RADIO SHACK BRINGS TECHNOLOGY TO THE HOME AND OFFICE

FORT WORTH, TEXAS -- Radio Shack[®], a division of Tandy Corporation, introduced today its technology product line for 1989. Significant among the new products are a two-line cordless telephone, a pocket digital data bank and cellular telephones with increased channel capacity.

"Radio Shack is continuously working to bring innovative products to the marketplace," said Robert Miller, vice president of merchandising. "As always we are stressing quality, features, ease-of-use, and most of all, value."

Radio Shack designed and manufactured, the ET-422 Cordless Telephone is ideal for the home, home office and office. It features two lines with one-touch dialing of any 30 frequently called numbers on either line. Selection of line one or two and placing either on hold as you call out or answer the other is easy because all the controls are in the handset. No external controlling devices are necessary. The ET-422 automatically selects the "free" line when the other line is in use and automatically answers the ringing line. Line status indicators located on the handset as well as on the base show when the phone is in use, ringing or on hold.

Features include: a "flash" button for use with special services like Call Waiting; one-touch redial of the last number dialed; programmable memory; selectable touch-tone or pulse dialing

for tone-access services; and an automatic tone signal to alert you when the handset is out of range. A selectable security code keeps other cordless users from calling or answering on your line. The ET-422 is hearing-aid compatible and has an amplifier with volume control to allow listening in noisy areas. Suggested retail price: \$159.95

Radio Shack's EC-319 Digital Appointment Calendar/Data Bank is a sophisticated information organizer that will become an indispensable electronic secretary, ready to work wherever you go. Its calendar keeps track of appointments through the year 2099. The data bank files and retrieves information alphabetically. To recall an entry, just type in a name and all the information stored with that name appears immediately on the 6-line display screen. Features include: a scheduler with room for up to 1,100 appointments; a telephone number and address directory for up to 1,500 persons; a memo pad which will store up to 1,500 brief entries for quick recall; and password protection for sensitive data. There is also a full-function calculator with separate number keypad. The Data Bank folds to a compact 3 x 5 x 5/8" and comes with long-life lithium batteries. Retail price: \$79.95

Due to the increase in cellular telephone usage, the Federal Communications Commission has expanded the radio frequencies reserved for cellular use. Radio Shack, the largest retailer of cellular telephones has introduced new versions of its three popular cellular phones to include this expanded 832-channel capacity.

Radio Shack's cellular offerings include the popular handheld CT-301 Portable Cellular Phone; the CT-201 Transportable Cellular Phone; and the low-cost CT-101 Mobile-Only Phone.

The portable CT-301 features memory for accurate speed-dialing of up to 40 numbers, cumulative call-timer to keep track of phone usage, and an electronic lock to prevent unauthorized outgoing calls but permit "911" emergency calls and much more. The CT-301 retails for \$1,499 including a built-in rechargeable battery pack, portable antenna, and carrying case with strap. The transportable CT-201 is a powerful 3-watt cellular phone that features a battery-save switch. When operating in a strong cellular service area, simply move from 3-watt power to 6/10-watt power and double the life of the battery. The CT-201 also has memory dialing of up to 98 numbers, last number redial, scratchpad memory and much more. Retail price: \$999. The mobile-only CT 101 is a cost efficient full-featured cellular telephone that installs quickly yet transfers easily from the work car to family car. Features include 98-memory, full duplex handsfree for making or receiving calls with using or lifting the handset, and a built-in speaker/monitor for on-hook dialing. Retail price: \$799.

Prices are good at over 7,000 Radio Shack stores and participating dealers nationwide.
