RADIO SHACK POSITIONED TO HAVE COMPETITIVE EDGE IN EDUCATION MARKET

Fort Worth, TX. September 28, 1989 -- James M. McGrody, Radio Shack's new vice president of Educational Sales and Marketing, told an audience of industry analysts today he believes current and emerging trends place Radio Shack in a pre-emptive position in the K-12 personal computer market.

McGrody cited Radio Shack's strong commitment to education and its long-term research, product development and merchandising strategies as key factors of its competitive edge.

McGrody said Radio Shack will focus on the MS-DOS®-based Tandy® SchoolMate™ networking solution. SchoolMate is an integrated collection of applications and utilities designed specifically for use by students, teachers and administrators. It is based on the easy-to-use DeskMate® interface and the low-cost TandyLink™ network, or industry-standard 3Com® network. "SchoolMate is the differentiation that will position us as the leader in educational technology for the nineties."

McGrody feels Apple will find it difficult to respond to the growing demand for more sophisticated software requiring MS-DOS protocols.

He also believes IBM's top-down marketing strategy will become less successful as site-based management becomes prevalent and administrative functions become decentralized. "Their synonymous association with MS-DOS will weaken," McGrody added.
