

Tandy 1000 RL Software

The uniqueness of the Tandy® 1000 RL computer is due in part to the DeskMate® software bundled with it. Since its introduction in 1984, DeskMate has evolved into a graphically-oriented user interface, providing a consistent "look and feel" to diverse software packages from many of the industry's leading software publishers. The significance of Tandy's DeskMate strategy is that it provides users of low-cost personal computers with a greater degree of simplicity and user-friendliness.

Extensive research and in-home testing has resulted in a special, enhanced version of DeskMate for the Tandy 1000 RL that includes "everyday" home-oriented applications. Every Tandy 1000 RL computer is shipped with the following easy-to-use applications software:

DeskMate Home Organizer - Personal Programs

- *Collections* - A simple way for family members to catalog individual collections, such as stamp or coin collections. Several ready-to-use collection formats are included.
- *Diary* - Every family member can keep his/her own diary, protected by his/her own "password."
- *Home Inventory* - Families can keep records of valuables, appliances, and electronic items for insurance purposes. The item, location, purchase date, cost, serial number, and any other notes can also be password protected.
- *Itemized List* - An application to help family members itemize jewelry or any other Home Inventory items.
- *Travel Planner* - Taking a family vacation? The Travel Planner provides instant access to toll-free phone numbers of most major hotel chains, airlines, bus lines, railroads, and car rental agencies, worldwide! Plus, families can make a list of items to pack as well as schedule daily activities.

DeskMate Home Organizer - Kitchen Programs

- *CookBook* - The CookBook includes more than 30 recipes from *The New Good Housekeeping Cookbook®*, for all types of meals, breads, desserts, salads and more. Cooks can add their own favorite recipes and adjust recipes for a specific number of guests. The CookBook will automatically add required items to a grocery list.
- *Grocery List* - The grocery shopper can browse through various categories, checking off what is needed or typing in special items. The Grocery List gives the cook the ability to add or delete ingredients as needed for planned meals.
- *Meal Planner* - The cook can plan multi-course meals by selecting from his/her favorite recipes in the CookBook.

DeskMate Home Organizer - Financial Programs

(Note: All sensitive information may be password protected!)

- *Account Information* - Record credit card and bank account information, including telephone numbers, addresses, and account numbers.
- *Checkbook Balancer* - Reconcile monthly bank statements.
- *Checkbook Register* - The Checkbook Register is an easy way to maintain one or several checking accounts. Keep a record of each check, deposit or bank fee by entering the check number, amount, payee, and other necessary information.
- *Expense Itemizer* - The Expense Itemizer details how a family's money is being spent, using the information entered in the Checkbook Register. View expenses for the month by account, or as a pie chart. A bar chart will show how any one expense compares for all months of the current year.
- *Financial Notebook* - Stocks, investments and loans can be maintained for quick reference.

Mathcard - Financial

(Mathcards perform a variety of common calculations. Each one is a simple, one-screen application. Simply enter the information in the blanks, and the answer appears!)

- *Annual Savings* - Calculates the amount of money which one can accumulate in a specified number of years, depending on annual deposit and interest rates.

Tandy 1000 RL Software

Mathcard - Financial (continued)

- *Home Price Info* - Determines how large a house can be purchased, based on the intended down payment, monthly payment, interest rate and length of loan.
- *Income Payments* - Figure retirement income. If a lump sum is invested at a given interest rate, and that money is to be withdrawn over a certain number of years, how much can be withdrawn each year?
- *Income Planner* - How much money must be put into an account that pays interest if an equal amount is withdrawn each year, for a certain number of years?
- *Interest Rates* - Figure effective annual interest based on a compound interest rate.
- *Loan Payments* - Calculate monthly payments for a house, car or other loan.
- *Lump Sum Investment* - How much will you accumulate if a lump sum is invested for several years at a fixed interest rate?
- *Lump Sum Value* - If a lump sum is invested now, how much must be invested to grow to a specific goal in the future?
- *Savings Goal* - Saving for a college education? How much per year must be saved to reach a goal?

Mathcard - Formulas and Conversions

There are 31 different conversions ranging from cups to pints, kilometers-miles, ounces-gallons, ounces-grams, pounds-kilograms, square miles-acres, degrees F-degrees C, and much more. Type in either, and the other is calculated. A number of calculations such as cubic yards, miles-per-gallon, discounts, markups, percentages, and more are also available.

Information Center

The application most families will choose to leave on their RL's screen when it is not being used for other things.

- *Calendar* - Identical to a desktop calendar with daily flip-over pages, events or notes for every member of the family can be scheduled just by "clicking" on the month and day. The calendar changes with the computer's internal clock.
- *Notebook* - A notepad where notes (not date-related) can be left.
- *Important Phone Numbers* - Ideal information for baby sitters! Four important phone numbers may be kept. With a telephone adapter, or "modem," numbers are dialed automatically.
- *Message Board* - A convenient way to leave messages for any family member, "pinned" to the board so the addressee can't miss them.

Other DeskMate Applications

- *Address Book* - Maintain a computer "card file" of friends, relatives, neighbors or business associates. Their phone numbers are automatically added to DeskMate's phone list.
- *Desktop* - DeskMate's screen which can be used as a "launching pad" for many different software packages.
- *Draw* - A graphic program to spark creativity, the Draw application can be used to design letterhead for correspondence.
- *Hangman* - The entire family will enjoy this educational word game that uses the built-in 90,000 word spelling dictionary.
- *PC-Link™* - Tandy's information system. With optional telephone adapter, a local phone call will connect the user's computer to a wide selection of information and services.
- *Telecom* - A software application that allows the optional telephone adapter to connect to almost any other computer. (Authorization to connect is required.)
- *Text* - A simple "word processor" capable of "beeping" when it detects a misspelled word.
- *Music* - Using the special sound capabilities of the computer, play sample music, enter your favorite tunes, or compose and play an original creation.
- *Sound* - Store, edit or playback speech and/or sounds recorded with a microphone. The sound can be edited to create traditional or imaginative instruments for use with Music.

DeskMate also offers a number of "accessories" like an on-screen calculator, a clipboard to move information between different applications, a corkboard for posting reminders, an extensive phone list, and more. These applications are different and separate from those included in the Home Organizer/Information Center.
