RADIO SHACK UNVEILS NEW PRODUCTS FOR OFFICE

FORT WORTH, TEXAS -- Radio Shack[®], a division of Tandy Corporation, introduced today two new technology products designed for the office and home.

Soon to be one of the hottest new office/home accessories, the TandyFax[®] 1000 compact facsimile machine is the money-saving way to send documents anywhere in the world instantly. This 13-pound fax is ideal for small businesses, home offices, departments and branches of large businesses. The TandyFax connects easily to an existing rotary or tone telephone line and will send or receive letters, spreadsheets, even line art and photographs. Its SuperFine, Fine, Standard and Halftone Resolution Modes ensure that even the smallest text and faintest photographs are reproduced with clarity and sharpness. The unit can also serve as a copy machine for quick copies.

The TandyFax comes complete with LCD display; a built-in 24-hour programmable timer that will transmit data after hours when long-distance rates are lowest; 70-station auto-dialer; built-in memory backup; automatic document feeder; and turnaround polling which lets you send and receive documents during the same call, minimizing long distance charges. The unit also includes a telephone handset so you can talk to the other party without making a separate call.

-- more --

To make record keeping a snap, the TandyFax automatically prints out a journal of transaction data including date, time, number of pages, ID number and more. It also provides proof that a document was sent and received. A quick reference guide; sheet carrier for sending the smallest of documents; AC adapter/recharger and telephone cords are included. Suggested retail price: \$1,299.00.

Radio Shack also announced its new Portable Copier, a hand-held, lightweight copier that takes the hassle out of photocopying. Simply pass it over a printed page for a crisp, black and white copy instantly. The Portable Copier is smaller than a paperback book and is powered by built-in rechargeable batteries to go anywhere. Priced at \$199.95, this unit is perfect for researchers, students, attorneys, tax accountants, sales people, anyone who needs to make fast, clear copies. The copier is 3-11/32 x 4-23/32 x 1-5/8" and uses 2-1/2" wide thermal paper, which is available from Radio Shack. Includes an AC adapter/charger.

Available at over 7,000 Radio Shack stores and participating dealers, the TandyFax 1000 and Portable Copier are just two examples of the innovative and affordable technology products offered by Radio Shack, the nation's technology store.
