data terminals. The SCO™ XENIX® 386 operating system makes it possible. With UNIX® based applications for accounting, database and engineering, the Tandy 5000 MC is a powerhouse in multiuser environments.

Compatibility

Of course, for those customers making significant investments in the 80386, VGA and IBM® Micro Channel™ architecture, the Tandy 5000 MC is the best alternative from a leader in computer technology: Tandy Corporation.

Long offering flexibility in memory, storage and video options, Tandy now offers its customers a choice between the IBM Micro Channel bus and the industry standard AT bus.
